SEVENTH SALOON'S LICENSE GRANTED

WHITE PELICAN BAR

JAMES H. DRISCOLL GETS PERMIT WITHOUT POPULATION DISCUSSION AND WITH ONLY ONE VOTE ON COUNCIL

Last night the saloon license was granted to James H. Driscoll, an employe of the Klamath Development company.

The question of whether the council was acting within its rights either as to the legality of a seventh saloon or in rushing through the proposition with only half the members voting favorably on the proposition, was not brought up.

When the McDonald & Hunsaker saloon, the sixth in the city, got its license only a few weeks ago, the question of population was brought up, and when a document was offered purporting to show that the city had increased sufficiently in population since the granting of the fifth license the saloon was made possible, with no contention worth talking about.

Last night the matter of population was not openly discussed, but Driscoll had hurried and whispered consultations with Mayor Fred H. Sanderson and certain members of the council before the meeting, and seemed to get the fences fixed just right, judging by results.

That the company knew it would get the license, or, at least, felt positive of it, is shown by the fact that it has ordered fixtures and stock for its barroom, and expects to have all of that equipment in this city and in place about the last day of November.

The bar will be in a room on the northwest side of the Esplanade street entrance, and, it is said, will be one of the most elegantly fitted up three-alleying saloons in the state of Oregon.

W. P. Johnson and D. O. Williams are bondsmen for Driscoll as licensee, and the check for \$1,500 to pay for the license is drawn by W. P. Johnson, secretary of the Klamath Development company on the American Bank and Trust company, and payable to Driscoll.

G. Wilkins, who presented the license and recommended its grant; F. L. Fielder, B. S. Grigsby, A. M. Alford and Ben S. Owens. Councilmen G. W. White and Charles McGowan voted against the license being granted.

FISHED, NO LICENSE, PLEADS GUILTY, FINED

Justice of the Peace Charles Graves today fined J. A. Dare of the Ship-pington mill \$25 and costs when Dare pleaded guilty to taking fish from the Klamath River October 8th, without license, as charged by Deputy Game Warden C. O. Brown.

MASTEN DAMAGE FIXED BY COURT

THIRTY-FIVE DOLLARS AWARDED AGAINST CITY IN THE CASE WHICH WAS OUTCOME OF ATTEMPT TO DESTROY BARN

Judge Henry L. Benson of the circuit court, who is now sitting at Lakeview, has decided that W. W. Masten is entitled to \$35 damage as compensation for the injury done to his barn some weeks ago, when the late Police Chief Edward Townsend began to demolish the structure on the strength of an order of the city government to the effect that he abate or remove the nuisance.

Masten asked \$500 damage in his bill for injunction and monetary relief, but Attorney J. C. Rutenic argued for \$125. City Attorney E. L. Elliott contributed variety to the estimates of damage by considering \$10 or \$15 about right.

The decision ends what was a lively episode for a time. When the injunction suit was started City Attorney Elliott asked to have Masten's \$500 bond, given to indemnify the city's cost in case the city won, replaced as its surety was Mrs. Masten, who was claimed to be financially inadequate.

Stenographer R. M. Richardson were extended. But the city has another matter pending with Mr. Masten in court. It has asked for foreclosure of a chattel mortgage for \$1,200 on an engine that he purchased from the city, and which, it is alleged, is overdue and unpaid.

TIMBER MEN PROTEST A HIGHER ASSESSMENT

Representatives of all the big timber owners in the county called on the board of equalization this morning to enter a protest against the raise made this year.

The following representatives were present: J. W. Alexander and J. F. Karball of the Weyerhaeuser Timber company, which owns 166,500 acres of timber in the county; Alex McRae, Western Pacific Timber company, 42,000 acres; W. B. Sellers, Shevlin-Carpenter company and F. H. Hilson, 26,000 acres; F. W. Pinkerton, Oakkosh Land and Timber company; C. L. Gilham, Day Brothers & Gilham; Paul Johnson, A. C. Hopkins tract.

