W. S. SLOUGH For Assessor

To the Voters of Klamath County:

- If I am placed in the office of assessor by your votes I pledge myself to the following standards and ideals:
- 1—I shall give all my time and the best of my ability to the work of the office.
 - 2—I shall do my best to place upon the tax roll every piece of taxable property in Klamath county, and will assess each piece equitably.
 - 3—The "timber baron" and "small taxpayer" will look alike to me. I stand for a square deal for all.
 - 4—I will not use the office to reward friends or punish enemies.
 - 5—I will not use the opportunities afforded by the office to promulgate any "ideas" or "isms." There is work enough in the office to consume all the time and energy of the most active man.
 - 6—The peace and prosperity of the county depend upon a just and intelligent administration of public business.
 - 7—Your support in the Primary and in the Election is solicited upon the above declaration of principles.
- Respectfully, **W. S. SLOUGH**

KLAMATH FALLS, OREGON

FRIDAY, MAY 12, 1916

EDUCATIONAL-CIVIC UPLIFT

ANY PLAN like the "Clean-Up Day" campaign for calling the attention of the public at large to the necessity for maintaining a clean city should meet with earnest co-operation. The problem is one of education, and efforts in this direction, even at intervals, will serve as a stimulus for the development of a sentiment that will in time be continuous and permanent.

Everyone should unite tomorrow in an attempt to give an object lesson of the pleasure and benefits that come from habits of cleanliness, personal, social and municipal.

RURAL DEVELOPMENT

THE SOIL is the foundation of the rural community's wealth, as it is indeed of other communities also. But because the industry of agriculture is carried on immediately at the doors of the rural community, if such a community can claim to be industrial this must be due to agriculture. Yet, in face of the fact that they are in the midst of the greatest industry that is in greatest need of development, some of the rural communities look to the distant manufacturing centers with longing, in the firm belief that they think they would be better off if they, too, had factories rather than farms.

A few small factories in a rural community give employment to persons who prefer the factory to the farm. To that extent almost any rural community can support a factory or two, and perhaps it is worth some effort to secure them. But why should a community go out of its line into a new field of exploitation, when its basic industry is in dire need of aid and improvement?

It is a safe venture that there is not a rural community in the United States that is not capable of producing anywhere from 50 to 75 per cent more wealth than it is at present producing; and it is an equally safe venture that there is not a rural community whose farmers are satisfied with conditions of life on the farm and with marketing facilities in their nearest trading center. Are not these situations that demand and that will repay sincere and earnest effort at improvement? Yet they are about the last conditions to receive attention from local business men, who sometimes appear to be utterly indifferent to some of the conditions that most directly affect their own prosperity.

Fortunately, many rural communities have awakened to the need and to the wisdom of developing local resources, and wherever farmers and merchants are working hand in hand in community building the real order question is eliminated, the jealousies and prejudices that formerly existed have been eradicated and the entire communities are rising as units to a higher plane.

Oneill Continues His Campaign of Mud Slinging Dirty Politics

Continued from Page 1

today, and have existed in this county since I first came here. It is like this my friends, the fellow who comes out, shakes hands with you and is gone, then the fellow who wants to do right as near as possible comes and talks with you and he is open to criticism, but it is far better to come before the voters of the district, from whom we are asking suffrage, and talk man to man with them, it is better for him to be a gum shoe man, better for him I mean, what I mean by that is going around from house to house and saying to you, you had better watch out for Oneill as a dishonest man, Oneill if he gets in that position will take advantage of you, now I charge you to beware of that thing, these things have been started and they are in the making at the present time. I have come out openly and I am openly discussing the questions as I see them in this campaign, for if any gentlemen that is here, or not here, or any of his friends, desire to enter into a discussion of the things and conditions as I am stating them, I am open at all times to meet him and give him half of the time, any time he desires to meet me.

