Enlargement Is Opposed

Chamber of Commerce Will Fight the Proposition

Klamath county, far from benefiting by the increasing of the area embraced within the limits of Crater Lake National Park, would suffer materially through this. Therefore, say members of the Klamath Chamber of Commerce, the project is to be fought hard by the local organization.

The extension proposed would run the boundary so as to take in Mt. Thielsen and Diamond lake. The territory that would thus be taken away in some of Klamath's best deer

hunting grounds, and the hunting would be thus prohibited by reason of being within a national park.

It was the consensus of opinion that the lands to be taken in would in no way increase the beauty of the park, and that it was presumably a waste for better roads for a route to the park from the east of the mountains.

The Chamber of Commerce will record as strongly opposed to the plan, and ready to fight it in any way possible. The matter will be taken up with the department in congress.
