SCHOFIELD GIVES BEAUTIFUL FOUNTAIN TO THIS CITY

IS CAST ESPECIALLY FOR THE OCCASION

Manufacturer of the Artificial Stone Used in the Construction of the Court House Makes Generous Donation to the Cause of the "City Beautiful"—Fountain Accepted for the City by Mayor Nicholas

In the window of the Baldwin Hardware company's store is the beautiful Corinthian fountain, modeled, molded and cast by L. M. Schofield, and presented by him to the city of Klamath Falls. The formal offering of the fountain to the city, and its acknowledgment by Mayor Nicholas, occurred this forenoon in a brief correspondence between Mr. Schofield and the mayor.

This gift to the city is designed along the lines of Corinthian architecture, and consists of base, shaft, four brackets and a bowl, and is in the general form of an octagon. The base is a square with re-entrant angles, giving the impression of a symmetrical cross, the four arms of which stand out at right angles to the flat sides of the octagon shaft. In the four angles formed by the base and octagon shaft stand Corinthian brackets, which, with the shaft, support the bowl.

Provision is made through the shaft and bowl for water pipe and nozzle to produce the spray. The fountain is made of what is known as Schofield stone, the facing of which is made with fine white quartz sand and pure white Portland cement. The body is made with Shasta sand and gravel and ordinary Portland cement. These are mixed separately, then moistened with a solution of the basic salts of calcium and alumina, which contains a reagent, the purpose of which is to precipitate the double calcium-alumina silicate, which results in a stone of dense crystalline structure so closely resembling the best quality of natural stone that it is impossible to detect the difference. In one respect, however, it is a great improvement over natural stone, in that it is absolutely fire proof. This is due to the fact that its crystalline structure is not in large units, as is the case in natural granite, but formed in segregated units.

As an illustration, a large piece of glass cannot be heated at one point without shattering the whole, while the same glass, if broken into small pieces, can be heated in any manner without any of the small pieces being broken again by uneven expansion.

The following is the correspondence which completed the presentation and its acknowledgment by the mayor for the city:

Klamath Falls, Oct. 16, 1913.

Dear Sir—Since my residence in your city I have been so kindly received by the people of Klamath Falls and made to feel so thoroughly at home among you that it is my desire to leave with you some small speci-

LEAVE TO WORK AT ASPEN SITE

CITY OFFICIALS WILL INSTALL WIERS FOR MEASURING THE AMOUNT OF WATER AVAILABLE FOR CITY SUPPLY

City Engineer Jack McLean and Councilman Ben S. Owens and O. D. Matthews left this morning for the proposed municipal water supply in the vicinity of Aspen Lake, to start some development work. Councilman M. H. Doty left Wednesday with a wagon, hauling tools and a specially constructed wire dam. This will be installed by the party.

The lining of the city on the water source would be in danger of invalidation unless a certain amount of development work is done annually, to show the intention of the municipality to some day use the water supply. The work to be done by the party, in addition to providing a method for measuring the flow of water, also protects the city's flings.

men representing the class of work which I am executing for the new court house building, and which at the same time may prove, in the future, to be of some use and ornament to the city.

Furthermore, it so happens that the fountain which I propose to present to the city through yourself and the council represents in execution entirely the work of your local residents, which not only speaks for the class of workmen to be found here, but will also be a source of some civic pride in the future.

The fountain follows the Corinthian school of architecture, and was designed by Mr. Marcel Chovin, who is executing all of the modeled work on the new court house, and who, before coming here, did a large part of the preliminary modeling for the Art Building of the Panama-Pacific Exposition.

I propose, through the kindness of Judge George T. Baldwin, to erect this fountain in the show window of the Baldwin Hardware company's store for a time, with the purpose of so placing it that the residents of the city may have an opportunity, without inconvenience, to closely examine the class of work we are executing for the court house.

I shall consider it an honor to myself and a recognition of the value of the product which I am manufacturing if you and the council find it convenient to accept this gift, to be erected at any time and at any place you may select. Yours very truly,

L. M. SCHOFIELD.

Dear Sir—I beg to acknowledge receipt of your letter, presenting to the city, through myself and the council, the beautiful fountain. Permit me to thank you for your generous kindness, and I assure that your letter will be presented to the council at its next meeting, when undoubtedly official acknowledgment will be made by that body.

