Stimulants Help the Lawns Slow to Grow

(Herald Special Service)

WASHINGTON, D. C., June 25.—In the late spring, about a month after active grass growth has commenced on the lawn, it is desirable to apply a grass stimulant to keep the lawn in first class condition. Nitrate of soda is a good fertilizer, and will make the grass grow thickly, with a rich, dark green color that will show itself promptly after the application. The landscape gardener of the United States department of agriculture advises that those who use nitrate of soda should apply it at the rate of 50 pounds per acre once a month during the summer, beginning about the middle of May in the latitude of Washington, D. C.

The nitrate of soda should be applied just before a rain or a sprinkling with the hose. Under ordinary conditions it will keep the lawn a vivid green during the period when the vitality of the plant is low. The application of this fertilizer combined with careful watering (described in a previous article) will prevent the parched appearance of the lawn during the hot dry summer season.

When nitrate is applied during any dry period it should be used carefully. It can, however, be applied at any time if the nitrate of soda is powdered up fine before using, but it is safest to dissolve it in water. Because of a generally prevailing fear that this fertilizer may ruin a lawn if used carelessly, the department has been experimenting to see just how much nitrate of soda would have to be used in order to kill grass. These experiments seem to show that nitrate of soda can be used fairly extensively without causing injury, for attempts to kill grass with it were unsuccessful

except when such large quantities as 400 pounds to the acre were used.

Although fertilization is a splendid thing for the upkeep of a lawn, it will never entirely make up for a lawn soil that was poorly prepared in the beginning. It is only when a lawn soil is properly prepared in the first place and enriched with stable manure, lime and bone phosphate that a lawn may be maintained in the best condition.

Unrotted stable manure should be kept away from a lawn at all times, the opinion of many to the contrary notwithstanding. Stable manure contains weed seeds, and particularly after the early growth of grass these weed seeds will be encouraged to sprout, for at this time the grass is weakened by its spring growth and the weeds have additional impetus to spread. A weed has been defined as a "plant out of place." Weeds are certainly out of place on a well kept lawn. Fertilizing materials have a great advantage over stable manure, as they contain no weed seeds.

There are other fertilizers besides nitrate of soda that are most valuable for the lawn, but their use is more especially adapted to the fall. Later the department will issue advice regarding the application of such materials as ground bone, phosphate rock, potash, dried blood, fish scrap and sterilized sheep manure. The dissolved rock in particular should not be used in the spring.

Over 3,000,000 women are employed in other than household occupations.

There are approximately 4,000,000 acres of timber land in New Hampshire, of which half is in farmers' wood lots.

GRAND JURY TO HAVE BUSY WEEK

SUBPOENAS FOR ALL PARTS OF
THE COUNTY ARE PLACED IN
THE HANDS OF SHERIFF FOR
SERVICE

If the renewed session of the Klamath county grand jury, which goes into sequestration again Monday, is not busy, it will not be on account of any inactivity on the part of District Attorney Irwin. He has issued a big bunch of subpoenas, and placed them with Sheriff Low for service.

Fort Klamath, Merrill, Keno, Mt. Lakli, Dairy and many other localities will be visited during the next few days in the service of these papers.

TEN LABORITES NOW AT PRISON

CLANCY WILL REACH THERE TOMORROW—OTHERS HAD THEIR SENTENCES COMMUTED BY THE PRESIDENT

KANSAS CITY, June 25.—Ten of the labor leaders convicted of dynamite conspiracy charges, officers and agents of the International Structural Steel and Iron Workers Union, passed through here on their way to Fort Leavenworth today, to begin serving their sentences. Clancy reaches here tomorrow.

There were twenty-nine originally convicted, but the sentences of a number were commuted by President Wilson. New trials were granted others, including Oloaf Tvetmoe of San Francisco, by the federal appellate courts.

Rebel General Is Dead From Wounds

General Rodriguez

ZACATECAS, June 25.—General Trinidad Rodriguez, leader of Villa's cavalry, died this afternoon as the result of wounds received in the taking this city from the federal forces. Rodriguez was shot while leading the third charge up the hill against the

federal forces. In these charges he distinguished himself for his bravery, and it was because he took no pains to look to his own safety from the federal fire that he was picked off by a sharpshooter.