Alex McRae called the attention of the board to the fact that while the increase in the taxable property of the county was something over \$1,000,000, that this increase was wholly on the property of about eight of the large timber companies. In fact, Mr. McRae stated that the increase in the valuation of the timber lands was even greater than that on the entire property in the county.

After an explanation by the county assessor the board took the matter under advisement, and will give their decision later.

HOTEL STAFF IS GATHERING HERE

AIDES FOR MANAGER BROWER OF NEW WHITE PELICAN, GETTING READY FOR OPENING OF NEW HOSTELRY

J. E. Brower, manager of the new White Pelican Hotel, which it is expected to open with elaborate proceedings, including a banquet, has been joined here by his new chief clerk, E. H. Lousier; steward, C. A. Hoffman, and a brother of the last named, H. Hoffman, who will have charge of the engineering department of the new hostelry.

The Hoffman brothers are from the Palace and Fairmont hotels, San Francisco. About 100 guests are expected to come from Portland by a special train to attend the ceremonies and inaugural dinner, and invitations have already been extended. Mr. Brower has a number of pennants to advertise the hotel, and these will be placed in conspicuous places.

MEASURE WATER FLOW FOR POWER

TWO GAUGES PLACED IN KENO CANAL BY RECLAMATION SERVICE TO DETERMINE AMOUNT OF SERVICE RENDERED

Two gauges for measuring power of the flow of water have been placed in the government canal under orders of Project Engineer W. W. Patch, in order to ascertain the exact pressure which is being contributed to the Klamath Falls Light and water company's station. Some time ago the company had but a small wheel, capable of generating only about 500 horsepower in the 1,040 horsepower generator, and the 205 cubic feet of water flow per second, or about 5,200 minor inches, was not in danger of being exceeded.

PHILLIES TAKE THIRD OF SERIES

SCORE BETWEEN GIANTS AND MACK'S MEN STANDS TWO TO ONE IN FAVOR OF THE QUAKER CITY HALL TOWNERS

NEW YORK, Oct. 17.—Philadelphia's Athletics, pride of Connie Mack and all Quakerdom, took the third game of the world's championship series from the New York Giants in a hotly contested 11 inning game this afternoon, by a score of 3 to 2.

The windup of the game was played in a drizzling rain, which did not dampen the enthusiasm and interest of the fans in the least. There was an enormous crowd of baseball "bugs" on hand to witness the contest, which was lent special interest by the fact that the series when the game opened, was a tie, each team having won a game of the pair previously played.

On the other hand, if some of the dopesters are to be believed, the score stands now as even as it is possible to have it in three games, from a strictly statistical standpoint, and they argue that the Giants have fully as good a chance tomorrow as the men who follow the leadership of the redoubtable Cornelius McGillicuddy.

Batteries today were Matthewson

and Meyers, New Yorks star pair, and Coombs and Lapp for Philadelphia. The rest of the lineup was unchanged.

Score by Innings R.H.E. Athletics 00000000102-3 9 3 Giants 001000000001-2 3 6

CATTLE DIPPING THEIR SUBJECT

OFFICIAL VETERINARIANS VISIT CITY AND VICINITY TO EXPLAIN THE REAL MEANING OF RECENT ORDER

Dr. J. F. Morrell, state veterinarian, of Portland, and Dr. H. E. Pinkerton of the federal bureau of animal industry, with offices at Pendleton, are in the city today conferring with County Judge Worden relative to the quarantine which has been placed on the cattle of Lake and Klamath counties.

These gentlemen have just returned from a trip through Lake county, where they have been investigating the conditions among the cattle of that county. They expect to go to Klamath Agency today to look after the cattle on the reservation.

Realizing the effect that an order to dip all cattle in these counties would have on cattlemen who have always fed their cattle and procured their winter feed in this valley, Judge Worden took the matter up with the representatives of the state and government, and was assured that the order of Dr. Lytle was evidently misunderstood, as it was not the intention to force the feeders to dip their beef cattle unless they were infected with the scab.

