Ninth Year—No. 2,488 KLAMATH FALLS, OREGON, THURSDAY, OCTOBER 1, 1914 Price, Five Cents

## SIX MILLION MEN IN EASTERN CAMPAIGN

United Press Service  
 VIENNA, (via Rome), Oct. 1.—Four great battles and two bombardments of forts are in progress in the Eastern theater today, with six million men engaged.

At no point has the campaign reached a decisive stage.

General Hindenburg, with a million Russian troops of the first line, is preventing all efforts on the part of Baron Hindenberg to break through along the Aisne.

A second German army is engaging 500,000 Russians in the pine forests near Augustow. These forests are filled with small lakes.

The Germans there are working to protect the flank and rear of Hindenburg's army from the impending attack from the Russian central army. This consists of a million fresh troops.

The central Russian army was recently mobilized in Russian Poland. Grand Duke Nicholas is in command.

The plan of this army, it is believed, is an advance on the German force entrenched along the Russian border. The advance guard is already in contact with the Germans.

In the meanwhile, nearly 1,500,000 other Russian troops in Galicia are moving in parallel lines. Their objective is the enveloping of Przemyel and Tarnow, now under siege.

The German and Austrian troops in the Eastern campaign do not exceed 2,000,000. The Russians have twice that number in the field.

The Russians have arrived at the outlying forts of Cracow, and have commenced the attack on the Austrians and Germans, who are well entrenched and equipped.

## Germans Charging in the Battle of Aisne

This photograph shows a furious German charge in the battle that has raged in France of nearly two weeks—the battle of the Aisne, which is now believed to be a more important engagement than the battle of the Marne, in which the Germans were driven back from their march on Paris. The Germans, as has been told many times, go in such close formation that the foe shoots them down in piles. When they win it is because of overwhelming walls of men for whom there were not bullets enough.

## CHAUTAQUA MAY BE SECURED FOR KLAMATH FALLS

LOCAL BUSINESS MEN SUPPORT THE MOVE

Agreement is Being Circulated, and the Signers Pledge Themselves to Pay 50 One-Fiftieth of the Deficit, Should There Be Any—Baron Arranges a Six Day Program, of Lectures, Music and Classes.

From the interest the business men of Klamath Falls are taking in the proposition, it looks today as though this city, with others making intellectual progress, will have an annual Chautauqua assembly. With one exception, every business man approached today has pledged himself to support such an institution.

Jay B. Hurd, representing the Ellison-White Chautauqua System, accompanied by Elder S. D. Harlan of the Christian church, this afternoon began a canvass of the business men, to secure fifty signatures to a pledge, each of the signers of which agree to shoulder one-fiftieth of any deficit there might be in expense of a Chautauqua assembly here during the summer. Early in the afternoon over twenty signatures had been secured.

The Ellison-White system conducts Chautauqua in sixty Western cities. In Oregon the following communities are listed with them: Roseburg, Eugene, Salem, Dallas, Medford, Baker and Pendleton. Boise, Idaho, Spokane and Wenatchee, Wash.; Fresno, Calif., and Butte, Montana, Helena and Great Falls, Mont., are other cities listed.

The assembly is a six-day program, consisting of high class music and lectures. The assembly is afternoon and evening, with training classes in the forenoon. There is an entire change of entertainment talent every two days.

Quarantine Put Into Effect

United Press Service  
 WASHINGTON, D. C., Oct. 1.—A quarantine for bovine tuberculosis against all cattle in five northwestern Illinois counties: Cook, Lake, McHenry, Kane and DuPage—was put into effect today by the bureau of animal industry of the department of agriculture. No cattle can be shipped from these counties for any or breeding purposes unless found free from tuberculosis by tuberculin tests. Private veterinarian inspection is abolished.

Home From Hospital

Mrs. Will Houston, who recently underwent an operation at Blackburn hospital, has left that institution. She is recovering splendidly, as her many friends will be pleased to learn.

## DISTRICTS GET SCHOOL MONEYS

APPROXIMATELY \$50,000 IN DISTRIBUTION AMONG THE DISTRICTS—ANOTHER SMALL APPOINTMENT LATER

Work of apportioning and distributing school funds to the various county districts was completed today by County School Superintendent Fred Peterson. Approximately \$50,000 was distributed.

Each district receives \$100 under this apportionment, and \$5 for each teacher employed. For each pupil enrolled each district receives an additional \$20.

