Moving Pictures

"The Man on the Box," the Jesse L. Lasky film version of Harold Lloyd's famous comedy, is the big attraction that will be presented at the Star theater today and tomorrow. "The Man on the Box" is one of the most popular stories and plays of recent years, the picture production has experienced wonderful success, and has the reputation of being one of the few high class comedy productions. Max Fagan is seen in the title role, and is ably assisted by Lolita Robertson and an all star cast, in producing no end of fun.

"The Man on the Box" is the first of a series of Paramount features that will be exhibited at the Star on Thursday and Friday of each week. Today's feature is in five parts, and is accompanied by the Homan offering, "Her Trip to New York." The management positively guarantees the new

Paramount service to be among the best feature picture productions that can possibly be obtained.

An entire program of good comedies will be shown at the Temple tonight and tomorrow night.

This program consists of five reels of some of the best comedies that have been produced, and there is no doubt but that the patrons will enjoy a good evening, and will realize that they can easily spare the time to visit this theater to see these comedy programs, which will be shown two nights of each week. It has taken considerable time and expense to be able to secure a complete comedy program, but the management feels that these programs are going to prove popular with the patrons, and has bookings ahead for nearly all the good comedies that are being produced by the leading comedy companies associated with the "Licensed Films," which will have to be acknowledged as the leading film association which all other companies pattern after.

Register for City Election

At the city election, May 2d, five councilmen are to be chosen to manage the affairs of the city for the next two years. Two charter amendments will also be submitted. The importance of the election seems not to be appreciated, judging from the lack of interest displayed in the registration of voters. Registration closes April 15th at 9 o'clock p. m. Beginning April 1st, the police judge will be at his office evenings from 7 to 9 o'clock for the accommodation of electors desiring to register.

For three years visitors to the Pendleton round-up have watched the world's most skillful riders try to conquer "Cyrus." Everyone was hurled skyward, recovering consciousness with a "never again" vow on his lips.

Money in Hand

Assurance that the south inlet black sand beach and sand rock is rich in gold seems to be shown in the action of the San Francisco firm, which recently took a ton and a half of samples to California for assay in sending a second order for 50 sacks of black sand rock. The company's field engineer J. C. Moulton, is now at South Inlet, taking the samples.—Marshfield Record.

Kaolin Not Kaolin

Samples of the so-called kaolin deposits, which are located near the Dead Indian road about fourteen miles from Ashland were sent to Smith, Emery & Co., at San Francisco for analysis recently. The material which Ashlanders have always considered to be kaolin is found to be feldspar, which is a valuable material used in pottery work.—Ashland Tidings.
