

# Be Careful With the Milk; Contamination Is Easy Now

## U. S. Department of Agriculture Outlines Some Plans for Keeping the Milk Sweet During Hot Weather

(Herald Special Service)  
WASHINGTON, D. C., June 28.—During the hot weather milk is particularly susceptible to contamination, and for that reason the United States department of agriculture is issuing a timely warning to housewives: Beware of Unclean Milk!

When milk is delivered it should be put into the refrigerator at once. A very brief exposure to summer heat makes it unfit for use. If it is impossible to have the bottles put immediately into the refrigerator, provide on the porch a box containing a lump of ice.

In planning a house, arrange to have the refrigerator set in the wall with an opening on the outside. It is always possible to provide locks for these boxes or refrigerator doors, and supply the milkman with a key.

The interior of the food compartment should be wiped every day with a clean cloth, and thoroughly scalded as often as once a week.

Under no circumstances should the drain pipe of an ice box be connected with a sewer.

Before removing the cap from a bottle of milk the cap and neck of the

bottle should be washed and carefully wiped with a clean cloth. The cap should not be pushed down into the milk. It may be easily removed with a sharp pointed instrument without injuring the contents.

The bottle, when once open, should be kept covered, and the milk should be used up.

The original cap should not be replaced, but instead an inverted glass may be put over the top of the bottle. The bottle, when not in use, should, of course, always be left in the refrigerator, and any milk that has been poured from it into another vessel should not be poured back.

Onions and other foods having a strong odor, especially during the hot weather, very easily impart their distinctive smell to milk that is left uncovered. This is an additional reason for always keeping milk in a covered receptacle.

Milk bottles should never be taken into a sick room, for as they are usually returned to the milkman, they may thus carry infectious diseases into other homes. Every milk bottle left at a house where there is an in-

fectious sickness should be boiled before being returned. The best thing to do in such circumstances is to provide one's own milk bottles or covered dishes into which the milkman may pour the milk from his bottles. The duty of each individual to his neighbor in this connection is most important. In any case, bottles should be given reasonable care before they are returned to their owner. The practice of pouring vinegar or kerosene, or other liquids into them temporarily when not in use should by all means be discouraged.

The containers should be washed in cold water first and finally in warm water before they are returned to the farmer supplying the milk.

These little details of cleanliness are matters which cannot be regulated by the federal or state government. Rules and regulations that require pure milk to be delivered to the home may be rendered valueless by careless individuals in the home.

The best efforts of the milkman or farmer to deliver first class milk will amount to nothing unless individual housewives will co-operate for the good of the community.

## View in Park of Zacatecas Captured by Villa

Zacatecas is the first of the gateways to Mexico City. The defeat for the federals there means Villa will march on. He will have to take one or two more towns on the way, but Huerta's army is so demoralized that the hardest of the fighting is over.

The Mexicans do not believe there will be an important battle just outside of Mexico City.

Some of the most stubborn battles in Mexico's history have been fought at La Bufa's natural fortress. During the war of intervention the

French stormed the hill, and Benito Juarez barely escaped capture. The following day Juarez's forces, led by General Miguel Miramón, stormed the rocky heights and recaptured the position from the French and their imperialist Mexican allies.

of Klamath Falls, Oregon, having ascertained and determined the proportionate share for which each lot, part of lot, block and acreage property shall be liable for the improvement of Eighth street, from Main to High street, High street from Eighth to Ninth street, Ninth street from High to Prospect street, Prospect street from Ninth to Upham street, Upham street from Prospect to White avenue, White avenue from Upham to Delta street, and having on the 5th day of June, 1914, filed in the office of the Police Judge of said city a statement thereof, which said statement is known and designated as the "PROPOSED ASSESSMENT ROLL" for said improvement.

NOTICE IS HEREBY GIVEN, that said Common Council did by resolution six Monday, the 29th day of June, 1914—said date being a date upon which a regular meeting of said council will be held—as the time for hearing and determining all objections to such assessment, and having heard and determined such objections, if any there be, said Common Council will on said date proceed to assess the proportionate share and part of the cost of such improvement in accordance with the benefit accrued upon each lot, part of lot, block or acreage property. Each and every owner of property liable for the cost of such improvement is hereby referred to such assessment roll on file in the office of the Police Judge for detailed information.