Another smaller apportionment will be made January 1.

## Pelican Bay Building Plans Are Announced

The following account of the plans of the Pelican Bay Lumber company for the rebuilding of the plant destroyed by fire, was given the Herald today in an interview by H. D. Mortenson, president of the company.

"We have begun the erection of a new two band mill, which is to be considerably larger than the one which was burned, and like the old mill, will be complete in every detail. The main building is to be 62 feet by 174 feet, and three stories high. An annex 26 feet by 62 feet, and two stories high, will contain the lath and wood department. Another annex 26 feet by 72 feet will contain the engine department. A third annex, one story high and 84 feet by 120 feet, will contain the lumber sorting department.

"The first story in the main building will contain the shafting, pulleys and belting, which furnishes the motive power to drive the machinery on the second story, where the manufacturing machines will be located. The third floor will contain the saw filing department, which will again be in charge of Mr. Hibbert. The mill will be equipped as follows:

"The log slide which takes the logs from the water will be operated as before, except that as they enter the mill a steam drag saw will buck the logs to the desired length. When the logs are in the mill three arm steam kickers will throw the logs on to the deck chains, these deck chains will transfer the logs to either the right hand or the left hand carriage. Both hand mills will be six-foot mills. The left hand mill is the large side. The carriage on this side will have a 66-inch opening, three blocks and a Trout power set works. The log deck in front of this carriage is equipped with three arm steam deck stops and a Simonsen log turner. The right hand mill is the small side, the carriage having a 46-inch opening, three blocks and Trout power set works. The deck in front of this carriage is equipped with three arm deck stops and a Hill type nigger.

"Back of each band mill is a chain of live rolls, conveying the lumber to the edger or direct to the trimmer table. The edger is to be a heavy 78-inch edger of the stub lever type. Automatic transfers convey the lumber from the live rolls to the edger table. The slab slasher is to be a five saw slasher, and the trimmer will be a twelve saw, overhead type. The refuse from the mill will be burned in a steel-encased, brick-lined burner, 33 feet in diameter and 100 feet high. The engine which drives the saw mill will be a 650-horsepower Corliss. There are four boilers belonging to the old mill which were not damaged by the fire, and to these will be added two more, totaling 900 boiler horsepower. The building for this department is 52 feet by 72 feet, and is to be built of stone, a contract for same having been let to Mr. J. S. Elliott. A planing mill 84 feet by 96 feet will be built 900 feet from the saw mill building. This plant will be driven by electricity, generated in the saw mill engine room. The shavings from this plant will be blown to the main boiler house.

"The report that a box factory will be built next year is erroneous. The saw mill building proper is built large enough for the installation of a horizontal resaw and a second edger later, if business warrants. The two hand mill will have a capacity of 150,000 feet in ten hours. If run night and day it would produce from 50,000,000 to 60,000,000 feet per year. The machinery will be brought from the Diamond Iron Works of Minneapolis, Minn.

"Mr. F. Hill Hunter will be the engineer in charge of construction, associated with him in this work will be our operating superintendent, Mr. H. S. Wood. The personnel of the company will not change, except for the valuable addition to our staff of Mr. W. C. Landon, formerly of Wausau,

## SPECIALISTS FOR NEXT INSTITUTE

EDUCATIONAL LEADERS FROM VARIOUS INSTITUTIONS WILL CONDUCT WORK HERE THE MIDDLE OF THE MONTH

Plans for the annual Klamath County Teachers Institute are rapidly gaining shape, and County School Superintendent Peterson looks for the most instructive institute ever held in the county. The sessions will be held at the Klamath County high school building, October 14, 15, and 16.

Just what instructors will be here has not definitely been settled. It is expected, though, that Deputy State Superintendent E. F. Carleton, who is well known here, will be in attendance, and participate in the work.

Rural school work will be taken up by Frank Shepherd of the Oregon Agricultural College, F. L. Griffin of the same institution will discuss school agricultural work.

Special attention will be paid the rural school problems by M. S. Pittman of the Oregon State Normal school. Mr. Pittman's work at the last institute was found extremely helpful.

The University of Oregon will be represented by Fred E. Ayer, head of the educational department. A primary instructor will also be secured, and other departments will be conducted by local teachers.

At least the noon meal will be served the teachers by the high school cafeteria, conducted by the department of home economics. A public meeting will be held Thursday night, at which questions of importance to both teachers and parents will be talked over.

