Brisk, Cold Weather We Are Having

# Nestle Snugly into One of Our Warmth-Without-Weight Overcoats

and Keep the Chills Out of Your System

We have gone in strong for Thoroughbred Overcoats this season. If saving is any object and you're keen for distinction in dress, our London Slip On Overcoats are waiting to show themselves.

If you are ready to purchase your new fall suit and think all clothes look alike, see our ready-for-duty garments at from \$15.00 to \$40.00.

Our suits last-handsome to look at--faultless in fit, and sturdy in service--because they are built by men who know how. See our showing before making your final decision.

Some time, some place some how, they may make clothes as good as ours

(Continued from page 1)

2800 county correspondents. The average haul was reported at only 9.4 miles.

Here are a few authenticated instances of the great saving in hauling costs, that result from hard surface roads. A farmer in Sullivan County, Tennessee, in 1908, hauled some barbed wire from Bristol to Kingsport, a distance of twenty-three miles. He found that with a two-horse team his maximum load was 500 pounds and that three days were necessary to make one round trip. To haul one ton, therefore, required twelve days and, at \$2 per day for man and team, the cost of \$24. Since that time Sullivan County has issued bonds for road improvement and a macadam road now runs from Bristol to Kingsport. The same team can now easily draw a ton to the load and make one round trip in two days at a total cost of \$6. The ton mile cost under the old conditions was \$1.36. This was reduced to 26 cents by the improved road.

There is a shell road built a mile

out of town from Crosby, Texas. A farmer four miles out came to town with a team of two mules and loaded on his wagon two tons of wire fence. When he reached the end of the shell road on his way home he was compelled to throw off 3000 pounds of wire. Then he hitched on two additional mules to haul the 1000 pounds the remaining three miles on the dirt road. He had to make three more trips for the remainder of the load. It took him from 10 o'clock one morning until 11 o'clock next morning to finish the job. If the shell road had extended to his farm, the original team of two mules could have hauled the two tons of wire in two and a half hours.

We could go on multiplying these instances and add instances nearby home, but it is not necessary. If you add wear and tear on harness and vehicles and the interest charges on extra horses, and the wear and tear on the horses, you have still more cost to lay to the road that is not hard surfaced, a cost that is unnecessary and wasteful and that can be eliminated.

Registration closes Monday.

**DR. HODGE WILL TALK ON FLIES**

TEACHERS' INSTITUTE IS IN FULL SWING—INTERESTING PROGRAM ARRANGED FOR THIS EVENING

State Superintendent Churchill, Dr. C. F. Hodge of the University of Oregon extension department, and other instructors who were delayed, reached here late Wednesday, and today the Klamath County Teachers' Institute is under their direction. The attendance is larger today than yesterday.

Last night an interesting evening was spent at the high school, where an informal reception was held. A vocal duet by Misses Parker and Anderson was warmly encoered, and musical numbers were rendered by Miss Saucerman. Mr. Bassett also gave some entertaining numbers.

Dr. Hodge will be the principal speaker at tonight's session at the high school, to which the public is invited. His theme will be "The Common Fly."

According to Dr. Hodge, there is

no reason for the people of any community shutting themselves behind doors and windows all summer, with the flies left to sport as they will in freedom. Oregon, Dr. Hodge declares, can be entirely freed of flies, and he plans to show the people of the state, through the school children, as well as their parents, how this can be done.

Dr. Hodge knows what he is talking about. He has cleaned up the flies in Worcester, Mass., and in Baltimore, Md., where he worked one summer on this campaign, he had the flies so completely exterminated that there were none left for laboratory work.

He directed a class in the summer school of the University of Oregon this summer in Eugene. The members of this class made the necessary surveys for determining the breeding places of the flies through the city.

The city council took action in cleaning these places up. The result was, when the state health inspector made his usual tour this fall, examining into the sanitary conditions of the various towns of the state, Eugene stood first as the cleanest from a sanitary point of view.

Bark From the East.

Mrs. Archie Alexander has returned from an extended visit among friends and relatives in Michigan and Ohio.

**Town Topics**

Delivering Overland.

W. T. Lee, president of the Oregon-California Auto company, drove a new Overland car to Fort Klamath today noon, and will devote the afternoon to teaching the new owner to drive it.

Out on the Ranch.

Miss Willie Leonard left this afternoon for the Adams ranch, where she will spend the week end, returning to Klamath Falls Sunday.

Snowed Out.

The snow in the Crater Lake reservation has caused the suspension of government work being done under the supervision of the government engineer, George Goodwin. Oscar Campbell, who has been at work there with his teams, returned home Wednesday, bringing with him twenty-one head of horses.

Operation Performed.

Dr. Hamilton and Morrow today performed an operation upon Miss Mae Young. They removed her appendix.

Official Visits.

H. G. Wilson, inspector of Indian reservations in Oregon, is here to attend to business matters. He came in last night from Roseburg.

On Electric Run.

Conductor Sam Wiley, who formerly ran the local out of this city, is now conductor of a train on the Northern Electric at Sacramento.

**EAT LESS MEAT IF BACK HURTS**

TAKE A GLASS OF SALTS TO FLUSH KIDNEYS IF BLADDER BOTHERS YOU—DRINK LOTS OF WATER

Eating meat regularly eventually produces kidney trouble in some form or other, says a well known authority, because the uric acid in meat excites the kidneys they become overworked; get sluggish; clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy, take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts cannot injure anyone, makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.

Pleasant for the Wife

Some time ago the wife of an assistant state officer gave a party to a lot of old maids of her town. She asked each one to bring a photo of the man who had tried to woo and wed her and had been jilted by her. Each of the old maids brought a photo, and they were all pictures of the same man, the hostess' husband.
