SAGE TEA DARKENS
HAIR TO ANY SHADE

DON'T STAY GRAY! HERE'S AN
OLD-TIME RECIPE THAT ANY-
BODY CAN APPLY

The use of Sage and Sulphur for
restoring faded, gray hair to its nat-
ural color dates back to grandmoth-
er's time. She used it to keep her
hair beautifully dark, glossy and
abundant. Whenever her hair fell out
or took on that dull, faded or streak-
ed appearance, this simple mixture
was applied with wonderful effect.

But brewing at home is messy and
out of date. Nowadays, by asking at
any drug store for a 50 cent bottle of
"Wyeth's Sage and Sulphur Hair
Remedy," you will get this famous
old recipe, which can be depended
upon to restore natural color and
beauty to the hair, and is splendid for
dandruff, dry, feverish, itchy scalp
and falling hair.

A well known downtown druggist
says it darkens the hair so naturally
and evenly that nobody can tell it has
been applied. You simply dampen a
sponge or soft brush with it, and
draw this through your hair, taking
one strand at a time. By morning the
gray hair disappears, and after an-
other application or two, it becomes
beautifully dark, glossy, soft and
abundant.

Marine Corps Leader Is Also
Busy Man These Stirring Days

Although his name does not figure
strongly in the press dispatches, Gen-
eral George Barnett, commander of
the United States Marine corps, is
one of the most important figures in
the present trouble with Mexico. He
has entire command over all of Uncle
Sam's floating land forces, the sol-
diers whose main barracks are aboard
ships sailing the bounding main.
When the United States today saw
fit to land forces at Vera Cruz, the
seizure was made by Barnett's mar-
ines, who, quipped and drilled as
well as army regiments, are carried
on vessels for just such quick moves
as these, while the army is being
mobilized for sailing from Gulf ports.

Does Your Cow Get
Sufficient Water?

Water requirements of the dairy
cow are not always given the atten-
tion they ought to receive. Aside
from the large amount of water used
in milk production, cows will drink
about sixty to eighty gallons a day if
they are given that amount of fresh,
clean water.
Some of the world's record cows
have drunk as much as 270 gallons a
day.
Since milk has a large percentage
of water in it, large quantities of wa-
ter are required to produce the milk.
Not only that, but high milk pro-