The beautiful fountain you have constructed will be a permanent ornament to the city, and reflects great credit on yourself and workmen. Yours very truly,

T. F. NICHOLAS, Mayor.

URGES THE WOMEN TO VOTE

Pioneer Worker Says, "Register"

Mrs. Duniway Would Thwart Parkinson Plans

By ABIGAIL SCOTT DUNIWAY

An Appeal to the Women Voters of Oregon:

The men of our magnificent young state of Oregon have granted you the ballot. It now behooves you to use it wisely.

I have before me an official copy of "Measures, With Arguments Respecting the Same, to be Submitted to the Electors of the State of Oregon, at the Special Election on Tuesday, November 4, 1913." In looking through the pamphlet, I discover your opportunity to prove yourselves worthy of the responsibility granted you by the votes of men at the general election of November, 1912.

To every one of you I appeal, in loving solicitude, expecting you to perform your duty as enfranchised citizens. Register yourselves as voters at once, if you have not already done so.

My reasons for this appeal are of

vital importance, and especial interest to every thinking man and woman within our borders.

Read the aforesaid "Measures," and you will see that one man has taken it upon himself to nullify the action of the last legislative assembly by the use of hired referendum petitions. His proposal to nullify these measures by the use of your ballots is a sinister attack upon the very life of our state university. I am told that his chief reliance for a majority for his reactionary piece of political freebooting rests upon the women of Oregon. It is alleged that it is through your votes that he expects to destroy the struggling state university, make its costly equipment valueless, and compel our children and our grandchildren to go for higher education to California, Washington, Montana, Idaho, Colorado and Wyom-

ing, where state universities are not in jeopardy.

The eyes of the intellectual and educational world are upon the women voters of the state of Oregon. Let it not be said of you that you were intrusted with an opportunity to do your duty, and that you did it not.

The time for registration is short, and the time for voting is near. On each of the measures attacked by H. J. Parkinson's two reactionary referendums, vote "YES," and sustain the appropriations.

By this patriotic action you will prove to all the public-spirited men and women of this world that you are worthy of the trust bequeathed to you by the chivalrous, liberty and justice loving men of Oregon, who are expecting you to do your duty as voters on the 4th day of November, 1913.

CAN SHIP GAME BY GETTING TAG

GAME WARDEN RECEIVED A SUPPLY OF TAGS WHICH MAKE THE SHIPMENT TO OTHER PLACES LEGAL

Any of the sportsmen who desire to ship game to their friends out of the city can now do so by procuring metal tags from Game Warden C. M. Ramsby. Mr. Ramsby has just received a supply of tags from the game and fish commission. These tags can be secured on the payment of five cents each.

The law provides that any game shipped outside of the state or to points within the state must be tagged. Application must be made to the game warden, who, if he is satisfied that the game was legally killed, will issue the party tags for five cents each.

In the shipment of ducks, each bird must be tagged. If a deer is shipped in quarters, each quarter must have a tag attached. In case, however, of the game being carried as baggage, the license tag attached is sufficient.

SULZER GUILTY ON FIRST OF CHARGES MADE BY ENEMIES

IS CHARGED WITH FILING FAIR STATEMENT

Galleries of the State House Are Packed to Their Capacity When the Final Vote Is Announced as in Order—Other Charges Are to Be Taken Up in Order by the Members of the Special Impeachment Panel

ALBANY, Oct. 16.—William Sulzer, governor of New York, was today found guilty of the first of the charges made against him in the impeachment articles.

By this, he is convicted of filing a false statement, regarding the expenses of his campaign, with the secretary of state.

This practically assures the second charge, that he committed perjury in this statement.

The other charges are to be taken up in order by the impeachment board.

The galleries of the assembly room were packed when Justice Cullen announced that the final vote was in order.

ARE PREPARING A CROP REPORT

RECLAMATION SERVICE OFFICIALS ARE WRITING FARMERS TO LEARN THE YIELD AND VALUE OF PRODUCTS

Work of preparing a report on the crop conditions this year under the Klamath project has been started by the reclamation service officials.

Blanks are to be sent to the farmers in a few days for the enumerating of experiences of the individual water users.

The inquiries being sent out contain also a blank report, drawn up for filling in by the farmer, tending to make the reports uniform. This contains places for information as to the number of acres dry and irrigated that were tilled, the products raised for market and for home consumption, their values and amount of the yields, values of buildings, tools, livestock, number of sales and purchases of stock, returns from dairying, bees, etc.

