## HORSEFLY WATER **PLAN PROGRESSES**

BONDS SURE AND HORTON DAM

Valley rancher, who is here today expected to have ready, and have from Bonanza, says that things are water running in the same by the 1st LA FOLLETTE HAS GONFALON looking rosy for the irrigation of of June next, at the latest. This up-

son of the Pacific district of the rec. 4,500 acres would be served. lamation service will come down soon and meet with the interested people and meet with the interested people and give them any data he may be ANGORA GOAT EXHIBIT TO able to to help with the project," said Mr. Shook. "We expect to frrigate 20,000 acres, and five get off at \$30 per acre we will be satisfied. but it is quite likely that we may not have to pay that high. The fact is that no survey will be needed, as the government has made surveys there of which we will be able to get the benefit. In fact, the district has been surveyed half a dozen times.

We expect the reservoir to cover about 100 acres and hold the water preeders will be encouraged to enter back at the point where there is now a fall of 1,000 feet. These 100 acres which are to be acquired will include the few acres which are the property of Louis Gerber, and it will be ar- the exhibits promise to be the best ranged to buy this land of him. We ever assembled in this state. are fortunate enough to have an arsurence of selling the bonds without be interested. any difficulty, in fact, some Sacramento capitalists or bankers have LYMAN BEHIND PRISON agreed to take half of these securities that detail having been arranged through Mr. Gerber.

It is not certain yet, of course, just what the cost will be of the enterprise, but it will probably run close to a third of a million, all told. The principal item will be the big dam to hold back the enormous tonnage of water which is to be conserved to irrigate 20,000 acres, which we count on watering. It is posishle that the cost of this dam will run around \$150,000, although the estiunter on this have not been officially made yet. The next step is to be to vote the bonds for the cost, and after we determine what the cost is to be this vote will be taken. The fact that no survey will be necessary will save us one item of cost which we thought we would have to pay.

We would like to get the work marted in the spring, possibly in March or April. The ditch will not need to be nearly as large as the government's big ditch, which is aimed t serve a much greater area than we espect to furnish water for. The ditch we will put in will probably be eighteen miles long, or thereabouts.

"Originally when the government region starting with the big \$250,000 dam which now holds back the water at Clear Lake, it was expected that we would be able to assure to the government the support of 85 per cent of the land concerned. As it was would happen.

"So we decided that it was better the prison dining room, partaking of