Now then it is a fact that I am making this campaign openly, and stating some of the things which is being carried on by one leading political boss of the county. That man is Delvin V. Kuykendall, the present judge of this district I believe that is his name, anyway he signs it D. V. Kuykendall. I mean Judge Kuykendall, for fear any of you should be mistaken in the man, he is the gentleman that has been representing the timber interest of this county, and the gentleman that wrote the contract for our farmers for the Klamath Water Users Association, when he was your attorney. I do not know, I guess you might call him "Timber" Kuykendall or Water Users Kuykendall, I do not know which, I am advertising Kuykendall and I am going to do it openly, and you can call it politics if you like, I am not afraid of the results of this election. If you people elect D. V. Kuykendall for judge upon the republican ticket, you are going to do it after I have given you notice of who and what he is. Now somebody as I stand here, and as these words ring in my ears, you may say that Oneill is out for office and out for the office that Kuykendall has and is now holding. Yes, that is true, and I have had some experience with Kuykendall, since I have been in this county, I have tried more law suits with him than any other man. I have known him quite a while, I know his methods, I know his disposition, I know his inclinations, I know his cunning smile, and I desire to state to you that I do not believe that he can be trusted to give the people a square deal. I desire all of you to understand that. Now then you may say that I am talking politics.

Now I say to you people, I pledge to you people, and I promise you that if you give me your hearty support and co-operation and give me the nomination for circuit judge of this district upon the 19th day of May, I will use all of my influence as judge, and I will as judge of that circuit, snatch that place out of the political ring, so that every man that is brought into court will receive the same consideration, and every lawyer will receive the same consideration, you will not have to hire the partner of the court in order to get justice. We have never had a chance in Klamath Falls courts since I have been there, except the time when George Noland presided. You farmers do not know the conditions that exist in politics in Klamath county, you do not know that the political ring is run by six or seven men, and if you are not in the ring you might just as well not try to do anything. You farmers go and cast your vote for a man that you think is right, you vote honestly, but you must remember that in the city of Klamath Falls, there is a political ring, and that is where this influence is at work and where it counts. I want to say that I desire the support of the farmers, the working men, I know what your conditions are, I know what it means to work and live on a farm, and I want your support and co-operation. You have been to vote on elections and you have been to Klamath Falls, but the political conditions is such that you would not understand it until it was brought to your attention. It has been so every since I have been in Klamath Falls, with the exception of when Judge Noland was presiding, the conditions have been against the satisfactory administration of justice. There is one particular thing that I wish to mention, and you men that have been in court, or called for jury service, you come up there and wait around there and when the cases are called and the jury is ready, and the things

are going on, there is about one-third of the time of the trial of the case that is spent in recesses while the judge is in his private chamber looking to the law or questions that come up. I mean particularly the murder case of A. E. Lawrence, that was tried before Judge Kuykendall, in that case you know he spent about one-third of his time in his chambers, while the jury was bottled up in seclusion, that he was in there bunting up the law of the case about one-third of the time. And right here I want to call your attention to the ranner in which that trial was conducted. I only wish he was here to hear what I have to say, but that does not matter, as my stenographer is here taking it all down and will probably read it all to him tomorrow, while I have nothing against her, she has a right to be here, and I am glad she is here. I want to say this, that it is a shame and a disgrace to the voters of this county the way and manner in which that case against Lawrence was conducted. Myself and my partner, Mr. Manning, were employed by the district attorney to assist in the case, and we went in there with the purpose of bringing before the court and jury all of the testimony and facts in the case. We went there to prove the guilt of this man Lawrence, for we firmly believed that he was guilty, but I charge the fact to be that the trial of this case was stifled in the giving of its testimony, by D. V. Kuykendall. You will wonder why I say this, and I will tell you why. There is a provision in the statute of this state that if a man gets on the witness stand and testifies, you may ask him, if he did not make statements at another time and place and in the presence of certain people, relating to the things which he is testifying to. We desired to impeach this man Lawrence in the trial of this case, and to do this we had the questions ready for the laying of evidence to impeach him. The presiding judge, D. V. Kuykendall, perjured and violated his oath of office, and perjured and violated the statutes of this state in this case, if he did not know better he should not be sitting as judge of this court, and be passing upon the relative and property rights of the people that are within his jurisdiction. We had eight witnesses ready to put on the stand for the purpose of impeaching Lawrence and the presiding judge, D. V. Kuykendall, would not let us use them, consequently Lawrence went unimpeached.

Kuykendall represents that which is not for your own interests, he is the man that started the suit against the county warrants and tied them all up, he and Stone and Ferguson, of course he will say now that he is out of that, I do not know if he is or not, I do not know if the firm of Kuykendall and Ferguson is broken up or not, but I do know that he is a man that sits on the fence and boots when the timber men call, and he and Ferguson have the saying of county warrants, and they can make them what they want them, he is the man that got out these water contracts that you are so firmly bound up in, and that you have had so much trouble over.
