### PACIFIC AND EASTERN RAILWAY WILL BE EXTENDED

Arrangements Perfected for Early Settlement of Receivership—New Bonds Disposed Of.

Extension of the Pacific & Eastern railroad to the timber belt, the final winding up and adjudication of its indebtedness as well as the involved finances of the defunct Medford & Crater Lake railroad was assured Tuesday morning, when John Roberts Allen of New York, owner of the Pacific & Eastern, paid to Receiver J. F. Reddy of the Medford & Crater Lake railroad \$77,425 for \$100,000 worth of Pacific & Eastern bonds, which were turned over to Receiver Reddy by Receiver T. C. Devlin of the Oregon Trust & Savings bank in exchange for \$81,500 certificates of deposit on the defunct bank. The certificates of deposit represented the proceeds of the sale of the Medford & Crater Lake railroad to George Estes and associates of Portland. The negotiations were completed by Mr. Allen, Receiver Reddy and his attorney, A. E. Reames, and Attorneys Franklin Griffith and S. B. Lithicum of Portland, who represented Receiver Devlin, before Judge H. K. Hanna at Jacksonville.

The German-American bank, which had assumed the assets and liabilities of the Oregon Trust, and Receiver Devlin agreed before Mr. Allen purchased the Pacific & Eastern stock, to surrender the old Pacific & Eastern bonds they held and accept in lieu thereof new bonds. This agreement they repudiated as soon as Mr. Allen made his purchase, and then repudiated the certificates of deposit held by Receiver Reddy, forcing him to bring suit to establish their validity and demand an accounting. Since then they agreed to surrender the bonds in exchange for the certificates of deposit.

Mr. Allen made two propositions, the first to purchase the certificates of deposit at their face value, \$81,500, paying \$10,000 down and the balance in quarterly payments extended throughout the year. The second proposal was to pay cash less a discount of 5 per cent, which was accepted.

The transactions concluded today open the way for the speedy settlement of the Medford & Crater Lake railroad receivership and the liquidation of its indebtedness as soon as the court passes upon the validity of the claims. They place Mr. Allen in a position to deliver his new issue of bonds as soon as the local bondholders comply with their agreement and surrender their old bonds for the new. The new bond issue has been placed and the money is available for the railroad's extension.

### THE DIAMOND CUTTER.

His Skill Has Much to Do With the Brilliance of the Gem.

When the expert looks at a diamond he can tell you in a moment where it came from and even whether it was cut lately or some years ago. He knows by its color whence it comes, for the color of the Brazilian diamond differs from that of the South African, and even in South Africa different colors are found in different mines.

In the rough the diamond has little brilliancy, for there is a crust that must be cut away before it can properly refract the light, and it is this power of refraction which makes the brilliancy of a diamond and has everything to do with its value in the market. The skill of the diamond cutter has much to do with bringing out this brilliancy. He must do the most he can with the rough stone before him and lose as little as possible of the precious weight in the stone.

Diamonds are found in all kinds of queer shapes, for the carbon may be in any position while being crystallized, and the act of crystallization may affect only parts of that carbon. When the expert cutter has a rough diamond before him he judges almost instantly how it will cut to the greatest advantage. If it inclines to the pear shape he will make a pear shaped diamond of it. If it be square or round the cutting will follow the natural lines as closely as possible, so that the loss may be reduced to a minimum.

To make the stone as brilliant as possible the diamond cutter cuts many facets so as to refract the light from as many points as he can. A full cut brilliant has at least forty-eight facets, and so expert are the cutters that they often cut diamonds so small that it requires a hundred to weigh a carat. Each has forty-eight facets.—Cleveland Plain Dealer.

Living Over Catacombs.

Paris, in many of its districts, is built over the catacombs, says Harper's Weekly. These vast subterranean chambers and galleries produce that peculiar cavernous sound which is heard in the Luxembourg, Montparnasse, Vaugirard, Montrouge and Montmartre quarters when heavy carts pass rapidly along the coarsely matted roads. The streets are thus like mountainous dunes heaving funeral marches to the grave over that vast common grave of ten centuries of Parisians with its millions of skeleton dead. That quaint little Gothic house at the corner of the Boulevard Raspail, which many an American artist must remember from his student days, actually has a private staircase leading to the catacombs from beneath a hermetically closed stone slab just in front of the doorway.
