**FACTORY TAKES
THIRD OF SERIES**

THEIR NEW PITCHER SHOWS UP
WELL AND HAS GAINED HIS OWN
WAY—K. F. TEAM BLANKED
UNTIL NINTH INNING

The last of the ninth frame furnished the thriller in yesterday's baseball game, when, after two men were down, Klamath Falls scored their only two runs on a couple of good drives and an error. To keep up the fun Motschenbacher stole second base after the runs were made and after he had practically been caught between the bases. However, he died on second, and the final score for the third game of the series, in which the Box Factory has taken all three, ended 10 to 2.

Cook, the new pitcher for the Factory, came through in fine style yesterday, striking out nine men and issuing but one pass. He showed good control, and has a short, speedy delivery which the Klamathites failed to solve, and were not dangerous but once or twice during the game. The Factory got one run in the second and four in the third, which salted the game away for them.

Foster pitched a fairly even game of ball, except for the third inning, when the Boxers managed to line out a bunch of hits, which, coupled with poor support proved disastrous to the city team. His support was poor throughout the game, but except for an inning here and there the game was fairly clean. He secured eight strikeouts and hit one man.

The lineup were as follows:
Klamath Falls—Motschenbacher, c.; Ambrose, cf.; Dale, 1b.; Zumburn, ss.; Hayden, 2b.; Noel, lf.; Page, 3b.; Baum, rf.; Foster, p.
Ewauna—Ball, c.; O. Arnold, cf.; C. Arnold, 1b.; Herbig, ss.; Morgan, 2b.; Houston, lf.; Bowden, 3b.; Winders, rf.; Cook, p.

Umpire, Oakes.
Score by innings—
1 2 3 4 5 6 7 8 9
K. Falls . . . 0 0 0 0 0 0 3—3
Ewauna . . . 0 1 4 1 0 2 1 1—10

Explains the Decision
There was a lot of trouble over a decision toward the close of the game yesterday between the Ewauna Box Factory team and the Klamath Falls team. If you will take the rule book and look up Rule 61, Section 3, you will find which umpire gives that decision. I was field umpire at the time, with a man on first.
If the players will study the rules of umpiring and the rules of the game there will be less wrangling.

**Printers Want to Save
Parents \$50,000 Yearly**

SALEM, June 14.—Offering arguments that if put into operation it would save to the parents of school children at least \$50,000 annually, would keep in the state a similar amount which is expended elsewhere, would be a factor in the increasing demand for labor in the state, and numerous others, a committee appointed by Capital Typographical Union No. 210 of this city will start active work at once to interest the granges, civic organizations and commercial bodies in its plan to have the state publish the text books used in Oregon.

The proposal has the indorsement of a number of prominent educators. It is the intention to distribute the books through the same channels, with the same commissions, or larger ones, as now employed here in the distribution of text books published in other states. Mill managers of Oregon City will be asked to supply the paper, and as eight or ten carloads will be required annually, it is believed that at least one of them will be willing to supply the necessary machinery for the manufacture of a fine grade of book paper.

Another feature of the plan is that it is expected to stimulate the writing of text books by Oregon educators, and royalties that are now paid to authors elsewhere would remain in Oregon, says the committee. However, it probably would be necessary at the start to contract for the use of "copy" already prepared.

A. W. Lawrence, state printer; Arthur Brock, Harry Hill, L. E. Got-

shall, E. C. VanSlyke and W. G. Ackerman compose the Salem committee, which is at the head of the campaign for "made-in-Oregon text books." That there is a selfish motive in the proposal is disclaimed by any member of the committee or the union which is launching the campaign, and which has adopted a resolution of which the following is a part:

"Whereas, the text books used in the public schools of Oregon, in the grades from the primary to the grammar, inclusive, are published in other states; that in 1914 there were more than 300,000 such books sold in this state, at a cost to the citizens of \$134,000; that a large percentage of this cost is due to the cumbersome and expensive methods of placing the necessary books in the hands of the pupils;

"Whereas, a general policy of economy and efficiency, coupled with the movement to keep Oregon money in Oregon, can best be served by the publication and distribution of these text books by the state through mediums now in existence; that such publication and distribution would stimulate the literary production of these texts the securing of books suitable for Oregon children to derive knowledge from and greatly add to the manufacturing growth of the state," etc.

"The committee intends to carry the campaign to all parts of the state," said Mr. Brock, an active member of the committee, "and right at the start we want it thoroughly understood that while the adoption of the plan would give employment to probably twenty-five or thirty more persons in the state printing department, it is too big a thing for anyone to accuse us of a selfish motive. Besides the employment of these persons the labor now being done in other states would benefit Oregon in that it would keep the money here. The work would be done here, the paper would be made here, the books probably eventually would be written here, and in as much as it is the intention to have the same source of distribution as now, not a single Oregon industry could be harmed. There is no intention to have a free text book system, but it is the intention to sell the books to the parents of the children at cost. That, we estimate, would save them \$50,000 annually, and would keep that much money in the state that now goes to Eastern publishers. It is estimated that California saved the parents of children \$250,000 annually by printing its own text books, which cut the expense to half. In that state flat presses are used, whereas here we would have a magazine rotary press, which would make the cost even less.