HAVE GOOD TIME RESTORED THEM

WESTERN UNION ELECTRICALLY REGULATED CLOCKS WENT ON TOOT, AND MANAGER AUSTIN ON HUNT

Manager Austin of the Western Union has completed a hard chase. He was in need of time, or, at least, a lot of others were, so he took time to get time and get it right.

The Western Union has a couple of dozen or so of electrically regulated clocks from Washington used by its friends and patrons in this city, and all of a sudden the good work they had been doing in keeping their custodians on time for meals, as well as to pay debts, ceased.

Folks that had relied on the modern clocks did not know when it was time to eat, or whether they really owed money.

They called on the Western Union

AVAILABLE WATER FOUND BY EMMITT

and notified it of the conditions of things.

Manager Austin began the hunt. All the clocks are regulated by a uniform system and on one wire, and it was a long chase to locate the trouble, which was finally found to be at the old location of the First Trust and Savings bank, which, in moving out, had displaced the wire which connects the clock, thus grounding the current, which already had a regular "grounding" station elsewhere on the vine of chronometers. It took only a few minutes to repair what had taken hours to find.

The ladies of the Episcopal Guild will meet with Mrs. A. D. Miller on Friday afternoon at 2:30.

SOCIAL EVIL TO BE LOOKED INTO

WHEN WALKER IS TO BE APPOINTED CHIEF OF POLICE RESPONSIBILITY OF OFFICIALS IS NOTED BY COUNCILMAN WHITE

Patrolman Samuel L. Walker, who has been acting chief of police since the beginning of the illness which caused the death of the late chief, Edward Townsend, was appointed chief of police last night by Mayor Fred T. Sanderson, as indicated in the Herald some days since, would be done. The council ratified the appointment readily, Wilkins seconding the proposition.

"I don't believe that there is a man in this council but believes that it is being sold in these disorderly houses, and after he hour of midnight," said Grigsby.

"Just in this connection I wish to say that while I voted for the mayor's appointee for the chief of police, and would have voted for any other man the mayor had named who was proper to be put in the office, we still hold the mayor and his officers responsible for the enforcement of the law," declared Councilman G. W. White.

"These things are in his hands through his appointments, and he's responsible."

INSPECTION REPORT

BELIEVES SUN CREEK IDEAL ONE FROM PRINCIPAL ESSENTIAL POINTS, WITH ASPEN LAKE SPRINGS SECOND

R. A. Emmitt, who was engaged by Mayor Fred T. Sanderson to look over the situation with regard to availability of water supplies for this city a month or so ago, submitted last night to the council a report which was received without action on the conclusions of the investigator.

While Councilman F. L. Fielder was reported to have accompanied Emmitt, no mention of Fielder was made in the report. It was this occasion for which the city paid the mayor's warrant of \$211.50 at the meeting two weeks ago. The report follows:

Being employed by the mayor of Klamath Falls to make an investigation as to altitude and flow as well as quality of all the streams and springs adjacent to the city, with a view of securing a permanent water supply for domestic and other purposes for Klamath Falls, Oregon, I hereby submit this, my report:

In this report all altitudes are made and reckoned and estimated from a surface level of the water of Upper Klamath Lake. The water that supplies the city at the present time is 157 feet above the upper lake.

Barney Springs—Altitude 150 feet, pure, clear, cold water, flow about 1,000 gallons per day of 24 hours. Too low without pumping. Pipe can be laid in lake in almost direct line to the city; distance about 10 1/2 miles.

Utah Springs—Two miles east of Spring Creek on east side of Williamson River. Altitude 87 feet, too low without pumping, being 70 feet lower than present water tank. Clear water, little sulphur, all runs out of one hole. Flows into Williamson River about 5,000,000 gallons per day. Unappropriated; distance 34 miles. Pipe could be laid down the bank of Williamson River to Klamath Lake on good ground, free from rock.

