

TWO WOMEN FIND HUSBAND IS ONE AND SAME MAN

HOMESTEADER NORTH OF CHILOQUIN SAID TO BE INVOLVED

Women Leave This City in Same Automobile and Do Not Discover That They Have Married Same Person Until Nearing His Home—One of the Women Finally Relinquishes Her Rights

A strange tale of a marital mix-up came to light here last night when an automobile which had been started out in the morning to convey two women to the scene where their husbands were living, returned with one of the women, and the information that one and the same man was the husband of both women.

Details of the story were extremely difficult to secure today. The chauffeur had been sworn to secrecy, and the woman who returned disappointed to the city had apparently made up her mind not to cause the man in the case any trouble.

It appears that on Monday evening the two women arrived in the city, one from the East and the other from California. They did not travel together, it is said, and only met by accident in a local garage, when they inquired for an automobile to take them to a place north of Chiloquin. As both of the women were going to the same place, it was arranged that they ride in the same machine.

It was only when they ascertained their destination that the purpose of their visit was divulged.

"I am here to join my husband," said one of the women.

"That's what I am here for," said the other.

Then a comparison of names brought the truth to light. It appears that the two women lost no time in meeting the much married man, and a conference was held.

There were tears and prayers, and finally the matter was arranged. One of the women agreed to relinquish her claim and return to this city. The other remained with the man.

It was reported this afternoon that the man in the case is a homesteader and very well known in this city. However, this could not be confirmed.

WEEKS' INQUEST IS POSTPONED

FAILURE OF INDIAN WITNESSES TO APPEAR RESULTS IN A SECOND CONTINUANCE BEING TAKEN BY THE CORONER

A second continuance has been taken in the coroner's inquest probing into the demise of John Weeks, a young Indian, who died Sunday at the hospital from pneumonia, supposed to have resulted from a severe beating he is believed to have received at the hands of fellow tribesmen. The inquest was today continued till 10 o'clock Saturday morning.

This step was taken this morning by Coroner Earl Whitlock, following the failure of several of the Indian witnesses to appear. Relatives of the deceased will assist in the summoning of witnesses, and all will be asked to be here Saturday.

There are no new developments in the case, although officers are working on every possible clue. It appears certain that Weeks was intoxicated Friday night, and that he engaged in a fight with other Indians, and was badly beaten. Drs. Chilton and Morrow, who attended him, and who performed the post mortem examination are positive that the attack of pneumonia that caused his death was due to the injuries he received and to exposure.

New Phones Ready to Be Installed in City

Equipment is the Latest Manufactured and Improvement in Phone Service to be Revolutionary

Distribution of the new central energy telephones around the city commenced this morning, and by the latter part of the week electricians will commence installing the instruments in the residence and business houses of the subscribers.

The new telephones is a smaller instrument than the one now in use, and the batteries, magnets and crank used on the present telephones are dispensed with. Instead of each telephone having its equipment for ringing, all this energy is at the central station, and to call central the subscriber merely takes down the receiver.

When the new system is installed there will be only four subscribers on a party line, two on each side, so that the subscribers will be summoned by either one or two rings.

Work of installing the new multiple switchboard and the equipment of the plant by S. Foley and his assistants is almost completed.

The switchboard has positions for five operators and will cover the business of the city until the number of subscribers is in excess of 10,000. When the new system goes into use the board will be ready to serve 20,000 party line subscribers.

The board is the latest type manufactured by the Western Electric company, being much in advance of the boards used in other central stations. It has all the latest features for handling quick service, and local subscribers will be saved about one-half time on every occasion they use the telephone.
