

EARLY ACTION SOUGHT ON TOLL MEASURE IN SENATE

SENATORS NEED SIX WEEKS FOR BILL'S PASSAGE

WILSON SEEKS EXPEDITION IN MATTER

According to those close to the administration, very little opposition and bitterness is expected when the canal tolls repeal act comes up for action—adjournment depends upon this measure.

United Press Service

WASHINGTON, D. C., April 1.—President Wilson today discussed with Senators Kern, James and others the question of expediting the passage of the Panama canal tolls repeal resolution in the senate. It is believed that it will be impossible to pass the measure in less than six weeks.

The administration senators are to try personally to induce the hastening of the measure, in order to bring about adjournment quicker.

It is admitted that certain senators hope to make 1916 political capital out of their debates. This is especially true of Borah of Idaho and La Follette, both having prepared long opposing speeches.

Wilson does not expect the senate to repeat the bitterness toward the administration shown by some of the house members. Chamberlain, O'Gorman, Vandaman and Walsh are the principal democrat senators opposed to the repeal of the clause.

STUDENT-MADE FURNISHINGS FOR STATE'S BUILDING

LOCAL HIGH-SCHOOL RECEIVES BLUEPRINTS

All of the Manual Training Departments of the State's High School Will Do Their Share Toward Constructing the Furniture to Be Used in the Oregon Building at the Fair in San Francisco.

This morning Principal W. E. Faught received the blueprints from State Superintendent of Schools J. A. Churchill for the five pieces of furniture to be made by the manual training department of the Klamath county high school for the Oregon building at the Panama exposition.

Some time ago letters were sent to the principals of all the high schools in the state, asking them to state the kind and amount of furniture each school's manual training department could make toward the furnishing of the Oregon building in 1915.

The replies assured the Oregon committee that an ample amount of acceptable articles could thus be secured for the Oregon building, so arrangements with the Panama exposition committee were made whereby the freight on the furniture would be paid by the exposition committee.

After the exposition closes the schools may have the furniture back or else the money if the articles are sold.

The Klamath county manual training department will make four chairs and a large table. They will be made in old mission style from Klamath county fir, and given an oak finish.

On each piece will be a brass plate stating the school and county from whence it came.

Nevertheless she did give him up. The English reporter who witnessed the scene said it was "most distressing," and Miss Wehlin was almost prostrated by the loss of Darling.
