Give Pigs Lots of Green Food

Rotation of Crops Influences Irrigation

Expert Stationed in Idaho Writes Regarding Fixing the Amount of Water Needed. Other Items of Interest to the Farmer and Stockman

WASHINGTON, D. C., April 22.—Farmers and pig growers do not always appreciate the value of green feeds and succulent pastures for their animals.

Don H. Bark of Boise, in charge of investigations by the department of agriculture, relating to the duty of water, has written a statement which shows that rotation of crops and soil fertility has a great influence on fixing the amount of water needed for proper crop production.

"It has been long known," says Bark, "that a much greater yield of grain or potatoes and other crops could be made on fertile ground such as alfalfa sod than could be made upon raw arid soils that have never been fertilized in any way.

Experiments and practical farmers' experience prove that gains in weight are made at less cost on forage than on the dry lot. Breed sows can be carried through the season on pasture at less cost than when grain fields are entirely depended upon.

When animals so reared are put in the fattening pens their gains are unusually rapid and profitable. The green feeds are of much value to keep the pig's digestive organs in good condition and the appetite keen.

The American men and women must guard constantly against kidney trouble, because we eat too much and all our food is rich. Our blood is filled with uric acid which the kidneys strive to filter out.

When your kidneys feel like lumps of lead; your back hurts or the urine is cloudy, full of sediment or you are obliged to seek relief two or three times during the night; if you suffer with sick headache or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your pharmacist about four ounces of Jad Salts; take a tablespoon full in a glass of water before breakfast for a few days and your kidneys will then act fine.

Jad Salts is inexpensive; cannot injure, makes a delightful effervescent lithia water beverage, and belongs in every home, because nobody can make a mistake by having a good kidney flushing any time.

attention throughout the country, particularly in newer sections, where dairying has not been followed and where dairy stock is scarce.

In many cases the settlers are short of funds and cannot without assistance obtain the cows considered necessary for the profitable working of their farms.

Dairy cows of proven merit are obtained only at a high premium. The purchaser of dairy cows must bear in mind that a matured cow of proven merit is not for sale in any place in the United States for the average price which the settler in the new country can afford to pay.

Andrews is now writing operas. Former star, who produced "The Mikado," here for the elk, is just now exercising his creative genius.

Of Ed Andrews, who produced the Mikado for the Klamath Falls Elks in 1912, and who scored a triumph as "Koko," the Medford Mail prints the following:

"E. M. Andrews arrived last night from New York city, where he has been engaged for the past six months in writing grand and comic opera librettos. He informs us that he has finished a grand opera which is in the hands of the composer, Signor Florida, who is regarded as the most capable composer in this country.

The name of the opera is "Linda," and the plot is laid in Virginia in about 1812. Mr. Andrews has also contracted with Victor Herbert, Reginald De-Roven and Alfred Rovney, for light opera librettos. He has two unfinished librettos which he will complete in the next two months. Ed is a real Medfordite, and says our beautiful scenery, climate and surroundings are much more conducive to literary work than the noise and whirl of a great city."

The subjects of dairy stock and dairy farming are now receiving much attention.

How the Rebels Got Hold of the "Fleet"

This is the story of how the rebels secured their first gunboat, the Tampico. It's a short story, full of meaning when the why and wherefore of many happenings in Mexico are taken into consideration.

It began Christmas evening, in the port of Guaymas, where the Tampico had entered the harbor to give her crew an opportunity to celebrate. The officers gave a ball. The highest society folks in Guaymas went out onto the gunboat.

The champagne and the hours had a race to see which could fly the most rapidly. It was a neck and neck contest until 3 o'clock, by which time the society girls and matrons of Guaymas had become well acquainted with the Mexican sea-fighters of the Tampico.

Suddenly the lights went out on the gunboat. Who put them out no one knows. Why they were put out is another question that even Huerta himself has tried in vain to answer.

A tremendous clamor arose from the fathers and husbands on board. They demanded that the lights be turned on. They groped about in the pitch darkness, seeking their women folks and calling their names. Pandemonium not only reigned; it hailed.

There were twenty minutes of this limitation of a mad house. Then the lights went on again, and the society folks of Guaymas, maidens, matrons and men went ashore in various stages of ire and excitement.

Bright and early Christmas morning scores of telegrams were sent to Huerta by indignant Mexican men of Guaymas. To the credit of several of the officers of the Tampico they left the ship in indignation. The details of what happened during the dark twenty minutes of the Tampico have not been told for the simple reason that none of the officers of the Tampico would come to Mexico City to testify against their brother officers on the warship. Huerta was mad to the core. The remaining officers on the Tampico knew it. They heard of Huerta's threats. And the next thing Mexico knew, the Tampico, crew, officers and all, had gone over to the rebels, who gladly took them, the Tampico being the first warship the rebels had ever possessed.
