Although Ohio suffered from a number of untoward influences during 1913, the production of coal in that state was slightly in excess of the output in the preceding year, but it amounted to a little over 34,500,000 short tons.

MEAT INJURIOUS TO THE KIDNEYS

We are a nation of meat eaters and our blood is filled with uric acid, says a well known authority, who warns us to be constantly on guard against kidney trouble.

The kidneys do their utmost to free the blood of this irritating acid, but become weak from overwork; they get sluggish; the eliminative tissues clog and thus the waste is retained in the blood to poison the entire system.

When your kidneys ache and feel like lumps of lead, and you have stinging pains in the back or the urine is cloudy, full of sediment, or the bladder is irritable, obliging you to seek relief during the night; when you have severe headaches, nervous and dizzy spells, sleeplessness, acid stomach or rheumatism in bad weather, get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning and in a few days your kidneys will act fine. This famous salt is made of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate clogged kidneys, to neutralize the acids in urine so it no longer is a source of irritation, thus ending urinary and bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink, and nobody can make a mistake by taking a little occasionally to keep the kidneys clean and active.

What Oregon's Blue Sky Law Is

State Official Makes a Full Explanation Measure, Which Is One of the Most Radical in Any Statute, Is a Protection to Investors

By RALPH A. WATSON
(Written for the United Press)

Declaring that Oregon is today practically free from "wildcaters," unprincipled promoters, dishonest brokers and fakirs, Ralph A. Watson, state commissioner of corporations, explained the Blue Sky law reaches behind the company to the promoter, and beyond the promoter to the stock salesman and the stock broker, demanding of them honesty of intention and integrity of action. It is not the purpose, and it will not be the effect of this law to hamper, circumscribe or retard the progress or development of legitimate and honest corporate activity in this state. The law is the friend of the square corporation.

Oregon wants and needs the producing corporation to come in, to develop her resources, to market her products, to open her mines, to increase her workshops, her mills and factories.

Suppose John Doe wants to buy a farm and has no money. He knows where there are 100 acres of good land, worth 100 an acre. He wants to put it into crop and to carry it until its produce will begin to pay him back for his work and worry. The land will cost him \$10,000, the improvements and working capital \$10,000 more.

John Doe is entitled to borrow \$20,000 to buy and equip his farm. He would not be justified in borrowing \$30,000 or \$50,000 or \$100,000 on the deal. No one would be so optimistic as to hope to find any man, or set of men, who would loan \$30,000 on a \$20,000 proposition, certainly not \$100,000.

I fail to see, then, that if John Doe can not expect to borrow \$100,000 on a \$20,000 gamble, why the promoters of a corporation expect to borrow of a band of stockholders two or three times the value of the basic proposition he has to offer those who invest in his securities.

No corporation has the right to drown its stockholders with a saturated solution of stock certificates.

But what about speculative investment, the development of the patent-

ed article, of problematical value, the opening of the mine of unknown worth. All patents have to be promoted, all mines have to be developed. I do not believe the legislature has any right to legislate against honest and legitimate speculation. It is the God-given right of man to take a chance.

The mining game is a gambling game, with Luck for the dealer and Chance for the lookout. It is a good game if it is square, and a bad one if it is crooked. Any man has a right to play it, but he has a right to know when he sits in a game that the deal is honest, the cards not marked, and that he has a chance to win back the money he put in.

When the moral stockholder invests in mining stock he has the right to expect that his money will be used to develop the mine and not the horsepower of the president's automobile. An investor has the right to know where his money is going, what it is being spent for. He has the right to insist, when he buys stock under the representation, that the money is going to be used to sink a prospect shaft and that the shaft is sunk.

That is what the Blue Sky law is for. Its purpose is to see that the investor gets his money's worth. It means that no corporation can be formed in the future unless it has more assets than a stock book and a fountain pen.

The Blue Sky law does not mean that the state of Oregon has undertaken to become the guarantor of every security that passes the test of the corporation department. The law does not attempt to eliminate all business risk, and make every stock certificate as safe and staple as a treasury note.

It provides that every corporation, co-partnership, company, association or person who shall issue or negotiate securities, must show his proposition to be safe, sane and equitable, and to hold out promise of success with proper, honest and efficient management. It means that the people of Oregon will no longer be robbed of millions of dollars by the dishonest promoter, and the misrepresentations of the stock broker and the wildcatter whose manipulations have done more to stagnate legitimate development than any other thing.
