TALK ABOUT LUMBER LASTING--

Why, it is about as durable as anything on this earth. Quoting from bulletin 100, issued by the Iowa State College in 1904—we find "a white pine homestead silo erected in 1894 was visited and found to be giving good service. It was apparently good for a number of years yet." Think of it, 18 years old—and used in a silo. In another instance we were shown a recent photo of an old English block house on San Juan Islands in Puget Sound, built in 1860, on which the red cedar shingles are apparently as good as when laid. But if you are hesitating about using wood for your home there are plenty of illustrations as to its durability right here at home. Houses built before you were born are still good. Don't be fooled about first costs—come in and see our lumber and talk it over.

WAR FEAR LEVIES IMMENSE TOLL

Peace Day Taken Brings Out Some Startling Facts in Connection With Feeling Created in Rural Districts of Leading Countries

WASHINGTON, May 3.—The fear of war is consuming the homes of the rural and village populations of Germany, France, Great Britain and the United States in a single generation, according to a school bulletin on the school observance of Peace Day, which is soon to be issued for free distribution by the United States bureau of education.

In discussing the cost of war, the bulletin says in part: "War debt began with the nineteenth century. Not until the establishment of constitutional government had nations any credit in the world of finance. The bond of a king was notoriously bad security. Since 1800 the war debts of the nations have grown by leaps and bounds. That of Europe as a whole amounts to more than \$26,000,000,000, bearing interest at the rate of \$1,500,000,000 per year. All these "endless caravans of ciphers" represents sums which have never been paid, will never be paid, can never be paid, so long as the present system goes on. For practically the entire amount now raised by taxation in civilized nations go into the support of armies and navies. The United States, in splendid isolation from old entanglements, without an enemy in the world, bound by ties of blood and commerce to all civilized nations, spends 73 per cent of her income in this way. The civil, or non-military, expenditures of Europe are so small as to be negligible.

"At the present rate of expenditure the four countries of Germany, Great Britain, France and the United States will spend in the next forty years, the life of one generation, for support of armies and navies an amount sufficient to build 20,000,000 country and village houses at an average cost of \$2,500 each. With father, mother and four children in each of these houses they would furnish homes for 120,000,000 people, which is more than the total present population of these four countries living in villages and the open country. Thus the fear of war is consuming the homes of the rural and village population of these great nations in a single generation.

"It is estimated that the total direct cost of the armies and navies of the world each year in time of peace is \$2,500,000,000, which equals the total valuation of the wheat and corn crops of the whole of the United States."

WAR IN CONGRESS OVER SAN FRANCISCO MINT

California Congressmen Will Fight the Proposal to Cease Operations. Kent Says "San Francisco Mint is Absolute Necessity."

United Press Service
WASHINGTON, May 3.—War is on in congress as a result of the recommendation of the house committee of appropriations to discontinue coinage of money at the San Francisco mint, and its reduction to a mere assay office. "Coinage money is more extensively used in California than in any other state. The treasury officials have decided that it would not save money to abolish the San Francisco mint and then to pay freight on bullion from Denver."