Spring Creek—Clear, pure, cold water. Altitude 61 feet, or 94 feet below the present water supply; too low without pumping. Unappropriated. Flow about 224,000,000 gallons per day. Distance about 24 1/2 miles, with good ground free from rock to lay pipe almost direct line.

Warner Valley Land Troubles Being Wound Up And Development Is Near

Special to The Herald LAKEVIEW, Oct. 17.—Attorney General A. M. Crawford is here from Salem on business connected with the settlement of the Warner Valley land cases, that were closed by the interested parties after a legal battle extending over twenty-six years.

Warner is one of the most fertile sections of Lake county, with a climate different from any other portion of the county, as it is lower in elevation than most valleys, and has other characteristics that make it desirable, though the litigation that the early settlers went through has retarded its development for many years while the other portions of the county have been progressing right along. The Warner Valley Irrigating company's segregation covers something in the neighborhood of 150,000 acres, that will be watered from Honey Creek, Deep Creek, Twelve-Mile and other streams, will cost in the neighborhood of \$1,000,000, and start the work of development so long delayed.

the end of the costly litigation, or rather those that have been game enough to hold on to their lands, will receive their patents, and if they so desire may be able to sell their property at advantage. The final settling of the claims and other matters connected with the affair is the work that brings Mr. Crawford to the county at this time.

Humphreys Elected Director

At a meeting of the stockholders of the Odd Fellows Hall Association held last evening, George L. Humphreys was elected a stockholder and director to succeed the late Geo. R. Hurn. The directors of the association are: W. O. Smith, W. H. North, H. E. Momyer, R. W. Tower and Geo. L. Humphrey. Election of officers was postponed until a later meeting.

YOUNG MAN, with good references, desires position in any line for opening. Address A. R. Murray, general delivery. 17-21

Edmund Vance Cooke At The Opera House SATURDAY EVENING, OCTOBER 21 UNDER AUSPICES OF KLAMATH LYCEUM BUREAU Season Tickets on sale at the Star Drug Store. \$2.00 for five entertainments. Reservations can be made by holders of season tickets commencing tomorrow. Reserve your seats early and avoid the rush

Third Artesian Well With Three Flows Struck West Of Lakeview

Special to The Herald LAKEVIEW, Oct. 17.—For the third time within two weeks an artesian flow water has been struck on the Henry Lehman place, three miles west of town, by George Ede, the well driller, who started the drill on a basis of no water no pay. At 240 feet the first flow was found, then at 480 feet the well again began to flow, and again at 650 feet a third flow was found, showing that there are at least three strong flows of water in Goose Lake Valley.

The wells were all drilled on a hill and above the valley floor. Importance of artesian wells to almost any country are marked, but especially so here, where holdings in the valley are cut up into small tracts, many of them under the O. V. L. Co.'s large irrigation system that is being constructed, and others that are above the ditch, as in the case with the Lehman place. When water is turned on the land there is no doubt that it will support hundreds of people where there are few settlers at present. Many will go into the production of

fine fruit, others will produce grain, hay, vegetables, etc., and still others will have their little tea and nut and keep a cow, couple of pigs, and make a living from their poultry. These lands in the vicinity of where the artesian wells have been struck are now to be purchased at very reasonable prices.

There will, no doubt, be an impetus to the value of the land when the N.-C.-O. railway is completed in this point next month. This makes three widely separated artesian wells where water is flowing in Lake county, showing that every valley in the county offers the possibility. The Lehman well is warmer than that found in other valleys, and will be exceptionally fine for irrigation as well as stock purposes.

The Summer Lake wells struck in summer flow at a depth of from 100 to 650 feet, with an average of 224,000,000 gallons per day. Several different flows of water are to be found there also. The water in the county has flowing water at a depth of 35 feet, and is of good quality. It is some 300 feet above the level of the sea.
