YEAR. No. 936

KLAMATH FALLS, OREGON, TUESDAY, AUGUST 17, 1909.

PRICE 5 CENTS.

OTHER BIG SHIPMENT

BERRIER STARTS 375 HEAD OF CATTLE TO SACRAMENTO

CHANGE IN 30 YEARS

Cattle Now Raised on Fifty Acres Than in Whole County Thirty Years Ago.

Gerber, the Klamath county farmer and wholesale butcher, started 375 head of cattle from Horsey and Langell Friday for the Sacramento valley. Mr. Gerber states that cattle are in fine condition at this time of the year, and says that the next two weeks will be the best time to ship beef cattle, after which time beef cattle will be put in the pastures for the winter.

When asked as to the number of cattle that would be likely to be shipped out of this section between now and March 15th, which generally closes the season for fed cattle, he stated that he believed there will be no more shipped as in former years. It is also his opinion that there will be a big increase in the number of lambs shipped.

"It will be just thirty years next month," said Mr. Gerber, "since I first came to Klamath county. Only in coming up from Merced, I saw more alfalfa, oats, wheat, and potatoes grow on fifty acres than I first came here. In the vast amount of alfalfa, wheat, barley, oats and potatoes now raised, and which are raised fifty times over un-tilled land, there are two other things that I wish to call to the attention of all those under the irrigation system. These are dairying and the raising of hogs. These should be followed at once. If the readers of this paper could see in cold print the amount of money that is annual-ly sent out for hams, bacon and lard from the State of Oregon alone they would be astounded. It would be a fortune. For years the amount of this county raised cat-tle has been small. For this purpose there are no better lands than the Herefords, Jerseys and Devonshires. For these purposes, however, a differ-ent breed should be brought in. Either Jersey, or a cross be-tween Jersey and Jersey or Jersey and Jersey should be employed. These

produce the best results, and where scientific, up-to-date methods are employed, enormous profits are realized. Thousands of dollars are annually sent east for the products of the middle west dairy farms. This should not be so. No better dairy country can be found anywhere on the globe than right here in Klamath. It is far superior to any other section on the coast. Whenever a dairy expert has come here he has been surprised with what he found, and was free in his predictions that at no far distant date this country would be noted throughout the coast for its dairying.

"As for the hog industry, too much cannot be said. A high-grade class of hogs should be imported. Every care should be exercised to keep the county free from hog diseases. None are to be found here now, and with ordinary care none will get a foothold. The methods of hog raising have been revolutionized. The old wallow has been relegated to the rear, and the old idea that the hog was nothing more than a scavenger has been proven false. These two practices are what cost the farmers of the United States millions of dollars. The hog is a clean animal. Un-sanitary surroundings play havoc with them, for they are productive of the diseases that rapidly kill them off. Under the conditions prevailing here the farmers of the county can make fortunes out of this industry, provided they apply modern meth-ods and conduct their work on busi-ness principles.

"I am satisfied in my own mind that in a short time any of the land under the irrigation system—the sagebrush land as it is now called—will make a farmer rich. It will not be necessary for him to have several hundred acres. I believe that with 160 acres or less he will soon have acquired a comfortable compe-tency. There are thousands of acres of such land in Yonka, Langell and Poe valleys—land that is the finest that man ever traveled over—wait-ing only the magic touch of water."

The McRoskey inner-laced mat-tress is taking the lead of all others in material and construction. They are neat, handsome, and durable as well. You can always get them at the Big Store, Virgil & Son.

Why is our clearance sale like a magnifying glass? Because it makes your quarters appear as large as dol-lars usually are. Portland Store, next to Postoffice.

COUNCIL HAS MEETING

ROUTINE BUSINESS TRANSACTED AND PERMITS ISSUED

MAYOR SUBMITS OPTIONS

High Prices Asked for Property on Lake Front, Needed for Instal-lation of Septic System.

The City Council met last night. Present, F. T. Sanderson, mayor; Councilmen Wilkins, Obenchain, Hanks, Willits, Summers and Castel. Owing to the absence of Recorder Leavitt, who is in Mono county, Cal., visiting his sick mother, Councilman Castel acted as recorder pro tem. The following business was trans-acted:

Building permits were issued as follows: E. Quillitch, Jack Horton, W. H. Clark and Paul J. Breiten-stein. The application for a building permit of J. M. Evans was denied.

Councilman Wilkins was appoint-ed as a committee of one to confer with Engineer Patch of the reclama-tion service concerning the abate-ment of the nuisance caused by the Ankeny ditch in its present condition.

Mayor Sanderson submitted the following options secured on prop-erty adjoining Lake Ewauna to be used for city purposes: From A. L. Leavitt, A. Martin Jr. and F. H. Mills for all of block 88 in Klamath addition; price \$4,999. From C. T. Oliver for all that portion of lot 8, section 32, lying west of the eastern boundary of Payne alley and south of Klamath street, containing a frontage of 220 feet and a depth of 150 feet; price \$6,600. J. C. Rutenic, 86 feet front \$2,400, 196 feet front \$2,500. A letter was received from Alex Martin Sr. at Oakland, Cal., offer-ing block 72 to the city for \$3,000.

