## Easy to Get Relief From Indigestion

Your stomach should digest the food you eat, without the aid of any artificial digestives. If it won't do that, you are continually subject to dyspepsia, indigestion, heartburn, headache and constipation.  
Instead of taking digestive medicines, take steps to get your stomach and intestines again in a healthy, natural condition. Joyce's Food 7 cereals will do this for you if you will take it regularly. It is not a digester of foods, but it will remove your stomach and intestines so that they will attend to their natural functions, digesting what you eat and giving strength to the body.  
For more than eighty years thousands of men and women who had suffered the pains caused by dyspepsia and indigestion have been praising the Food 7 as the only remedy which brought them permanent relief. As the Food 7 acts directly upon the stomach and intestines, it is a natural appetizer and strength builder.  
Many forms of supposed indigestion are the result of the wrong use of Food 7. Joyce's Food 7 is a complete Food 7. It is not a digester of foods, but it will remove your stomach and intestines so that they will attend to their natural functions, digesting what you eat and giving strength to the body.

VALE MAN REFUSES TO TAKE ANAESTHETICS NO OPERATION IS PERFORMED WHILE THE PATIENT IS CONSCIOUS

PORTLAND, Oct. 29.—H. R. Dunlop, president of the Vale Trading company at Vale, Oregon, laid on the operating slab at the Good Samaritan hospital for an hour, and without more than a slight numb pain, watched a surgeon cut four inches into his vitals, relieve an abnormal condition, and then sew him up again.  
"It didn't hurt so much," said Mr. Dunlop, "but somehow or other it made me nervous. I didn't know whether I wanted to remain still or not."  
Mr. Dunlop was operated on for hernia, with which he has been afflicted since childhood. The operation was accomplished with the use of local anaesthesia only.  
The operation was performed by Dr. E. K. Scott, who followed the system being developed with considerable success by Dr. Bollin of Philadelphia. This is said to have been the first operation of the kind ever attempted in the Northwest, though local physicians are leaning to local anaesthetics for minor cases.  
Two middle abdominal incisions, each five inches long, were made in an oval shape.  
"Most of the pain came," said Mr. Dunlop, "after it was all over and the surgeon was sewing the wound together. The effect of the anaesthetic seemed to have worked off by that time, but it was far better than taking the chance of being put to sleep. The nurses were rushing around much as they do, I imagine, when the patient is under the influence of ether or chloroform, and it is necessary to make haste, but there was no hurry necessary, and I was able to watch the proceedings and talk 'all the time."  
Mr. Dunlop has a horror of the usual anaesthetics. He prevailed upon the surgeon to undertake the operation according to the more modern ideals of practice.
