Daily, by mail, one month	..... .50
Daily, delivered by carrier, one week	..... 50

KLAMATH FALLS, SATURDAY, NOVEMBER 13, 1909.

### FLOODS, WATER POWER AND IRRIGATION

The increase of floods on rivers in the United States is shown by Mr. Leighton, and is attributed chiefly to the destruction of forests. The estimated annual damage by floods in this country has increased progressively from \$45,000 in 1900 to \$227,000,000 in 1908.

Mr. Leighton also discusses the developed and undeveloped water power of the country. Out of about 27,000,000 horse-power available at the minimum flow of streams, but little more than 5,000,000 has been developed, or about one-seventh of the minimum available power. A fairly complete census of developed water powers has been obtained, but the undeveloped powers are determinable only by estimate. The state of New York has the largest development, with \$25,562 horse-power, California standing next, with 466,774 horse-power. The section of the country furnishing the greatest possibility of water power development is in the northern Pacific region, including the basins of the Columbia and Sacramento rivers. Mr. Leighton presents very complete statistical tables covering all sections and states. The tables showing developed water power were compiled by W.M. Stewart of the bureau of the census.

Mr. Newell's brief paper on irrigation shows an increase in acreage of land irrigated from 3,631,381 acres in 1899 to about 11,000,000 in 1907, and from the limit of the irrigable area in the arid region at about 45,000,000 acres, or more than four times the area now irrigated. The projects now under way will serve

about 2,700,000 acres. Mr. Newell's proposed water code and his sketch of the water laws now in force should be of general interest.—Geological Survey Press Bulletin.

### Fearfully and Wonderfully Made

The Manager of a department store received the following order from one of his out-of-town customers, who wanted a bonnet:

"Measure of head from ear to ear over top of head 12 inches; from ear to ear under my chin 9 1/4 inches; from forehead to back hair 7 inches. I want a black lace bonnet with streamers and rosettes of red and yellow satin ribbon and would like a bunch of pink roses or a blue plume with a black jet buckle. If artificial air still the stife I want a bunch of grapes or a bird's tale somewhere. I do not want anything too fancy, but if you think a rath of panicles would look good why put one on. I have some good pink ribbon hear at home so you need not put on strings."—November Lippincott's.

### Quite Another Thing

"Whom are you going to give those cigars to?"  
"To the janitor, so that he will give us more heat."  
"Why, I thought I heard you abusing him terribly this morning."  
"My dear woman, you don't think I would dare address the janitor like that? I was talking to the landlord."—Lippincott's.

### RAMSBY'S EXPRESS

If you want your stuff moved and moved quick, get Ramsby's Express to do it. Office at Sixth and Klamath. Phone 123.

### THEIR OWN DOCTORS.

Remedies That Animals When Sick Instinctively Select.

With the brute creation the simple remedies of nature generally suffice for their ailments, and they are guided to them by instinct. We have been told how the mongoose cures himself when bitten by a cobra by eating a certain plant, and many country residents have seen a sick dog bury himself in the dirt.

Animals instinctively choose such food as is best suited to them. A large number of animals wash themselves and bathe, as elephants, stags, birds and ants. In fact, man may take a lesson in hygiene from the lower animals. Animals get rid of their parasites by using dust, mud, clay, etc. Those suffering from fever restrict their diet, keep quiet, seek darkness and airy places, drink water and sometimes even plunge into it.

When a dog has lost his appetite he eats that species of grass known as dog's grass (chickweed). Cats also eat grass, catnip, etc. Sheep and cows when ill seek out certain herbs. An animal suffering from chronic rheumatism always keeps as much as possible in the sun. The warrior ants have regularly organized ambulances. Latrobes cut the antennae of an ant, and other ants came and covered the wounded part with a transparent fluid they secrete in their mouths. If a chipmunk be wounded it stops the bleeding by placing its hand on the wound or dressing it with leaves and grass. When an animal has a wounded leg or arm hanging on it completes the amputation by means of its teeth.—Philadelphia North American.

### HER CHOICE OF BOAS.

The Question That is Now Puzzling the Man in the Case.

Crosby had always been inclined to conservatism in household expenses, especially in the matter of his wife's dress bills. His wife went so far as to say that he was parsimonious. She had been in need of a new bon for a long time, and after she hinted that her happiness would never be quite complete till she had one he at last consented to make the purchase. He went into a store and picked out two, one of which was a cheap imitation affair and the other a fine, expensive one.

Taking them to his office before going home, he changed the price marks, the expensive tag on the cheap bon, and vice versa.

