

# More Boys Born in England Since the War

By WILIAM A. FORRENT  
Lead Staff Correspondent

Advance records indicate that the ratio will be even greater from October to January, 1916. A theory that some natural law, yet undiscovered, lends to the birth of more boys than girls during a nation's war stress is partially borne out by reports from Austria, where male births have exceeded female births during the war to an even greater extent than in England.

Professor W. D. Halliburton, dean of medicine at King's College, London, discussing the subject, declared that there is no scientific theory to justify the belief.

"The fact is there," he stated. "We must look upon it as a wise dispensation of Providence. One popular explanation is that the anxiety or privation of the mother during the war period has some influence on determining the sex of her child. But no scientific explanation warrants such an idea." Professor Arthur Dendy of the zoological and animal biological faculty, King's College, declared that prevailing birth conditions could not be attributed to mere coincidences. He was unable to explain further.

Official records made public by the registrar general also said that the marriage rate for England and Wales during the last three months was the highest in history, 21.8 persons per 1,000.

## Gibbons-Abern Meet

United Press Service  
ST. PAUL, Minn., Jan. 18.—Mike Gibbons and Jake Abern are to settle their grudge before the St. Paul Athletic club tonight. It is quite a sizeable grudge, too, judging from the way the fighters have been gnashing their teeth in public ever since the postponement of the first meeting. Ante-bellum statements from both camps forecast an interesting half hour this evening. The bout is for ten rounds. This fight may determine which of the two will meet Les Darcy, an European champion.

## OIL, GAS TRACES AROUND ASHLAND

SURVEY MADE BY EXPERTS IN CONSIDERED EXTREMELY FAVORABLE—ASHLAND IN MILDLY EXCITED AS RESULT

ASHLAND, Jan. 18.—Indications are that Ashland and vicinity will soon be in the heart of an oil boom, according to reports of practical men, in oil developments.

For the past two weeks two oil experts from California oil fields have been looking over the ground, and have, it is understood, reported favorably on certain sections of land within a few miles of Ashland.

Old Ashlandites believe there are big deposits of oil somewhere near, as a majority of the creeks and springs show surface indications of oil. Other places also show signs of natural gas, but whether in paying quantities will show by development.
