Anna Case

The Miracle Girl of the Metropolitan, whose bewitchingly beautiful soprano voice was chosen for the first test to determine whether Edison had actually succeeded in achieving his ambition to re-create the human voice so perfectly that his re-creation could not be distinguished from the original. Since then many other great artists have made similar tests—always with the same successful results. Hear Edison's re-creation of Anna Case's voice, and then hear her at the Metropolitan or when she is on concert tour. This photograph shows Miss Case actually singing in direct comparison with Edison's re-creation of her voice.
