United Press Service
SAN FRANCISCO, July 28.—The authorities announced this afternoon that they believed the men they have in custody are responsible for the bomb explosion last Saturday. They say anarchists are implicated in the plot. District Attorney Fickert declares that the bomb was intended to be exploded in the ranks of the United Railway employes marching in the parade. He says Mrs. Thomas Mooney, wife of the agitator who tried to get the carmen to strike recently, was seen near the scene of the explosion with a suit case. He declares that the street car to Oakland recently found smoking with burning dynamite was not an accident, but a plot.

The police are continuing the sweating of Warren Billings, and say he already has given information which establishes a foundation for further developments.

Joe Farrer, who saw four men in a water front saloon talking excitedly just before the explosion, this afternoon will try to identify Billings as one of the men.

District Attorney Fickert states that further information indicates that a second bomb was to be exploded under a United Railway car during the parade, but that the plot was not carried out.

Thomas Mooney and wife were arrested last night at Guerneville and brought to San Francisco.
