**Religious Isolation**  
Rev. J. S. Stubblefield, Pastor First Presbyterian Church

"Now the Lord had said unto Abram, get thee out of thy country, and from thy kindred, and from thy father's house... And I will make of thee a great nation... and in thee shall all families of the earth be blessed"—Genesis 12:1-3.

The history of religion is to a large extent a history of isolation; of the isolation of separate souls and of separate races. Isolation is a factor as essential in true religion as insulation is in electricity. This is a feature of our religion which today receives little consideration. We have gone to the other extreme. We have observed that the man who withdraws himself from the world is worth but little to the world, so we have denounced religious isolation. This spirit of the age is shown in the demand that many of our large churches make of their minister; that first of all he must be a good mixer. It is also shown in the great emphasis which is being placed upon practical religion. What we mean by practical religion today is not the religion that moves toward isolation but the religion that moves in the opposite direction. I believe thoroughly in practical religion but when everybody starts to run in one di-

ing to get ours. I am not capable of solving the reason for not getting them."

Mr. Day said that the Klamath lake bird reservation is the present hindrance to the giving of a title to the land. He is not at all in sympathy with the reserve, and thinks that he has ample reasons for not being. He believes that the reserve is a useless undertaking, and stated that the farmers whose lands bordered on it were not even allowed to shoot ducks on their own property, a thing rarely heard or thought of. He has practically given up hope of acquiring a title to his land.

**Girls May Box With Protectors Just App oved by Teachers**

**A HARD RIGHT HOOK TO THE STOMACH WHICH DIDN'T JAR THE VICTIM**

Guy Brewster is going down in history as the friend of every athletic young woman, every suffragette who insists she is man's physical and mental equal. He has shown them how to learn to box, and won the approval of former teachers who disapproved this exercise for young women. He has invented a mask for the head so beauty won't be marred by hard blows, and one for the chest and stomach, so there will be no danger from body punches.

Mr. Brewster is the physical instructor of public schools in Whar-ton, N. J. Long ago he was convinced that boxing, one of the finest of exercises for men, ought to be made possible for women. He constructed his masks, and has intro-duced them among the pupils. The result has been that the brothers are more careful in Whar-ton what they say to their sisters. Most sisters pack about right and left hooks and swings and a hard right uppercut.

To prove his success, Mr. Brewster got several of his pupils to give a demonstration before a meeting of the Physical Education society. The girls fought vigorously. They swung with right and left to body and jaw, and uppercut with all their vigor. Blows which taxed their strength fell harm-less on the wire protectors, and the victims only laughed and stung in for more. It was a revelation, and the teachers, those of them who were not incurably conservative, at once endorsed the Brewster plan. As a result, it may be introduced in many schools throughout the country.