FALL OF HORSE INJURES BRAIN

YOUTH IN HOSPITAL IN CRITICAL CONDITION, FOLLOWING AN ACCIDENT AT KENO—RELATIVES ARE SUMMONED

(Herald Special Service) KENO, Oct. 16.—N. P. Spencer, a son of Tom Spencer, was injured by a fall with a horse at 10 o'clock Wednesday morning, and is in a critical condition, the fall causing concussion

FALL PROVES FATAL

Woman Dies Without Recovering Consciousness

(Herald Special Service) KENO, Oct. 16.—Following a fall a few days ago, Mrs. Cordelia Mills, mother of Mrs. Frank T. Nelson, died Wednesday morning at the Nelson ranch. Mrs. Mills was 81 years of age.

While walking in the second story of the house, Mrs. Mills slipped and fell down a flight of stairs. Her

CELERY PATCH IS SMALL MINT

TWO LOCAL MEN ARE REALIZING LARGE RETURNS ON A SMALL INVESTMENT OF CAPITAL AND MANUAL LABOR

What can be done on a couple of town lots has been shown by Messrs. Webber and Jensen, who are now marketing about 7,000 bunches of the finest celery ever shown in Klamath Falls. The celery was grown on portions of three lots in the city, and an exhibit made at the recent county fair easily took first prize, and was pronounced the best quality ever seen.

Webber & Jensen will realize about \$500 from the sale of this crop, and there has been a great demand for this celery, as it is so far superior to anything shipped in from the outside. Undoubtedly the growing of celery in Klamath county is destined to become a great industry.

of the brain. Dr. Merryman was summoned, and last night he removed Spencer to Klamath Falls.

It is believed that when the horse fell Spencer's head struck a rock. When the horse regained its feet and started, Spencer, unconscious, was dragged some distance, with one foot in a stirrup.

Although every effort has been made to revive the youth, Spencer, who was taken to the Hlackburn hospital last night, is still unconscious.

Fearing that he may not survive the concussion, word has been sent to the young man's relatives. His mother is expected this evening from Ashland.

shoulder bone was fractured, and she was injured otherwise to such an extent that she remained unconscious until her demise. The funeral services were held at the Nelson home this morning. The service was conducted by Rev. Richards, pastor of Grace W. E. church of Klamath Falls, and the ceremony was attended by a large number of friends of the bereaved family.

BAND DANCE IS TONIGHT'S BILL

BIG SALE OF TICKETS INDICATES A LARGE ATTENDANCE AT THE ENTERTAINMENT IN THE OPERA HOUSE

A record sale of tickets has been made by the members of the Klamath Falls Military band in the last few days, and a big crowd is expected at the dance to be given at Houston's opera house. The proceeds will go toward the maintenance of the organization.

Music will be furnished by the band, which is second to none in Southern Oregon when it comes to the harmony staff.

'MISSUS' BETTER --BOYS JOYOUS

ILLNESS TEACHES THE DOZING FELLOW THE TRUE MEANING OF "THERE IS NO GRUB LIKE HOME-COOKED"

Mrs. Emma Felt, after a few days of serious illness, is again recovered. This will be good news to all of her friends, but especially to half a dozen young fellows, whom she styles "her boys," who are in the habit of sitting down twice a day to meals prepared by Mrs. Felt.

"If the Missus ain't the best cook in the world, she ain't nawthin'," has long been the slogan of the lucky six, and this has been brought forcibly home to them during the days of sickness, when they were compelled to scout in other places for their provender. Their sorrow over her sickness has been terribly strong, being prompted both by the heart and by the stomach.

The atmosphere of this wee boarding house is one that is homelike, and the food is prepared in that "mother-used-to" style. This is taken as the reason why within the last few months four of the boarders have vowed to love, cherish, etc., as they have become thoroughly convinced that home cooking is the only truly perfect eater.

Benefit Dance of Klamath Falls Military Band, opera house, Thursday night. Music by the band.

