Standing with knees "broken," or slightly bent forward, the kneecaps turned outward to simulate bowlegs, the feet three or four inches apart, parallel or slightly toeing in, the toes grasping. This is a position such as a gorilla or the orang takes. It is the position one takes for stability on the deck of a ship at sea. It is a perfectly stable, strong posture. The weight of the body, as the next step is taken in this position, is not thrown suddenly and wholly on the arches of the feet, but the load is taken up and distributed in the spring action of the knees, ankles and feet.

The above patient, living in Springfield, Mass., was suffering with Flat-Foot and Bunions, a local doctor advised her to wear "Ground Grippers." The doctor kept a careful diagram on her foot from April 19 to July 10, and the above drawing is reproduced from his records. This cure was sent us by one of our leading agents, and is authentic.

GROUND GRIPPER WALKING SHOE

MEDICAL CURE FOR FLAT-FOOT SOLD FROM COAST TO COAST

In the application of our "GROUND GRIPPER" shoe, the right conditions have been met, and the rapidity with which it is being adopted by eminent medical men proves it to be an assured success. In presenting some of the features of our "GROUND GRIPPER" shoe, we feel that we are calling your attention to one of the most important necessities of life.

Doctors have spent much of their time trying to find a shoe that would take the place of MECHANICAL appliances or ARTIFICIAL SUPPORTS, such as PLATES or STEEL SHANKS, commonly called "props for the feet," which are so rigid and unyielding that they WEAKEN instead of STRENGTHEN the muscles of the feet.

Everyone who enjoys walking, or has to stand on their feet most of the time, will find this shoe a source of rest, and a practical cure for foot troubles.
