

JOHNSON IS OUT FOR ANOTHER TERM Heney Announces His Senatorial Candidacy

BULL MOOSE LEADER ANNOUNCES HIS DECISION IN AN INTERVIEW GIVEN TO THE NEWSPAPERS TODAY

HIRAM SAYS HE HAD HOPED TO RETIRE, BUT THE PEOPLE WON'T ALLOW IT

On Account of the Unanimous Clamor on the Part of the Progressive Element, Johnson Says He Finally Relinquished His Views and Accepted Theirs, Which He Will Uphold for the Benefit of the Golden State.

United Press Service
SACRAMENTO, Jan. 6.—Governor Hiram Johnson will be a candidate at the coming election to succeed himself. He announced this today.

Johnson made the following statement in connection with his announcement:

"I had hoped that at the expiration of my term of office I could resume my life where it left off in 1910, and with my boys resume the practice of my profession. The men and women who during the past three years placed California in the lead of progressive, humanitarian states, insist upon another candidacy, however. These people have earnestly asserted that the new movement so auspiciously commenced, and the

maintenance, fruition and perpetuation of the policies they inaugurated demand that I continue the fight.

"No one man in the nation or state is essential to a cause or policy, but there is such a unanimous demand from the men and women who made the good fight in California, who I know speak from the heart, that I relinquish my views and accept theirs.

"I have never held but one office. I had hoped not to run again. However, if it is true that with the commencement of a new era in the state under the present administration, there has come to me an obligation to continue my political activity, I forego my cherished views and yield to the others.

"I feel certain that I hold the best interests of California higher than the friendship and loyalty of many progressives and others who asked me to become a candidate for senator. I would prefer this, but if I must yield the hope of retirement, I feel I should be governed by the desire to forward the cause so dear to me, the maintenance and preservation of what has been done in the state.

"Accordingly, I will become a candidate for governor again, but in my candidacy, as in my previous candidacy, I state that during my administration, I shall not yield a particle of the independence I prize higher than any office. Neither shall I personally solicit a vote from any elector in the state."

State's Mining Better

Government Shows Increased Output Last Year

The mines of Oregon made a somewhat unexpected large increase in gold yield for 1913, compared with 1912. The mine report of 1913 showed a production of \$779,941 (a material increase over 1912), but the preliminary estimate for 1913 made by Charles G. Yale, of the United States geological survey, shows that the gold output nearly doubled in 1913, amounting to \$1,393,323, or \$623,381 more than in 1912. The mine output of silver in 1913 was 57,081 fine ounces, while the estimate for 1913 shows a yield of 218,949 ounces, an increase of 161,868 ounces. The copper output in 1913 according to mine returns was 260,429 pounds, the estimate for 1913 is 144,796 pounds, or 115,633 pounds less than in 1912. The mine report of 1912 showed a yield of 39,317 pounds of lead, but for 1913 the estimate is 96,743 pounds, an increase for the year of 57,426 pounds.

The most productive deep mine in the state is the Columbia, at Sumpter, Baker county. Other large deep mines are those of the Highland Development Company at Baker, the Commercial Mining Company at Rye Valley, Baker county, and the West Coast Mines Company at Champlin, Lane county. The average value of the ores treated in Oregon have been increasing materially in the last few years. A very large percentage of the gold produced from deep mines comes from Baker county, though Josephine county leads in output of placer gold. Very little of the Oregon ore is shipped to the smelters, most of it being worked in local mills at or near the mines.

While the hydraulic mines of Oregon are large producers and there are about 100 of them among the 160 producing placer mines, the increase of gold output for 1913 comes mainly from the deep mines, of which there are fifty or sixty producing in the state.

There are about 300 active quartz mills in the state, with a daily capacity of about 1,100 tons. It will be a matter of great encouragement to the miners of Oregon to know that so large an increase of gold yield is apparent for the year 1913, even if the increase does come from a few of the older mines and not from the new ones, and it may attract attention to the gold-mining industry of the state in which capital is needed for development and operation of mines and mills.

CITY DEMANDS REQUISITIONS

HEREAFTER, CLAIMS AGAINST MUNICIPALITY MUST BE ACCOMPANIED BY AUTHORITY FOR THE PURCHASE.

Good resolutions for 1914 were in evidence at last night's meeting of the city council, when the members resolved that hereafter no claim against the city will be paid unless it is accompanied by a requisition for the purchase, issued by some authorized official.

Mayor Nicholas called the attention of the council to the fact that the body was getting a little lax on this matter. By the requisition system, the city has direct check on everything purchased, and where it is used.

BANK OF CHINA TO SPREAD OUT

NEW REPUBLIC WILL OPEN A BRANCH IN ENGLAND, AND EXPECTS TO MAKE IT AS STRONG AS BRITON'S BANK.