The mission of Messrs. Sanderson and Wilkins is one that may be pro-ductive of some results. Mr. Patch is anxious as the city is to abate the trouble from the Ankeny canal. Under its present condition it is a source of annoyance to the entire city. Whether it will be safe to turn on the full head of water and clean it out remains to be seen. When the flow was increased this summer so many leaks made their appearance that the amount of water was re-duced to the minimum, with the re-sult that the canal throughout its en-tire length has become overgrown with weeds.

At a former meeting of the Coun-cil Messrs. Sanderson, Willits and Hanks were appointed a committee to inspect the city reservoir. The usual complaints had been made about what could be found there, and a demand for an examination had come from many citizens. There was absolutely no foundation for these complaints. A careful examina-tion was made, and it was found that every precaution had been taken to safeguard against the contamination of the water. Inside was scrupulous-ly clean, and a pin could easily be seen in the bottom of the reservoir, notwithstanding that but compar-atively little light is admitted through the opening. Mayor Sanderson stated that the report of Health Officer Yen-ny, who was here about two years ago, that this city had one of the best proected sources of supply in the State, is as true to-day as it was then.

F. M. Rolfe and wife returned from Rocky point last night, where they have been for the past week.

Girls, don't lose your watch. New and secure safety fobs At McHattan's.

Passed Examinations Successfully

The following persons were suc-cessful in passing the examination for county certificates which was held here last week: First grade, Restora French; second grade, Helen Wakefield, C. C. Craig and Irene Daun; primary, Miss Dorella Shives of Portland, Ore.

SAWMILL AT GORDON SPRINGS.

A. W. Shur of Keno is in the city to-day on business. He reports that O. P. Harvey of Grants Pass will be-gin about the 1st of September on the construction of a new sawmill at Gordon Springs, between Worden and Calor.

The mill is to have a capacity of about 25,000 feet a day and will give employment to about thirty men and eight or ten teams. Mr. Harvey some time since purchased the timber claims of J. Padgett, Charlie Nelson, R. W. Tower and Mr. Gordon, and the timber supply for the mill will be taken from these claims. It is understood that the entire cut of this mill will be taken from these claims. It is understood that the entire cut of this mill has been contracted for box stock. The mill is located only a mile from the main line of the Cali-fornia Northeastern railroad and doubtless a spur will be run up to the mill for taking the output out.

RESULTS OF GUN CLUB SHOOT.

The Crater Lake Gun Club held its weekly trap shoot last Sunday at its new grounds on the Altamont road, with the following results:

Possible 25—	
Hampton	24
McDonald	23
Eads	21
Ankeny	16
Robertson	12

The ticket and freight office of the Southern Pacific has been moved to the north end of the freight depot, where it will remain until the com-pletion of the new passenger depot which is now being erected.

For Sale—August Only
A Summer Resort on Klamath Lake That is Unsurpassed in America

This is a sporting proposition for men of wealth—it is not a farm. Unequaled trout fishing June to November. Deer hunting on the premises August 1 to November 1. Duck shooting superior to any in the State over thousands of acres of wild celery and rice September 1 to Febru-ary 1. Grouse and pheasant shooting on the place October 15 to November 15. Best starting place in county for a bear hunt. Crater lake automobile road will run through the place for a mile and a quarter. Navigable water to the prop-erty, unsurpassed drinking wa-ter and power to develop the property. More bottom land and fine gar-den land than any place on the lake. Thousands of pine and fir trees and thousands of quaking aspens. More varieties of wild flowers and natural grasses and vetches than any place in the county.

If you develop this property as it can be developed there is no resort in the county that can compare with it. No amount of talking will de-scribe it; let us show you. We have been offered more than twice what it cost, but have a price at which you may take it; below which, we will keep it.

NFW BANK DIRECTORS

HAND NOW IN THE HANDS OF LOCAL PEOPLE

STOCK INCREASE PROBABLE

J. A. Maddox and D. M. Griffith Are Elected to Fill Vacancies Made by Resignations.

The First National Bank an-nounces a change in the directorship of their institution. George P. Lind-ley and W. I. Vawter of Medford, realizing that their other vast home interests required their personal at-tention, have disposed of their stock in the First National and J. A. Mad-dox of this place and D. M. Griffith of Eagle Ridge have been elected as their successors to fill the vacancy. Mrs. Fred Blynn and A. C. Beals have also purchased stock in this in-stitution, consequently from now on this bank will be strictly composed of local people.

The foregoing change in directors applies also to the First Trust and Savings Bank, which is under the same management as the First Na-tional. Cashier Dezell stated that it was quite probable that the capital stock would be materially increased in the near future, owing to the rapidly in-creasing business which has devel-oped.

Mr. J. A. Maddox, who has been elected one of the directors of this bank, came here first about two years ago on a visit to Mr. Dezell, and through the latter was appointed one of the judges at the county fair. The exhibit Mr. Maddox saw there made such a great impression upon him that he made up his mind that Klamath county was worth investi-gating, which he did, with the results as aforesaid.