The boundaries within which the property lies that is benefited and is to be assessed for the cost of said improvement, is all that property lying adjacent to the said streets as far as improved, and extending back from the side lines of said streets to the centers of the respective blocks lying adjacent to said streets so far as improved.

Witness my hand and the seal of said city this 16th day of June, 1914.  
A. L. LEAVITT,  
Police Judge of said City.

## Ask Peculiar Questions of Accident Board

United Press Service  
SAN FRANCISCO, June 29.—California's industrial accident board has been called on lately to answer several peculiar questions in connection with the comparatively new workmen's compensation law. Some of them, with their answers, were as follows:

Q.—Is the common law wife of a workman, killed at his work, entitled to compensation? A.—No, because the board does not wish to encourage illicit relations between the sexes, but his illegitimate child is.

Q.—Is lead poisoning an industrial

accident? A.—No, it is an occupational disease.

Q.—Is compensation due to the relatives of a man killed defending his employer's store against a marauding Mexican band from across the border? A.—Yes; that is an industrial accident.

Q.—Should a man suffering from a dislocated shoulder due to what was admittedly an industrial accident, receive additional compensation because his convalescence was retarded by the breaking of a pitcher on his head in a fight he engaged in? A.—No; of course not.

That the population of Oregon is increasing very rapidly is indicated by the fact that an unusual number of communities have found it necessary to erect new school buildings to relieve congestion.

The campaign for a two-mill limit on state taxes will be made by the taxpayers in the Willamette Valley.

Ireland's first strike took place in Dublin about 100 years ago, when the great piers of Kingstown harbor were being constructed.

Pasteboard boxes with a sanitary insect proof opening have been invented for containing sugar and other food products similar in form.

Engineers are working on a \$350,000 foothills ditch to irrigate 8,000 acres near Medford, to be completed by 1915.

## NO MORE FUNDS TO BUY SCALPS

COUNTY CLERK IS INFORMED THAT THE STATE'S FUND FOR BOUNTY ON PREDATORY ANIMALS IS GONE

According to a letter received this morning by County Clerk De Lap from Secretary of State Olcott, the state's fund for bounty on predatory animals is exhausted. De Lap was ordered not to send any more bounty claims to the state until the legislature makes another appropriation.

Heretofore, the state has paid half and the county half of the bounty claims on coyotes, bobcats, timber wolves, etc.

Cove, in Union county, will hold a cherry fair on July 16th. A Norwegian family, the Stacklands, has led in building up a great cherry industry at an altitude of 3,000 feet in the foothills of the Blue Mountains. At this high altitude cherries, while not so large or luscious as some raised on lower levels, have remarkable keeping qualities, and the output will be disposed of in carload lots in the Eastern markets.

The manufacture of logan berry juice and sawdust briquets are new industries being considered in various parts of the state.

Gorham's sterling silver is the best. You can buy it any place in the U. S. A. and have any pattern matched at any time, which is an advantage.

## HOW "TIZ" HELPS SORE, TIRED FEET

Good-bye sore feet, burning feet, swollen feet, sweaty feet, smelly feet, tired feet.

Good-bye corns, callouses, bunions and raw spots. No more shoe tightness, no more limping with pain or drawing up your face in agony. "TIZ" is magical, acts right off. "TIZ" draws out all the poisonous exudations which puff up the feet. Use "TIZ" and forget your foot misery. Ah! how comfortable your feet feel. Get a 25 cent box of "TIZ" now at any druggist or department store. Don't suffer. Have good feet, glad feet, feet that never swell, never hurt, never get tired. A year's foot comfort guaranteed or money refunded.

## GLASS OF SALTS CLEANS KIDNEYS

IF YOUR BACK IS ACHING OR BLADDER BOTHERS, DRINK LOTS OF WATER AND EAT LESS MEAT.

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean, by flushing them with a mild, harmless salt which removes the waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days, and your kidneys will act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia.

## A TEST

In order to stimulate trade in my repair department and also to test the efficiency of the Herald as an advertising medium, I will for the next thirty days accept the coupon below toward payment on repair work.

Let me prove to you that my repair department is unequalled for quick service and superior workmanship. I am a graduate of the Peoria School of Watchmaking, and have had seventeen years of actual experience.
