"Quality" Peroxide

There are so many cheap and correspondingly worthless solutions of Hydrogen Peroxide on this market that it is rather exceptional to find a product that meets the requirements of a reliable product. Solution of Hydrogen Peroxide should be of full strength, retain its strength well, and be free from harmless impurities or an excess of acid.

Such an article is SQUIBB'S, the kind we recommend. This is made by an improved process which yields a product of uniformly full strength (over 10 volumes of available oxygen), exceptional purity and excellent keeping qualities. It is made with due regard for the stringent requirements of the U. S. Pharmacopoeia, the legal standard, and is hence far superior to the ordinary Hydrogen Peroxide with which the market is flooded; it is the medicinal quality, not a technical grade; and it contains no acetanilide. It may be depended upon for its antiseptic, disinfectant and deodorant action, and it may be used most freely for all purposes which pure Hydrogen Peroxide is intended to serve.

We carry Squibb's Solution Hydrogen Peroxide in the original 4-lb., 1-lb., and 1-lb. bottles.
