It is interesting to notice the varying changes in cartoons in the character of this stick. At first it was simply a long, round stick of uniform thickness. It later changed to the knotted club or bludgeon type, and now it is often seen with a spear protruding from the large end. This latter form was derived from Roosevelt's expression, "My spear knows no brother." A marked contrast is shown in Roosevelt's emblem and the "mallet stick" of Emperor William. William's symbol typifies power and force—nothing else. Roosevelt's "big stick," although formidable, means peace—but peace backed up by the "big stick."—Success.