In addition to his investment in the bank Mr. Maddox has purchased from G. W. White an undivided one-half interest in the property next to the First National Bank on Main street, on which is being erected a new brick block, the description of the property being as follows: Thirty-five feet off the easterly side of lot 4 and 46 feet off the northerly end of said lot 4 and 45 feet off the west-erly part of lot 3 in block 17 of the original town of Klamath Falls. Mr. Mad-dox will hereafter direct the con-struction of the building which is now being erected on this property.

SENATOR BOURNE GETS SNUB.

WASHINGTON, August 14.—Ap-pointment of Robert J. Hendricks of Salem as census supervisor of the First Oregon district and State Senator Seneca C. Beach as supervisor of the Second district, announced at Beverly last night, is a decided vic-tory for Representatives Hawley and Ellis, who respectively recommended the appointees.

Senator Bourne undertook to pre-vail upon the President to take this patronage from the congressmen and give it to him, and failing in that, ob-jected as strongly as he could to the appointment of Mr. Beach, who, he said, was obnoxious to him. He did not favor Mr. Hendricks either, as Mr. Hendricks in his paper has printed editorials critical of the new order of things in Oregon politics, and at this Mr. Bourne took offense.

It is understood that Mr. Hon-dricks and Mr. Beach were appointed because the indorsements filed by Messrs. Hawley and Ellis showed them competent men and further-more, because the director of the

census and secretary of commerce and labor are opposed to allowing senators to control these appoint-ments.

Messrs. Hendricks and Beach are now given recess appointments and take office immediately and their nominations will be sent to the senate in December. Mr. Bourne may then undertake to prevent confirma-tion, particularly of Mr. Beach. But unless he can secure actual rejection of the nomination he cannot keep Mr. Beach out of office. His present re-cess appointment, in the event he fails of confirmation through non-ac-tion of the senate, will carry him through to the close of the next ses-sion of congress, when he can be re-appointed. The same is true of Mr. Hendricks.

UNSAFE WITHOUT GUIDES

Josephine County Caves Have Been Source of Danger.

GRANTS PASS, Ore., August 14.—Ever since 1874, when Eliza Dav-ison discovered the Josephine coun-ty caves, there has been a tendency on the part of the public to enter these natural wonders without a guide. Three years after the caves were known to be of such magnitude, F. M. Nickerson of Kerby, Ore., with the assistance of others, made a par-tial survey of four floor levels and installed ladders where needed at many of the difficult passageways.

These caves have never been fully explored to this day, and it is said that they extend in and through the mountain five or six miles from the main entrance. Once inside there may be found every variety of lime deposits. Within the dark caverns may be heard the music of running water from an unknown source. A strong breeze that chills is constant-ly in motion. The caves are situated in Cave mountain, a peak that vaults into the sky a distance of 6,000 feet, and the opening through which tour-ists may enter is found at an eleva-tion of 4,000 feet.

In 1897 the caves were withdrawn from public lands and by late pro-clamation issued by the President the mountain and a mile square has been set aside as a public park. There is a strong movement on foot since the accidental killing of Frank Ellis to have the government prohibit tour-ists and visitors from entering the caves without official guides. It has been suggested that the government appropriate money and place iron gates over the opening and that they be securely locked.

CONTRACTORS BEGIN WORK

CONSTRUCTION OF THE NATRON END HAS COMMENCED

BE COMPLETED IN TWO YEARS

Engineer Hoey is Rushing Matters at Natron and Report Has It Contract Will Soon Be Let.

Engineer Hoey is in Portland for the purpose of hurrying matters on that end of the Klamath Falls-Natron line. He has been pouncing the contractors to get busy, and the re-sult of his labors is shown in the fol-lowing announcement that appeared in Sunday's Oregonian:

"Men and equipment to-day will be forwarded by the McCabe Construc-tion company of this city to Natron, where actual construction work will begin at once on the Klamath Falls-Natron extension of thirty-four miles for the Oregon and Eastern railroad, a Harriman property. The contract for this mileage was recently award-ed to the Utah Construction com-pany, which has sublet a part of the work to the Portland firm of con-tractors.

"The subcontract taken by the Mc-Cabe company includes two tunnels, one 2,000 feet long and the other 600 feet long, together with about four miles of grading. This company only recently completed seven miles of grading, including a 1,400-foot tunnel, for the Pacific Railway and Navigation company, which is build-ing a railroad to Tillamook."

Within a short time, it is pre-dicted, orders will be issued for the letting of the contract for the bal-ance of the line and rushing the line to completion. This will be in con-nection with similar orders along the Deschutes road, as well as to one to Ontario, all of which are for the pur-pose of placing the entire interior section of the State in touch with the Harriman system. If this is done it will mean that within two years this city will be enjoying the sensa-tion of seeing through trains from Frisco to Portland.

W. C. T. U. MEETING.

The W. C. T. U. will meet on Wed-nesday afternoon at 3 o'clock at the home of Mrs. Price. All the mem-bers are urged to be present and all others are welcome.