United Press Service
PEKIN, Jan. 6.—It became known today that the establishment in London of a branch of the Bank of China is to be one of the missions of Chou Chin-tao, special envoy of the ministry of finance, with the rank of minister plenipotentiary, who leaves shortly for England, Europe and the United States.

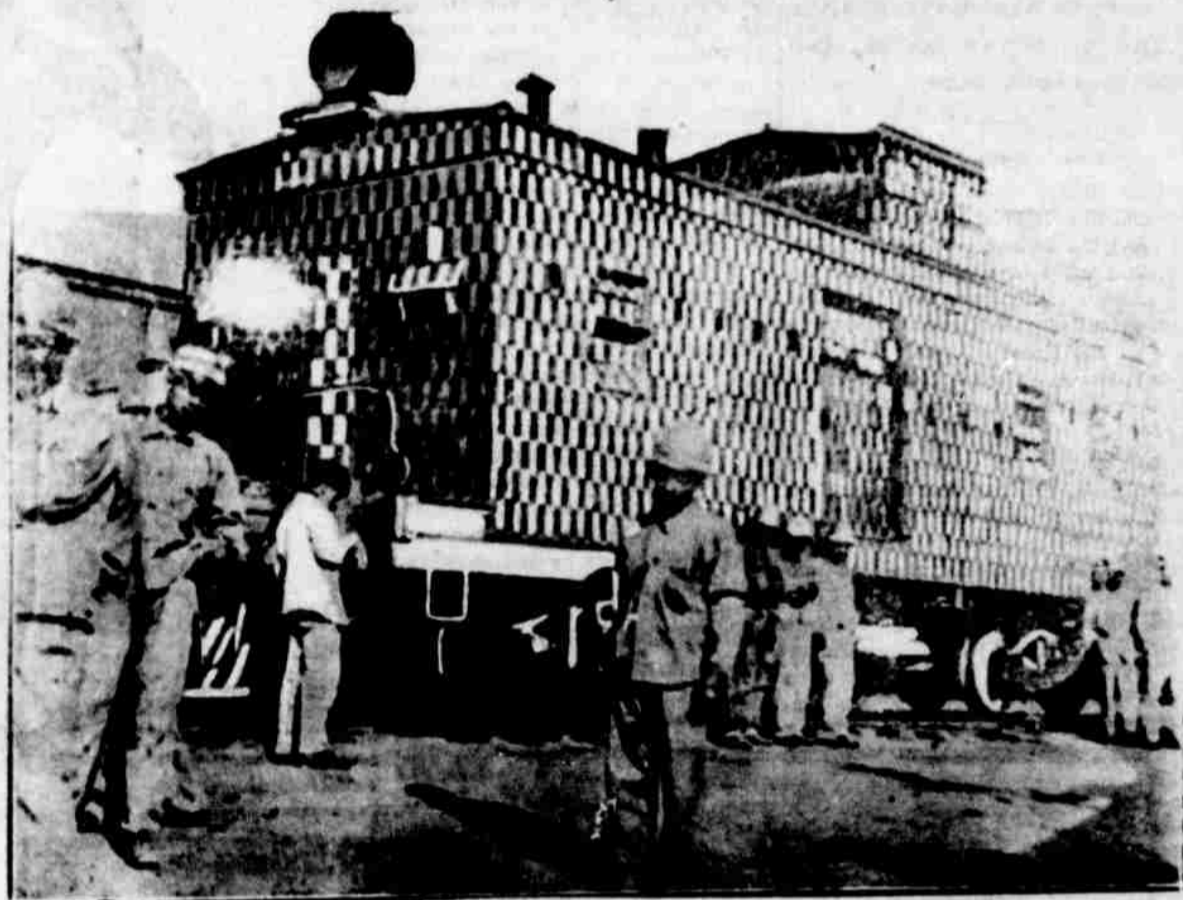

At the time of his recent appointment it was understood that Dr. Chen was going abroad to negotiate for a reorganization of the \$30,000,000 currency reorganization loan which the revolution of 1911 upset. Now it seems that this is to be but one of his many duties.

The Bank of China is an official institution, under the direction of the minister of finance, with branches in Shanghai and other leading cities throughout the republic. President Yuan Shih-Kai hopes to make it in time as influential to Asia as is the Bank of England in the British Isles and Europe.

The organization of a branch in New York City is also discussed, but no decision has been reached officially. This will be done sooner or later, but London will have the honor of receiving the first foreign branch of the Bank of China. It is understood that Dr. Chen will look into the New York situation while he is in America, and that the future date of the placing of a Manhattan department will depend upon his report after he returns to this city.

United Press Service
LINCOLN, Neb., Jan. 6.—Secretary of State William Jennings Bryan is due here today for his much heralded address before a monster commercial meeting in Lincoln. Soon after his address tonight Secretary Bryan will leave for Chicago, where he will address the real estate association there tomorrow evening.