A meeting of the school directors of the county will also be held during the institute. This will be October 16, and problems from the director's standpoint will be threshed over.

Going to Prineville

Chester H. De Lap, a twin brother of Deputy County Clerk Chas. F. De Lap, is here from Ashland with his family, visiting his parents, County Clerk C. R. De Lap and family. After several days here, Mr. De Lap and family will leave for Prineville, where they will reside.

Wisconsin, who has invested in our company, and who brings to his new field valuable knowledge gained through years of experience in the Wisconsin Valley. Mr. Landon will be secretary of the company. We have been able to keep our former organization together, and most of the old men will be on hand when the whistle blows next spring.

## Allies Try to Turn Both German Wings

United Press Service  
 PARIS, Oct. 1.—In a supreme effort to turn both wings of the German army, the allies are reinforcing heavily, and have taken the offensive everywhere.

The fighting is the hottest yet, with several hand-to-hand encounters. Several towns have changed hands four times in the day.

The allies now hold the original German advanced positions near Somme and West Oise.

It is stated that the Germans right extension has been shortened. It is believed the enemy is fighting desperately to hold the railroad toward Belgium.

The situation on the extreme French right is similar. A victory by Sunday or Monday is predicted.

## DR. MARTIN LIES IN STATE TODAY

REMAINS ARE REMOVED TO THE MASONIC TEMPLE, AND WILL BE KEPT THERE UNTIL SHIPPED IN THE MORNING

Escorted by a number of lodge members, the remains of the late Dr. William Martin were taken to the Masonic Temple this afternoon, where they will lie in state this afternoon and this evening, to give his many friends an opportunity to pay their last respects. Dr. Martin was a past Grand Master of the local lodge.

In the morning the body will be shipped to Auburn, Calif., where it will be interred.

## ARE CONFIDENT OF ADJUSTMENT

United Press Service  
 WASHINGTON, D. C., Oct. 1.—It is thought among official circles here that if the peace conference scheduled for today at Eastcote is unable to come to an immediate settlement the disputants will agree to an armistice pending further negotiations. It is confidently stated that an adjustment will be reached.

Silk and its manufactures comprise nearly 40 per cent of the exports of Japan.

## French Attack Mulhausen

United Press Service  
 BERLIN, (via The Hague), Oct. 1. The war office announces the French are reinforced in Alsace Lorraine, and are attacking the Germans near Mulhausen. It says further:

"The enemy continues its efforts for a complete investment near Toul and Verdun, and is being assisted by the garrisons of those forts. We are holding our line intact every where in this territory."

## Ladies Discuss Laws

New Initiative Measures to Be Talked at Meetings

Now that they have the right to the ballot, the members of the Women's Literary Club intend to exercise this right intelligently. In order to do this, they have arranged for some discussions of the new initiative measures.

This work has been taken up by the legislative department of the Library Club, of which Miss Knola Hawkins is chairman. The meetings are open to both men and women.

The first event to be held in this regard will be on Monday, when Belle Q. Grosbeck will lecture on "Politics and the Common People." Later in the month two discussions will be held.

The dates of these discussion meetings have not been announced yet. The talks are to be strictly non-partisan, the idea being to give the voters attending a clearer insight into the purport of each of the measures to be submitted to the people at the November election.

This movement has been taken up in various school districts of the county by County School Superintendent Fred Peterson. The club members are anxious to carry on the work here as much as possible, and have arranged an initiative to Mr. Peterson and his associates to join with them in their educational work.

## Near Study of O.A.C.

What the State Is Doing for the Coming Farmers

CORVALLIS, Oct. 1.—Oregon citizens will be interested in learning the extent and character of the property interests of the Oregon Agricultural College. The college farm and campus include 249 acres, upon which are located 35 buildings and numerous pastures, meadows, fields, gardens and orchards.

The buildings are all equipped with the various articles of apparatus, machinery and utensils that are best suited to serve the intended use.

There are also several hundred head of farm animals of different classes and large flocks of pedigreed poultry.

The portion of college grounds comprising 91 acres lying immediately about the several buildings, is usually designated as the lawns and campus. This track is bound on the north, east and south by the city of Corvallis, and on the west by Cauthorn avenue, which divides the campus from the livestock buildings and grounds.

The campus is traversed in all directions by broad drives and walks.