"Of course, the present quarters of the state printing department would not be adequate for all the work, and a new building would be necessary. The union suggests the erection of a factory building on one of the railroads, to save drayage costs. The initial cost of building and equipment probably would be \$100,000, which would be made up in profit to the state and people in two years or less.

"The Salem union does not care for any credit for the inception of the idea, but it does want the grange, commercial and other civic organizations of the state to take hold and aid

TODAY'S ODDDEST STORY

United Press Service.
DENVER, Colo., June 14.—A soap box orator was orating about the injustices of the Colorado coal barons. The oration closed with this stirring indictment:
"They skim all the cream off the milk and leave the others nothing but the dry bones to pick."
The orator couldn't understand the hilarity.

in its consummation, and, if so desired, they shall have the credit.

"One important feature in connection with our tentative plans is the opportunity that would be afforded for the exploitation of Oregon among Oregon children. Oregon subjects could be employed in the books. For instance, the readers might contain selections from the best Oregon literature, a sprinkling of Oregon words could be used in the spelling books, and Oregon distances employed in the mathematical illustrations."

The following table showing the comparative cost of text books in Oregon with those published by the state in California has been prepared by the committee for general distribution:

	Oregon	Calif.
Primer	\$0.25	\$0.15
First Reader	.35	.18
Second Reader	.35	.18
Third Reader	.45	.19
Fourth Reader	.45	.19
Fifth Reader	.55	.24

Moving Pictures

"The Vengeance of Wu Fang," the eighteenth episode of "The Exploits of Elaine," heads the five reel program that will be presented at the Star theater today only. "The Girl in the Case," a two part Vitaphone drama featuring Maurice Costello, is another good number that will be presented today. The closing picture of the program is the Lubin comedy, "The Crooks." This bill will be shown today only.

Tuesday and Wednesday, Beaulieu Clayton and Wheeler Oakman of "The Spoilers" fame, will be seen in the Selig drama, "In Defense of the Law," a story of the Frozen North.

Advertised List
The following unclaimed mail matter, advertised on the 12th day of June, 1915, will be sent to the dead letter office, Washington, D. C., on the 26th day of June:

Bundy, N. L.
Carter, Miss Evelyn
Dow, R. A.
Eosterl, G.
Ingram, H. I.
Myer, Ray

A charge of one cent will be made on all letters delivered from this list. In calling for letters please say advertised.

**TWO FISH SCREENS
TO BE INSTALLED**

KLAMATH COUNTY TO RECEIVE
SECOND AND THIRD OF NEW
PATENT FISH SCREENS INSTALLED IN THE STATE

Klamath county is to receive the second and third of the three new patent self-cleaning fish screens to be installed in the state by Chas. Kell of Gold Hill, patentee of the screens, which have received the official sanction of the state fish and game commission. Kell accompanied S. L. Sandry, deputy fish warden of District No. 2, and Joe Skelton to the Fort Klamath country yesterday, and returned today after inspecting a site on the Loosley and Sisemore ranches for the installation of such screens. The other screen is to be installed on the Obenchain ditch in the Bly district for trial.

The Kell fish screen is a rotary, self-cleaning screen, which is placed at the head of irrigation ditches for the purpose of keeping out the fish, and also, at the same time, keeps itself clean, thus doing away with a special tender, and does not interfere with the passage of the water. The screen is a simple affair, being a cylinder screen, inside of which are collapsible paddle which the current catches and turns the screen, thus keeping it clean. When installed it is fixed with a float, so that in ditches which have an uneven flow of water it will adjust itself, says Kell, the inventor.

A large screen was placed at the head of a ditch at Hood River about a month ago under the supervision of the fish commission, and has given absolute satisfaction, according to Sandry. Attempts have been made to clog it up and prove that it would not work, but they have been unsuccessful. The screens are of such heavy material and running with the current, will carry over a surprisingly large timber, according to Kell.

"I find the sentiment of the people here to be much more favorable than in many places," said Sandry, today. "In some places we find considerable opposition in the matter of properly taking care of the fish and the installation of these screens. I have been visiting the various parts of your county, looking after the screens, as at present I am in charge of this work over the state, and find that there are between fifteen and twenty here that should have these screens. I am certain that the new screens will give perfect satisfaction, and we are going to install these two at Fort Klamath and Bly to show your people that they will work."

Kell is a Gold Hill blacksmith, and has only recently received the patent for his screen. He has made no arrangements thus far for the permanent location of a factory for the making of the screens. He will make the two that are to be installed in this county here, and will install them himself. Kell will remain in the county for several days yet, visiting the various irrigation ditches over the county inspecting the screens.

SOLICITS THE BUSINESS AND ACCOUNTS OF
FARMERS AND BUSINESS MEN
Why Farmers Should Keep a Bank Account
Their bank deposit book affords them a complete record of their cash receipts while the stubs of their check books are a perfect record of expenses and payments. Paying a laborer, a store account or any other bill with a bank check is much safer than with money, because you avoid the risk of handling the actual cash, and the endorsed check returned by the bank is the best kind of a receipt. Farmers, try the experiment for one year of keeping a bank account and see if it does not pay you. A large number of the best farmers have accounts with us now—we want