His wife examined them for a long time very seriously indeed and then said: "Now, dear, the expensive bon is a beauty, and it is really very good of you to allow me my choice. Some women would take it without a word, but really I don't think we can afford the more costly one, and besides, dear, I think the cheap one the more stylish too. Why, Cros, dear, what's the matter? Are you ill?"  
But dear old Cros had made his getaway into the night where he could kick himself as hard as he felt he deserved. But what he would like to know is this: Did his wife happen on the more expensive bon by pure accident or—  
—New York Tribune.

### Girls and Outdoor Games.

Women in their ambition to be athletic contend against insuperable difficulties. One of these difficulties is skirts, a second is waists and a third—almost insuperable—is hair, including hairpins. Watch a girl playing tennis or cricket, and after a more than usually brilliant effort she invariably puts her hands to her head, as if she expected something to fall off if she did not. Energetic play is usually attended by dishevelment of the unruly locks and a shedding of hairpins that cause the pretty athlete distress. Her pleasure in the game is marred by a sense of insecurity and a constant fear of consequences. No woman can wield a racket or essay a run with an undivided mind. Half her brain is occupied by the fearful surmise that her hair is coming down—a surmise, by the way, which is probably too painfully justified by the fact.—London Black and White.

### The Check System.

John Palmer, who died some years ago in rather straitened circumstances in a little town in Michigan, was the inventor of the check system. Palmer was a fiddler and assumed responsibility for the hats, coats and wraps of those who came to his dancing parties. In keeping things straight he gave numbered checks for the articles committed to his care. Some railroad men who attended one of the dances noticed how perfectly the idea worked and appropriated it, and in a short time the system was adopted all over the country. As is so often the case, the inventor got nothing out of it.—New York American.

### Sweet Revenge.

"It must be fine to be under contract to write exclusively for a big magazine."  
"And to have all the other magazines clamoring for your work, eh?"  
"Just so. Think of the satisfaction of sending 'em a printed refusal slip."—Louisville Courier-Journal.

### No Mishap.

"That wealthy young broker has given his motor to a well known actress."  
"Yes. He says his father taught him to hit his wagon to a star."—Litt.

### A CHANGE OF HEADS.

The Trick a Ducky Ruler Wanted a Magician to Perform.

Thurston, the magician, had many interesting experiences during his professional tour of the globe several years ago. He went to all sorts of outlandish places and appeared before rulers of many strange lands and communities. On one occasion his manager had arranged that Thurston should give an exhibition before the ruler of a province called P'agopo, in the Fiji islands. In the crowd that saw the exhibition were many of the black and yellow slaves of the chieftain. All the spectators were amazed at the many strange manifestations of the black art that Thurston offered, but no trick appealed so strongly to the assembled retinue and to the chieftain as that in which a white duck was made to appear with a black head and a black duck, after a moment's manipulation, with the head of the white duck. The trick had to be repeated, and then the chieftain engaged in a long whispered conversation with the interpreter.

"What is desired?" queried the obliging trick player.

The interpreter coughed apologetically and then responded: "Respected sir, our honored sire wishes you to take two of his slaves and put a yellow head on a black man and the black head on the body of a yellow servitor. Our honored sire thinks it would be very funny."

"Tell his royal highness," Thurston replied, "that I could give a yellow man a black eye, but I would not like to attempt to make his entire head black."—Philadelphia Record.

### MONEY IN JUNK.

The Stuff is Always in Demand, and the Profits Are Large.

Up and down the dirty back alleys drives the junkman, singing his mournful, nasal cry, loading his rickety wagon with broken scraps and pieces of old iron, an object of pity or of ridicule to most of the uninformed public. Let him be admired or envied, rather, for if not he himself, at least his employer, is probably making more money than nine out of ten professional men. Few things are more depressing and unsightly than a little pile of junk as high as a two-story building. One may see such piles in every city, and so far as the casual observer can determine, none of the stuff is ever moved. The piles increase apparently from month to month and grow rustier and rustier, but the men in the business keep on buying.

How are they able to keep so much money tied up? Where do they get the large amount of capital which seems to be necessary?

They borrow from the banks, like any other business man, on the security of their stock in trade. "No better security," the president of almost any bank will declare. "It can neither burn nor blow away. It can't be damaged by water or smoke. Where is there a collateral like that? It is absolutely safe. The foundries and the nut and bolt works and the stove factories can't get along without it. It pays the largest profits of any business to which we lend money, and these profits fluctuate very little. Junk is always in demand. The men in that business are excellent customers."—Technical World Magazine.

