JUST TIME

The Wonderful Part It Plays in the Earth's History.

Truly it is hard for us to realize what a part time has played in the earth's history—just time, duration—so slowly, oh, so slowly, have the great changes been brought about! The turning of sand and silt into rock in the bottom of the old seas seems to have been merely a question of time. Mud does not become rock in man's time nor vegetable matter become coal. These processes are too slow for us. The setting and holding of the rocky strata, while deep under an even pressure, is only a question of time. Allow time enough and forces enough and a layer of granite may be bent like a bow. The crystals of the rock seem to adjust themselves to the strain and to take up new positions just as they do much more rapidly in a case of ice under pressure. Probably no human agency could bend a stratum of rock, because there is too much weight even if there were power enough. The low temperature acting gradually, says my geologist, "is an individual case of time producing results that could not be otherwise brought about even through greater heat." "Give us time," say the doctors and the nurses and the snowflakes, and we will make you a garden out of those same stubborn rocks and freezing ledges. "Give us time," says Life, starting with its protozoans in the old Cambrian seas, "and I will not stop till I have peopled the earth with myriad forms and crowned them all with man."—John Burroughs in Atlantic.

GOING ABOUT IN CHINA.

Useful Sedan Chair in the Crowded Nasty Streets of Canton.
There are but two ways to go about Canton—on foot or in a sedan chair. The streets are from four to eight feet wide, the average being probably about six feet, and wheeled vehicles are out of the question. Even the jinrikisha cannot be used here. If you try to make your way on foot, the density of the moving masses renders progress almost impossible, and rickshaws and pick-pockets are numerous, so that the best plan is to take a responsible native guide and chair.
The chairs are carried by two, three and sometimes four men, according to the weight of the passenger. The two bamboo poles by which the chair is supported are about eighteen feet long and are joined at the front and rear ends by a crosspiece. After you have taken your seat the coolies raise the ends of the poles to their shoulders and are off at a dogtrot, only interrupted by a "congestion of traffic"

Result of Poor Writing.
The Duke of Wellington, through misreading a badly written letter, made a ludicrous blunder. This letter was written by C. J. London, a botanical author, who wrote to the duke requesting the privilege of seeing his beautiful beeches. The duke misread the signature for that of C. J. Bloomfield, bishop of London, and wrote in reply: "My lord, I shall always be glad to see you at Strattonfields, and my servant shall show you as many pairs of my breeches as you may choose to inspect. But what you want to see them for is quite beyond me"—Exchange.

An Easy One.
"You imagine you know a lot about Biblical things," said the scoffer. "Suppose you tell me who Cain's wife was."
"That's easy," rejoined the old deacon. "She was Adam's daughter-in-law."—Detroit Free Press.

System.
"I'm afraid I can't write that article on 'System.'"
"Why not?"
"I can't find my notes."—Louisville Courier-Journal.

Springtime is Here

Spring is here and right now is the time to make things grow. The trees and the bushes need pruning, the dead limbs should be taken off, and the garden and lawn will amply repay you for a little attention now. Good workmen use good tools, and these are the only kind we carry. Let us suggest GARDEN BAR LOWS GARDEN and LAWN RAKES SPADES, SPADING FORKS, SHOVELS, TROWELS, PRUNING SHEARS, SAWS AND SPRAY PUMPS. Helefy, everything to make the lawn, garden and shrubbery beautiful for the coming year.