RODEO PARADE TO HAVE BIG ENTRY

ACCORDING TO E. B. HALL, PRAC-
TICALLY EVERY BUSINESS
HOUSE IN TOWN WILL HAVE A
FLOAT

The Rodeo opening parade, on the morning of July 2, will not be a procession of cowboys, Indians, prairie schooners and other Western features exclusively. There will also be floats by Klamath Falls business houses and a prize has been offered for the best decorated.

E. B. Hall of the Rodeo committee has been interviewing the merchants regarding this parade. He reports that all are enthusiastic, and that practically all will have floats entered.

The Klamath Falls and Weed bands and local lodges and other organizations will also participate in the procession.

Harvard Law Expert Speaks

United Press Service

BURLINGTON, Iowa, June 25.—Lawyers from all over Iowa are here today attending the annual meeting of the Iowa Bar Association, particularly anxious to hear Professor Roscoe Pound of Harvard, writer of notable articles upon "socialization of the law." Although not a radical reformer, he is a leader of thought, anxious to wipe out the growing criticism of law and lawyers.

The program this year was pre-

Company Says Wagon Damaged Its Engine

NEWARK, N. J., June 25.—As the result of a recent collision at Bloomfield, N. J., between a team driven by F. Wilkinson of this city, and an Erie railroad locomotive, the road today sued Wilkinson for \$100 damages, because "divers slats" of the cow-catcher of the locomotive were broken, the

paint on the locomotive was bruised and the track was strewn with litter. This unusual suit is an answer and counter claim to an action for \$25,000 damages brought by Wilkinson, who claims he suffered a broken hip, three fractured ribs and other injuries. The road asserts the collision was due to Wilkinson's carelessness.

SUMMONS.

In the Circuit Court of the State of Oregon for Klamath county, Joseph H. Seeds, plaintiff,

vs.
Alice Seeds, defendant.
To Alice Seeds, the above named defendant:

In the name of the State of Oregon: You are hereby required to appear and answer the complaint filed against you in the above entitled suit, on or before the 6th day of July, 1914, that being the last day of time within which the defendant is allowed to answer herein as fixed by the order of the court for publication of summons herein; and if you fail so to

appear and answer, the plaintiff will apply to the court for the relief prayed for in the complaint filed herein, to-wit: for a decree of said circuit court of the State of Oregon, for the county of Klamath, forever dissolving the bonds of matrimony existing between the plaintiff and defendant, and for such other relief as to the court shall appear just and equitable.

This summons is published in the Semi-Weekly Herald, a semi-weekly newspaper published at Klamath Falls, Oregon, by order of the Honorable Henry L. Benson, Judge of said Circuit Court, dated the 21st day of May, 1914, directing that such summons be so published once a week for six successive weeks. Date of first publication, May 25, 1914.

C. C. BROWER,
Attorney for plaintiff.

WHITE BREAD Sponge Method

Try the following recipe prepared by Professor Joseph Becker, the world's greatest chef. Professor Becker made a careful test of CRATER LAKE Flour for us and we guarantee results if his directions for its use are followed:

One cake Fleischmann's yeast, 1½ quarts lukewarm water, 2 tablespoonfuls lard or butter, 1 tablespoon salt, 4½ quarts sifted Crater Lake flour, 2 tablespoonfuls sugar. Dissolve the yeast and sugar in one quart of the lukewarm water, and add to it 1½ quarts of sifted Crater Lake flour, or sufficient to make an ordinary sponge. Beat well. Cover and set aside to rise for about 1½ hours in a warm place. When well risen add to it the pint of lukewarm water, lard or butter, the remainder of the flour, or enough to make a moderately firm dough, and lastly, the salt. Knead thoroughly, place in greased bowl. Cover and let rise for from 1½ to 2 hours. When light, mould into loaves and place in well greased baking pans, cover and let rise again for about an hour. When light, bake 40 to 50 minutes, reducing the heat of the oven after first 10 minutes. This recipe makes four large loaves. The whole process takes from 5½ to 6 hours, and if followed closely, will produce excellent results.

"CRATER LAKE BRAND"

Be Fair

A month or two ago considerable unfavorable comment was made concerning the so called "strength of the electricity" being delivered in the city of Klamath Falls.

The Council invested in a voltmeter and put it on the lighting circuit.

There has been a conspicuous absence of any report of the findings of this instrument.

We think it might be interesting to the customers of electricity to know what the Council found.

They found that the instrument has not shown a registration of less than 110 volts.

Do you know that the Rules and Regulations of the Railroad Commission allows a variation of 5 per cent below this figure?