### Almost Incapable.

Amid the late bargains in one of the large department stores the other day a shopper engrossed in thought set her little Japanese spaniel on the counter. One of the salesgirls, not seeing the little dog, threw a remnant of reduced lace over him and entirely submerged him. When the woman went to look for her pet he was not to be found, but several shrill yips, accompanied by an upheaval of the lace, betrayed his presence. He was quickly rescued from his predicament, and the woman, showering kisses upon his moist, upturned nose, said, "Did they cover mamma's precious with cheap fifty-cent lace?"

The salesgirl, who evidently had cultivated diplomacy, assured the dog's mistress that the lace had been reduced from \$1 to 50 cents, and the woman took her pet away mollified.—Philadelphia Record

### Feeted Them.

Every instructor at Chautauqua is required to fill out a paper answering a number of necessary and unnecessary questions. One year there was a remarkably handsome male member of the faculty in whom all the girl students were much interested. "Is he married or unmarried?" became an all absorbing question. Finally some of them had the courage to approach the college secretary and ask if the files might be looked over. And there the handsome professor, anticipating perhaps some such investigation, had recorded his matrimonial pretensions as follows: "Married or single? Yes."

### Queer.

Servant (who has been sent to chase a stray cat for stalking chickens)—"I couldn't—catch 'em—mum—for the nearer I—got to 'em—the farther 'e got away.—Funch.

### The Better Way.

First Boston Child—Do you believe in corporal punishment? Second Boston Child—No; I can usually make my parents do what I wish by moral suasion.—Litt.

### PURE, CLEAN MILK

After the 15th of the present month I will be prepared to furnish pure milk to the people of Klamath Falls. My cows are young, healthy and well fed, and the milk is handled in a cleanly and sanitary manner. Our aim shall be to give satisfaction. Telephone 823.

JAS. W. STRAW.

### PIONEER SOCIETY MEETING

At the courthouse Monday evening, November 8th, at 7:30 o'clock, the Pioneer Society of Klamath Basin will have a business meeting and program, followed by a banquet in Red Men's hall. All members of this society and all eligible to become members are invited.

Don't forget the date.

Get your carpets, rugs, curtains, etc., cleaned by Mongold's vacuum cleaner; rates reasonable.

### HOME REALTY CO.

Watch this Space for "REAL SNAPS"

THREE good government homesteads south of Merrill; 160 acres; all good tillable land. We can locate you.

\$300 Homestead Relinquishment; improvements worth more; partly cleared; good soil and well located.

\$25—A five-room furnished house; close in, and very well furnished.

### TIMBER CLAIMS HOMESTEADS

"THE RED FRONT"  
Office, Main St. Phone 811

NOTICE FOR PUBLICATION  
Department of the Interior, U. S. Land Office at Lakeview, Oregon, October 6, 1909.  
NOTICE is hereby given that James B. Humphrey, whose postoffice address is Klamath Falls, Oregon, did, on the 23d day of April, 1909, file in this office sworn statement and application, No. 01827, to purchase the 8 1/2 of NE 1/4, W 1/2 of SE 1/4 section 23, Township 37 South, Range 9 East, Willamette meridian, and the timber thereon, under the provisions of the act of June 3, 1878, and acts amendatory, known as the "Timber and Stone Law," at such value as might be fixed by appraisal, and had, pursuant to such application, the land and timber thereon have been appraised, June 14, 1909, the timber estimated at \$45,000 board feet at \$0.75 per M. and the land \$100.00; but said applicant must offer final proof in support of his application and sworn statement on the 8th day of December, 1909, before R. M. Richardson, United States Commissioner, at Klamath Falls, Oregon.  
Any person is at liberty to protest this purchase before entry, or initiate

a contest at any time before patent issues, by filing a corroborated affidavit in this office, alleging facts which would defeat the entry.

## Helping the Town . . .

By banking your money in a bank in your own community you increase the community's power to do business. If substantial farmers want to borrow money there is more to loan them. If you bank your money away from home it is loaned to other farmers, merchants and manufacturers. Help your home people. Money hidden at home helps no one. Placed in a bank it is put to work in ways that help all.

## The First National Bank of Klamath Falls

Is a good bank to put your money in—safe and reliable.

## A Savings Account . . .

In a rainy day fund, a life insurance policy, a sick benefit, a funeral benefit, and an old age pension. There is no fortune made in the bankbook, and it is under the owner's control at all times. It will tide him over sickness; it will care for his family when he must go; it will see him through old age, and bury him when he dies. It is a simple business proposition. Start early, and keep it up, and the money in the bank, it will supply him as he journeys.

## The First Trust and Savings Bank
