TALK ABOUT LUMBER LASTING—

Why, it is about as durable as anything on this earth. Quoting from bulletin 100, issued by the Iowa State College in 1903—we find "a white pine homestead silo erected in 1894 was visited and found to be giving good service. It was apparently good for a number of years yet." Think of it, 18 years old—and used in a silo. In another instance we were shown a recent photo of an old English block house on San Juan Islands in Puget Sound, built in 1860, on which the red cedar shingles are apparently as good as when laid. But if you are hesitating about using wood for your home there are plenty of illustrations as to its durability right here at home. Houses built before you were born are still good. Don't be fooled about first costs—come in and see our lumber and talk it over.

SURVEYORS LEAVE TO FIX ARCTIC BOUNDARY

Will Kill Their Pack Animals When the Line is Completed to the Northern Ocean, as Cost Would Be Too Great to Return Them

SEATTLE, May 1.—A party of United States surveyors under Thos. Riggs, and a similar body of Canadians under J. D. Craig sailed Monday from Seattle and Vancouver, respectively, for Skagway, Alaska, where they will meet and proceed to the tundra-covered plain bordering the Arctic ocean, to mark the last thirty-five miles from the summit of Mount St. Elias to the Arctic ocean, the boundary line follows the 141st meridian of longitude.

All of this 600 miles has been marked with bronze posts four miles apart except the north 35 miles and the south 80 miles. The surveyors who will stake the southern 80 miles between Skolai Pass and the peak of Mount St. Elias sailed for Cordova March 17th. Their work will be on glaciers.

The engineers who sailed Monday will go by train from Skagway to White Horse, then walk on the Yukon to Lower Labarge, where the ice is expected to go out about May 10th. They will descend the Yukon on the first steamer to Dawson, and there transfer to a steamer which will convey them to Rampart House, the old Hudson Bay trading post on the Porcupine River. Then with horse pack-trains, the engineers will journey to their field of labor.

When the work is completed the fifty-five strong horses of the pack trains will be shot, for it would cost more than they are worth to bring them out; if turned loose they would starve, and the Eskimos could not use them.

USE GUNPOWDER FOR FERTILIZER

Uncle Sam Would Dispose of a Large Quantity of Brown Gunpowder Secured During the War With Spain at Bargain Prices

United Press Service
 WASHINGTON, May 1.—Many hundred years ago the advocates advised that swords be turned into pruning forks, but it has remained for Uncle Sam's ordnance department to hit upon the plan of using gunpowder for fertilizer.

During the war with Spain large quantities of brown gunpowder were purchased. The explosive is now of no value for military purposes, and for several years the ordnance department has been trying to find some method of getting back part of the money expended in this purchase. Small quantities of powder will be submerged until it is soft enough to spread over fields and experiments will be conducted to see if it really aids in the growth of crops. If it is a success, Uncle Sam will dispose of the gunpowder to farmers at a bargain price. If it fails, the powder will be taken out to sea and dumped overboard.

Great quantities of black powder, purchased in 1898, have been used for firing salutes and as ignition charges. But the brown powder is dead stock, experts say, unless it proves a success as a fertilizer.

TEMPERANCE LECTURER WILL SPEAK SUNDAY

Mrs. Jackson Silbaugh of Seattle, national organizer and lecturer of the W. C. T. U., is scheduled to give an address in Klamath Falls at the Methodist church Sunday evening on "The City's Welfare." Other meetings are to be held during the day, but arrangements are not fully completed as to place. A special invitation is being extended to the business men of the city to hear Mrs. Silbaugh, particularly her address on Sunday evening.

Mrs. Silbaugh is one of the best speakers sent out by the National W. C. T. U. She is the wife of a prominent Seattle lawyer, and her close association with her husband has given her a legal knowledge of the temperance question that is not equaled by any one of the speakers to be secured in Oregon. She was one of a dozen persons who secured by personal investigation the knowledge of conditions in Seattle, which finally resulted in the recall of Mayor Gill. Mrs. Silbaugh organized the women for the election, and was one of the election officers, thus giving her a special insight into that great struggle for civic righteousness.

Mrs. Silbaugh spoke at Merrill last Sunday, and on Tuesday she went to Bonanza, where meetings were held.

END OF ONE HUNDRED YEARS' PUNISHMENT

JOHANNESBURG, May 1.—The Twelfth Royal Lancers now stationed near here, are looking forward with much satisfaction to the end of the 100 years' punishment inflicted upon the regiment in 1812. In that year, during the war with Spain, the lancers broke into and desecrated a monastery. When the Duke of Wellington heard of the incident he decreed that for 100 years, as an expiation, the regimental band must parade every night at 10 o'clock and play five hymns, the Spanish national anthem, the Russian national anthem, the vesper hymn, the Prince of Wales hymn and the English national anthem.

Ever since the order has been faithfully carried out.

CHINA FIRST COUNTRY TO ADOPT SOCIALISM

This is the Prediction of Dr. Sun Yat Sen, the Instigator of Recent Chinese Revolution—Sees Bright Future for That Country

United Press Service
 SHANGHAI, China, May 1.—That China will be the first country in the world to adopt socialism, and that the complete pacification of the new republic is near, was declared today by Dr. Sun Yat Sen, the instigator of the recent Chinese revolution, and for years one of China's foremost progressives.

"My life's work was the revolution," declared Dr. Sun Yat Sen. "That is accomplished. China is going to be the first country to adopt socialism. Social reform is my life's work from now on. The people must first be enabled to live. Industrial development will have to lead. The railroads connecting the interior provinces with the ports and steamship lines are the initial requirements. All industrial enterprise will be started with private funds, and after a period of years will be turned over to the government. Laws will be framed in accordance with this plan.

"The revolution is complete. The country will soon be pacified. There is no reactionary movement. The disturbances are only sporadic, a few soldiers getting out of hand. The Chinese abroad are anxious to employ their wealth in home enterprises now that they may have the protection which the Manchú government never afforded.

A Clean Scalp And Healthy Hair

Many of your friends have found that a luxuriant growth of hair—soft and glossy—and a scalp free from dandruff, will result from the use of

NYAL'S HIRSU-TONE

This is the procedure—Wash the hair with warm water and a pure soap—rinse thoroughly—rub the scalp with a stiff brush—apply Hirsu-tone—rub it in well and dry the hair before combing.

Please understand that Hirsu-tone is not merely a hair wash—it is a tonic—a food.

While it thoroughly cleanses, it also prevents bacterial action—nourishes and stimulates the roots of the hair—removes all dandruff—prevents its return—and preserves the natural beauty and color of the hair.

Nyal's Hirsu-tone should be on your dressing table. It sells at 50 cents and \$1.00 the bottle.
