

FOR SIGHT AT A DISTANCE
As well as for reading and other purposes, there is nothing so convenient as a pair of our double lens glasses. They are practically two pairs in one. If you have been using two pairs of glasses for distance and close seeing, and getting them mixed, as many do, get a pair of our double lenses and save both your time and your temper.

For your boy at this bank. It will take only \$1.00 to do it, and it may be the making of him. When he sees how much deposited in the bank makes more money in the shape of interest he will be very apt to save where he now spends—often foolishly. You can do no better service for your boy than to teach him the habit of saving.

Women Suffrage and Free Text Books

Up to a few years ago this was considered one of the most progressive states in the Union as far as legislation is concerned. Now, however, she is being outclassed by one after the other of her sister states. Colorado has had women suffrage for years. Idaho likewise. Washington extended the franchise to women about a year ago, and at the recent election in California with one fell swoop they passed the initiative and referendum, a further reaching and more effective recall of public officials than we have here, and the women suffrage. As you will all remember, the people of this state voted down that measure last spring. That, I think, was because there was a joker in the measure, which read, in substance: "No taxpayer, male or female, shall be denied the right to vote." I do not think that any honest woman will wish to vote as long as her less fortunate sisters are denied the same privilege. I hope we will have a chance to vote on a clean cut women suffrage measure, without any property qualifications, at the next election, and I will trust to the voters for the result. There is one more measure I would like to see brought before the people of this district; that is, free text books for the school children, and I hope some public-spirited citizen will circulate a petition so as to get it in shape to be voted on at the next election. The ever-climbing cost of living, as measured by the wages which the average worker receives, together with the uncertainty of steady employment, makes the additional burden of paying for textbooks double hard. Especially so if the family happens to be a large as our strenuous Teddy would like to see them. In many cases the cost of the school books has to be saved by cutting down on necessities—food and clothing. It is of vital interest to all taxpayers whether they have children of their own or not, to help make the life of our school children as care free and happy as possible, and if parents are relieved of paying for text books they could provide better for them in other ways.

The school board can get the books at wholesale, which is anywhere from 50 to 100 per cent less than what the parents now have to pay at the book stores.

I have seen that measure voted on in several localities, but never heard of an instance where it failed to pass. By all rights and reasons it should be made the functions of the state to print and distribute text books for all the schools in the state. That is being done now in Wyoming and Utah. Our own state will follow suit some day—but in the meantime, let us set a good example by providing free text books for our school children in Klamath Falls.
