THE KIND OF ENUMERATORS

Partners and Crop Reporters for the Census of Agriculture.

WASHINGTON, D. C., Sept. 20.—

Forty-five thousand enumerators out of the estimated grand total of 65,000 will be engaged April 15th next in gathering the required information concerning agriculture for the thirteenth decennial United States census. Director Durand purposes making every effort to secure progressive farmers and crop reporters for these places. His action is based upon the recommendations of Chief Statistician Leonard Powers and the advisory board of special agents composed of professors of economics and farm experts who have been assisting in the formulation of the schedule of inquiries concerning farm operations and equipment. It is believed that the selection of this class of men, already familiar with statistical methods of securing data and reporting it in comprehensible form, will add greatly to the efficiency of the census and to the scientific value of the information obtained. Director Durand does not anticipate any difficulty in procuring enumerators of this kind, as there are in every state of the Union hundreds of crop reporters acting for the department of agriculture, representatives of state boards of agriculture, etc.

The agricultural schedule which is to be placed in the hands of these enumerators is nearing completion by the census bureau. The advisory board, who are acquainted with practical agriculture, its varying conditions, and who are active in their respective states in assisting the farm-

ers to improve their farm methods, have been most earnest and no effort is being spared to make the schedule as simple as possible, and yet secure the greatest amount of important information concerning agriculture.

By means of the census schedule an effort will be made to secure an accurate statement of the total number of acres of land in the farms of the country by states and counties; also the improved area, number and size of farms. On account of the growing importance of tenancy in many parts of the country, considerable information will be secured as to whether farms are operated by owners, tenants or hired managers. Information about the value of farm buildings, and other permanent improvements; and of the farm equipment, both machinery, implements and livestock will be secured.

An important part of the schedule will be that enabling a study of the crops and crop products of 1909. The enumerators will ask about areas, quantities produced, and value of crops, in the case of all the principal crops grown in all parts of the United States. This inquiry covers grains and seeds, hay and forage crops; and all important special crops such as fruits, nuts and vegetables; cotton, tobacco, rice, hemp, potatoes, broom-corn, etc. By-products, like fax straw for tow and twine; and such manufactured products as wine, cider and vinegar; dried fruits, sugar, syrup, etc., will not be overlooked by the questions in the schedule.

The inquiries concerning livestock and their stock products also include cattle, work animals, sheep and goats, swine, poultry and bees. The facts as to the number and value of livestock

at the time of the enumeration are to be secured in some detail, taking into consideration age, sex and use of animals. Furthermore, data will be secured relating to the number and value of each species of animal raised, purchased and sold; and the quantity and value of animal products, such as milk, cream, butter and cheese, wool, eggs, honey and wax.

A few special questions of a general nature may be included to secure valuable related information. Among these is one which will be made concerning the area and character of woodland in farms.

There will be but one schedule for agriculture. There may be a small schedule for the enumeration of animals in cities. This will be carried by the city enumerators and it will cover horses, milch cows, chickens, etc., housed in barns, stables, etc., in the cities. No attempt will be made to get the area of city gardens or vacant lot cultivation.

Book Numbers.

"William," said Mrs. Van Gelder to the man of all work. "I want you to clean out that large chest in the hall just outside the parlor. Burn all the old newspapers, waste paper and any other rubbish you may find there."

After a short time she met William in the hall carrying in his arms a huge pile of sheet music, the property of her eldest daughter.

"What are you going to do with Ma's music?" she asked.

"Why, burn it, sure, as you told me to. It was in the chest there with the other rubbish."

"But I didn't mean the music. Put it back at once."

Noting his mistress' displeasure, William inquired in surprise:

"Why, hasn't she played it all?"

Helping the Town . . .

By banking your money in a bank in your own community you increase the community's power to do business. If substantial farmers want to borrow money there is more to loan them. If you bank your money away from home it is loaned to other farmers, merchants and manufacturers. Help your home people. Money hidden at home helps no one. Placed in a bank it is put to work in ways that help all.