Dictator Huerta's Battle Car

Dictator Huerta of Mexico has found a way to protect trains sent over railways from Mexico City when they are attacked by the rebels. His officers have invented a battle car which has a score or more holes for sharpshooters. This car sent ahead of the train can run up on the rebels, who may be tampering with the track, and it will be able to withstand assault by anything less than field guns.

The use of the car makes it possible for the federals to protect many more miles of their railways outside of Mexico City than they could otherwise.

ATTORNEY SAYS JOHNSON FAVORS RACE FOR TOGA

ANNOUNCEMENT FOLLOWS JOHNSON'S STATEMENT

Has Been Wanting to Come Out for This Place, But Has Held Back Until He Got a Straight Line Upon the Plans of Johnson—With Johnson's Announcement, Heney Comes Out With Positive Declaration.

United Press Service
SAN FRANCISCO, Jan. 6.—Francis J. Heney, special prosecutor for the

government in several big cases on the coast, and one of the state's strongest bull moosers, will be a candidate for United States senator.

He announced flatly today that he is in the race for the Perkins toga. Heney has sought the approval of the progressives for this place for some little time, but has withheld any statement, pending the decision of Hiram Johnson in the matter. With Johnson's candidacy for governor (Continued on page 4)

MILLS SEEKING RENT FOR JAIL

PUTS IN BILL FOR \$60 FOR SIX MONTHS' GROUND RENT—SAYS HE DOESN'T WANT TO BE HELD LIABLE FOR DAMAGE ACTION.

Among the bills presented at last night's meeting of the city council was one presented by Fred Mills for \$60. This was for six months' rent for the ground on Oak street occupied by the city jail. The bill was tabled. When the city negotiated with Mills for the purchase of a city hall site in 1911, the city bastle was moved to the site from the court house yard. Claiming that the boisterous conduct of prisoners made sleep an impossibility, Mills at that time offered the city the Oak street site—rent free—if the jail would be moved.

The prison was moved that summer. Mr. Mills says that since the city has purchased a site, he might be held liable in case of any damage action involving the city jail.

Leaves His Record.
United Press Service
LONDON, Jan. 6.—Dying at the age of 90, Elijah Linley, who for seventy years was parish clerk of Bulcote, Nottinghamshire, left the following record, which was filed as a part of his will today: dug 1,000 graves, officiated at 400 weddings and 1,500 baptisms, tolled the funeral knell for four British sovereigns, and rang chimes for 14,000 services, one bell with each hand and a third with his foot. He died in the same cottage in which he was born.

REGISTRATION IS OPEN FOR VOTERS

BOOKS WILL BE OPEN UNTIL JUST BEFORE THE MAY PRIMARIES—B. S. GRIGSBY IN THE FIRST OF THE BOOK

B. S. Grigsby was the first Klamath county elector to qualify for the May primaries and the November general election. He was the first to register at the clerk's office this morning. The books will remain open until shortly before the May primaries. All must register who would vote, as the recent "permanent" registration was declared invalid.

Taft Talks Temperance
Standing in a window ledge and held by friends so he would not fall while gesticulating, former President Taft delivered an address to an overflowing house at the Bedford branch of the Y. M. C. A. in Brooklyn. He told his hearers that he had "seen many good men go down to hell in the Philippines because they lacked the home training, and when they got a tired feeling they found a dash of Scotch reached the right spot."

England's Surplus of Women
Lord Northcliffe says that there are one million seven hundred thousand more women than men in the British Isles and it seems a pity that with all its territorial possessions Great Britain can not find places for the superfluous women. There are two million women employed in the factories of Great Britain and at least one hundred thousand working in their homes.

"American Commercial Expedition"

United Press Service SAO PAULO, Jan. 6.—The American "commercial expedition" arrived here today for a four days' visit. The American business men were very cordially received and were shown many courtesies by local manufacturers to whom they applied for permission to inspect the factories and establishments of the city.

Retains Her Own Name
Miss Fola La Follette is married to Mr. George Middleton, the playwright, and on the door of their home is his name and under it her own name, as she goes by that name in her work. It is quite the custom now for the professional or business woman to retain her maiden name after her marriage. Of course she drops the "Miss" part of it.

New Tack in Matter

Council Orders Physical Valuation of Ankeny Ditch

Something new in the Ankeny canal abatement was sprung at last night's meeting of the city council when O. D. Matthews, one of the committee named to negotiate toward closing this nuisance, moved that a physical valuation be placed on the ditch. City Engineer McLean was instructed to make this.

This valuation, according to the motion, is to include the canal from the headgates, and to take in the old East Side power plant and 5,000 minor inches of water. Matthews requested a private report on this by the engineer.

What this latest scheme for a municipal power plant is, is not known, but the apparent secrecy with which the report is to be submitted indicates that some one has some ideas. The procedure to be followed in securing a physical valuation of the California-Oregon Power company's plant was outlined at last night's meeting of the council. Matthews moved the naming of a committee of three to secure the grounds of complaint, but this was lost for want of a second.