An Open Letter to Taxpayers

By the County Court

Yesterday we talked about reducing grades and their effect on the cost of hauling. It must be remembered, however, that the cost of hauling farm produce to market is not so much increased by the presence of excessive grades as it is by bad condition of road surfaces. Almost every road is hard at certain seasons of the year. Too frequently, however, it happens that when it is most desired to use the roads, the surface is soft and the consequent tractive resistance is excessive and wasteful. Consider, for instance, our rains of the past week. It would have cost the farmers of this county much less to haul their crops to market just before the rain than it did just after the rain—or than it would if we had hard surfaced roads. The saving is probably not less than ten thousand dollars for the entire county.

This is probable and cannot be doubted, if you will stop to think about it. On a muddy earth road, a horse can pull about 800 pounds maximum load in an ordinary wagon over a level surface. On a smooth dry earth road, he can pull from 1000 to 2000 pounds; on a gravel road in bad condition, from 1000 to 1500 pounds; on a gravel road in good condition, about 3300 pounds; on a macadam road, from 2000 to 5000 pounds, and on a brick road from 5000 to 8000 pounds. These figures are conservative estimates made by the United States Office of Public Roads after careful experiments covering many years. They show that if the speed traveled is the same on all these road surfaces, a horse will haul on a good macadam road from three to five times as many tons per mile per day as upon a moderately muddy earth road. Or you can consider this matter in another way. Suppose that a horse is capable of a certain fixed duty per day. With a given load, his effective radius of travel from a given point on a macadam road will be increased from three to five times the radius of travel from that same point on a moderately muddy road. And you must remember that, in this country, even good earth roads are moderately muddy many months in the year.

Consider these figures for a few minutes and you will see that we are well within the facts when we say that the absence of macadam roads costs the farmers of Klamath County \$10,000 a year. In 1906 the Bureau of Statistics of the U. S. Department of Agriculture deduced an average cost per ton mile of 22.7 cents, based upon replies from inquiries sent to about

(Continued on page 4)

KAY NORTH BACK IN CAMP; UNHURT

LOCAL MAN REPORTED MISSING, SPENT A NIGHT AWAY FROM CAMP IN SEARCH FOR HIS HORSES

Friends of Kay North learned with relief last night that instead of being lost or injured, the local man was safe at Silver Camp. Word of his safe return was brought in by Ernest Bobb and Charles Withrow, who returned from a short hunting trip.

North and his father, Wm. North, before leaving here, stated that they would positively be back Monday, Friday night, on their way homeward from the Rogue River, they camped at Silver Camp, and during the night the horses strayed away.

North started after them the next morning, and he remained away from camp all night, taking up the quest for the horses the next morning, and returning with them to camp late that night. A party of local sportsmen learned before returning here that North had been away from camp all of one night, and after returning to Klamath Falls they became alarmed at the non-appearance of the Norths, and began to fear that some mishap may have occurred.

Yesterday morning Wm. P. Johnson and wife and Mrs. North left for Silver Camp. It has been learned that after finding the horses the Norths decided to remain there a few days more, in the hope of bagging a deer.

TWO MORE TAKE INSTRUCTING

FORMER KLAMATH COUNTY HIGH SCHOOL PUPILS, LEAVING UNIVERSITY, ARE EDUCATING FUTURE PRESIDENTS

Irwin Rolfe, formerly a student in the local schools, and later enrolled at the University of Oregon, is teaching school at Lancaster, Oregon, according to word received by his friends.

Miss Edith Buell, who formerly resided here and attended the Klamath Falls schools, is also engaged in instilling the proper knowledge and ideals into the new ideas. Following her work at the University of Oregon, she accepted a place in the Crewell schools this year.

SAYS HE'LL END LIFE

After Telling Worker, Bertholf Blows Off Head

While working in a field at the Bertholf ranch near Bonanza Wednesday afternoon, Fred Bertholf told Wallace Fairfield, with whom he was working, that he was going to kill himself. He left shortly afterwards for the barn, and placing the muzzle of a shotgun against his head he pulled the trigger with his toe.

The man's father and sister were away from home at the time, and it was not until their return that the body was found. The top of Bertholf's head had been blown off by the explosion.

Bertholf was about 33 years of age, unmarried. He has long been of a melancholy disposition, and has been noted by nearly all who knew him, and it was for this reason that Fairfield paid no particular attention to the remarks of Bertholf.

Coroner Earl Whitlock went to the scene of death Wednesday, to make investigations. He interviewed all who knew anything of the tragedy, and he was convinced that there was no necessity of an inquest.
