 hale and hearty at the age of 84. At
the time the war began he had a

painted a flag design, following which
came the details for the uniform. He
is still a resident of the South.

Forest Fires Rob the Soil
of It's Productive Quality

Shipping of Eggs, etc., by Parcel Post Proves a Success. Food
Packages Must Tell the Truth. Other Items

United Press Service

WASHINGTON, June 3.—Warn-
ings to farmers against burning off
woodlands, or "logged off" lands, are
being sent broadcast by the depart-
ment of agriculture. It is stated that
after careful and widespread experi-
ments by the forest service, it is now
demonstrated that in burning off
destroyed.

The fires rob the soil of this crop-
producing element, it is asserted.
Where fire has not entered, a large
amount of vegetable matter, pro-
viding considerable fertility, and
good soil texture is retained.

"How to Fight Dandelions" is the
topic of a government booklet just
issued, coming to the rescue of the
spring lawn mower brigade. Three
remedies are suggested by the bureau
of plant industry of the department
of agriculture.

One remedy suggested is to thicken
the stand of grass, so as to crowd
out Mr. Dandelion. If this doesn't
work, cut out the dandelion tops and
sprinkle salt on the exposed roots.
Then if the weed does not succumb,
the only sure remedy is to spade up
the ground and start afresh.

Spraying dandelions with iron sul-
phide is disapproved. The iron kills
the grass as well as the dandelions.
Cutting off the tops only aggravates
the plant, it is said, unless the roots
are poisoned. After cutting, the
roots grow deeper, thicker and
hardier. Spring is the time to choke

off the dandelion crop. In some
countries, dandelions are a valuable
truck crop, the department declares.

"Housewives, stop using salticylic
acid in your preserves," says a warn-
ing from the department of agricul-
ture. Because of the alarming in-
crease in the use of this acid the de-
partment sent out an urgent warn-
ing.

"It is true," says the department,
"that these powders may prevent the
decay of fruit or vegetables, but they
also encourage uncleanly or careless
work, and their excessive use may
be attended with very serious results."

"Salticylic acid is a medicine and
it is well known as a poisonous
substance, and one of the evils which
may accompany its use is derange-
ment of the digestion. It is therefore
plain that its excessive use in food
may lead to disturbances of diges-
tion and health."

The shipping of eggs, hams, little-
neck clams and maple syrup by par-
cel post is a success. Records re-
ceived daily by the department of ag-
riculture and the United States post-
office show that farmers in the Eastern
states especially are shipping
farm products to hundreds of patrons
in nearby cities. Centered about
Washington alone there are 174 farm-
ers who are selling by parcel post.
One of them living in Quimby, Va.,
offered little-neck clams in 100 lots,
and sold to 900 employees of the local
postoffice the first day.

The plan for shipping are simple.
Any customer desiring goods from a
farmer mails him a basket and a let-
ter ordering the goods, the farmer
fills the order, hands the basket to
the postman, and the goods are de-
livered. Albert G. Drane, one parcel
post patron, has been purchasing
eggs for nine months by parcel post.
He orders four dozen at a time. Dur-
ing the nine months he used the same
corrugated pasteboard box, and only
one egg was broken, and that was
when the box finally wore out.

Three departments of the federal
government have just ruled that all
packages of food must tell the truth
on their wrappers, of the amount or
volume of their contents. By signing
the "net weight law" the secretaries
of agriculture, commerce and treas-
ury have put into effect stringent reg-
ulations respecting the packing and
labeling of food stuffs.

The regulations require that the

quantity stated on the container must
represent the actual quantity of food
exclusive of wrappings and container.
Under this requirement it would not
be enough enough to state that a
package of candy contained twenty-
four cream peppermints, as candies
vary in size, and this would not be
a statement of the actual quantity in
the package. In general solids must
be stated in terms of weight and
liquids in terms of volume.

The new rule is so worded, too,
that queer shaped bottles must not
show discrepancies greater than those
of standard square or round bottles
of the same capacity. Packages
weighing two ounces or bottles con-
taining less than one fluid ounce are
exempt from the regulations.

All of the six sons of John and
Mary Wheatland of South Vroden,
England, are in the royal navy. Their
ages range from 16 to 37 years.

Cola nuts, which have been export-
ed from the gold coast of Africa to
the value of about \$450,000 annually
for several years, advanced in 1912
to \$650,000 worth. Exports from
Southern Nigeria increased to nearly
the same extent.
