Why Not Save the Middleman's Profit?

IMPERIAL TIRES AND INNER TIRES

THE FACTORY TO THE RETAILOR DIRECT FROM

No branch houses are employed in the distribution of these tires; they go direct from the manufacturer to the retailer, and the profit of the middleman is put in the construction of the tire—the consumer gets the benefit, and by this method gets the best tire in the world for the money.

Russia Is Fearful of What Finland May Do

United Press Service
COPENHAGEN, March 29.—(By mail)—Possibly forecasting a serious internal situation in Finland, all military eligible have been forbidden to leave the country. It became known today.

Finns between the ages of 19 and 31 must remain in Finland pending the czar's decision to draft them into the Russian army. There are, approximately 500,000 men in Finland available for military service. Less than 4,000 Finns have joined the Russian army to date. All ports of exit are now closely watched with the utmost vigilance by the Russian authorities.

"Finland has no desire to fight for or against Russia," said a wealthy Finnish ship owner, who arrived here today, after escaping from his own country by signing up as a master on one of his own ships.

"Finland, figuratively speaking, is between the devil and the deep, blue sea." The people are a solid unit with the national diet against military participation in the war. By the people I mean everybody, men and women. Women have the vote, too, in Finland. "There is not one of either sex who would not fight a German invasion of Finland. But the country wants to do it with its own army and its own officers. The Finnish standing army of 300,000 men was abolished by Russia in 1905. Naturally, then, there is

no great good feeling toward Russia. Russia has instituted other 'reforms' which have not been popular. But, with all this, there is no sentiment favoring the Germans. The Finns are for Finland, first and all the time.

"If the Germans invade Finland, the Russians will devastate Finland just as Poland was razed. If the Russians conscript Finnish men into the Russian army there will be serious consequences. I am not willing to say that there will be a revolution, but the world will hear from Finland if it happens.

"Practically every factory and almost every blacksmith forge in Finland is engaged in making munitions for the Russians," the ship owner added. "The people are willing to do this because they are paid for it, but they are not willing to shed blood unless it is in defence of their own country and homes."

Finland is suffering a great shortage of wheat, and food is somewhat higher, but the country has not suffered in comparison with some countries. Russia refuses to pass more than the normal Russian importations of wheat into Finland, because it is feared the grain would be sold to Germany. Before the war Finland imported her wheat from three sources, Russia, Germany and America. With the German and American supplies now non-existent, only one-third of the normal amount is available.

TREBLES SUPPLY OF AUTO JUICE

SCIENTIST'S PROCESS MAKES IT POSSIBLE TO EXTRACT THREE TIMES AS MUCH GASOLINE AS HERETOFORE

United Press Service

WASHINGTON, D. C., March 29.—Dr. Walter F. Rittman, scientist in the United States bureau of mines, has given to the United States and the world a practical plan for trebling the amount of gasoline that may be produced from crude oil. Science, chemistry, calculus and physics helped him make the discovery, that auto-ists and others will watch closely.

Dr. Rittman's discovery has now enlisted the aid of Henry Ford, manufacturer, Detroit, Mich., who plans to do all he can to make this discovery a real wallop at the well known octopus.

"Because I had a strong body, trained to endure long, hard strains, I was able to work thirty-six hours at a stretch when necessary," Professor Rittman said. "I attribute my success to a strong physique acquired in football battles and other forms of college athletics."

"My processes were not over-night inspirations. They are the result of straight, scientific research, involving the use of calculus, physics and chemistry. When in the midst of an experiment one needs physical strength."

Thirty-seven hours of work, without food, sleep or rest, was not uncommon for Dr. Rittman. In addition to enabling independent oil operators to secure three times the amount of gasoline from crude oil that was possible under the old systems, Dr. Rittman's discovery will greatly increase the production of tulou and benzol, two important bases for the manufacture of high explosives and dyestuffs.

Secretary of the Interior Lane has consented to a plan to have Professor Rittman supervise the installation of the necessary plant and machinery required in the production of gasoline, tulou and benzol at plants of some of the leading oil and powder factories in this country.

We must have more room for our growing automobile tire business, and are offering our entire stock of high class leather bags and suit cases at cost. Bradley Harness Co. 28-3t

ORINDALE NOTES
Yes, the weather was very unsettled.
Mr. Mumford is moving to his 40-acre ranch in this vicinity. He is preparing to put up a windmill on his ranch at once.

James Stansbie has been hauling out the material for Mr. Mumford's windmill the last day or two.

The last two weeks of weather has hurt the fall grain in these parts, but we are in hopes it will come out all right.

C. G. Hunt and family spent Sunday with Robert Griffin and wife at the Long Lake ranch.

Mr. Largent made a trip to Klamath Falls Monday from his ranch near Plevna.

Poster & Lambert company of Round Lake were hauling logs the fore part of the week.

H. H. Van Valkenburg expects to commence falling timber soon. He expects to move a large lot of logs this season.

J. O. Hague arrived several days ago from Portland. We welcome him in our midst.

Mr. Belden is progressing nicely with his brush work he is doing for H. S. Fox.
