THE AMERICAN HIGH SCHOOL

AN INSTITUTION THAT IS ESSENTIALLY AMERICAN, AND MAINTAINED TO DO THE GREATEST GOOD TO GREATEST NUMBER

United Press Service

CHICAGO, July 9.—Speaking before the general assembly of the National Educational Association, now in session, Adelaide Stuel Baylor, assistant superintendent of public instruction of Indianapolis, Ind., said in part:

The fact of mortality in the early years of the high school is so well established that much statistical or other proof of this condition is unnecessary.

"In what year do you lose the most pupils from school?" is a question that elicits but one response from educators, i. e., "In the first year high school."

A number of effective administrative remedies have been applied, but mortality still exists to an alarming extent, and will continue to do so until a more thorough universal understanding of the high school as a part of our educational scheme prevails not only among educators, but among those outside of the profession as well.

It must be recognized as an institution that is essentially American, and therefore maintained to do the greatest good to the greatest numbers in a great republic; one whose curricula and plans of organization are sufficiently flexible to be adapted to community needs; an institution whose teachers must do more than simply equip themselves in scholarship to give to boys and girls who have had an elementary school education and insight into their own ability and needs with the power of initiative in thought and action; a part of our school system that deals with young people at a very critical period in their lives when the parental influence should be strongest and most effective instead of uncertain and frequently impotent; an institution that calls for careful, sane consideration of its special needs in relation to itself and its student life and not in relation to some other high school in some other land or some other community; a portion of an educational plan that must be dependent to a large extent for its best results, on the character of the instruction in the grades below it, and the influence of the institutions above it; and, finally, a part of a great social whole that will always be affected by the general principles that control the large unit, one of which is that change and new adjustments are essential to life.

It is said that the local Redmen have a Painful feeling, and all because of fireworks.

METHODIST CHILDREN ON ANNUAL PICNIC

About thirty members of the Junior League of the Methodist church are on a picnic today. They left about 8 o'clock this morning in busses for the picnic grounds across Link river, on the lake.

At the spot selected for the outing of the youngsters there is a natural grove.

IMPEACHMENT OF ARCHIBALD DEMANDED OF HOUSE

United Press Service
WASHINGTON, D. C., July 9.—The judiciary committee has formally demanded that the house impeach Judge Archibald for misbehavior, high crimes and misdemeanors.

In their statement it is claimed that Archibald prostituted his high office for personal profit. There are thirteen articles of impeachment in the resolution.

The committee's report, containing the full text of the impeachment articles, was read to the house.

Chairman Clayton asked that action be delayed.

NO SELECTION FOR REPUBLICAN CHAIRMAN

United Press Service
WASHINGTON, D. C., July 9.—The sub-committee of the republican national committee conferred with President Taft concerning the selection of a national chairman. No choice was made late last evening.

Temple theater, Matinee daily, 2:30 p. m. Evening, first performance, 7:15, continuons.

We have some very desirable 6th street property for sale—Stephens Hunter Realty Co.

IRRIGATED LANDS SUFFER NO DAMAGE FROM FROST

E. M. Chilcote made a trip yesterday through the irrigated district near Midland. He reports conditions favorable for a bountiful crop.

"There was no evidence of any damage by frost," said Mr. Chilcote. "The grain and potato crops are looking fine, but the alfalfa crop is a little short, probably on account of the late cold weather."

MIXING UP

By Joe Bush

He was a tall, ungainly, red-headed, freckley-faced, knock-kneed, cross-eyed youth, and the horns on the face of his palms indicated that he had never side-stepped real, hard, never-stop-a-minute-rain-or-shine work in all of the days of his life, and his personal appearance further indicated that he had always forgotten to send the correct measurement when he had ordered his clothes from Scarer-Roreback & Co.

"Gee, but I do get lonesome in this here town of Klamath Falls," he said.

"Why don't you take in one of the moving picture shows?"

"Now, do you know, I been intendin' to," was the reply, "but them gals that you got to buy tickets from always scares me out."

"Surely, they won't bother you. They're all nice girls. I know several of them myself."

"Well, you can't tell; and, besides, this is leap year, you know."

And speaking about moving picture shows, here is a puzzle:

Why does a chicken cross the road? Heard that, have you? Well, here's another:

A tired workman has just gone to bed. He is studying over his worn muscles while he consoles himself to sleep with the happy thought of the things he will accomplish Saturday night when he receives his pay.

Then he dreams.

A horrible monster, bellowing bel-lows and shouting shouts approaches him. There is a tangle of three thrashing machines fighting a duel with two automobiles and one motor boat.

A hat is thrown into the center of the ring.

A "houn' dawg" is kicked around. The third party movement is hurried into the bottomless pit.

Then he awakens.

And what do you think was the cause of this troubled sleep? Give it up?

Nothing in the world but that horrible, wheezy-voiced, callopie conducted by one of the moving picture shows.

It is said that the local Redmen have a Painful feeling, and all because of fireworks.

WARSHIPS FOR THIRTY MILES

GREATEST NAVAL REVIEW IN ENGLISH HISTORY HELD TODAY WITH PRACTICALLY ENTIRE FIGHTING STRENGTH

United Press Service
PORTSMOUTH, Eng., July 9.—The greatest naval review in English history is taking place today off Spit-head, where practically the entire fighting strength of the British fleet, including the four battleships recently withdrawn from their Malta base, is being inspected by members of parliament, preparatory to the summer maneuvers.

More than 200 warships of all type are moored in six lines stretching thirty miles, headed by the first battle squadron, with Admiral Sir George Callaghan on the Neptune in supreme command. The flags of fifteen other admirals are flying from their respective ships, the combined squadron carrying in all more than 40,000 officers and men. Conspicuous in the assemblage are the super-dread-nought Thunderer, the latest to be commissioned, and the Monarch and Orion, representing the new era of battleships, with 13 1/2-inch guns.
