Shepherd Buys Lamb Block on Main Street

A deal that is taken by local real estate men and investors to be of much significance was closed today when B. F. Shepherd, local investor and money lender, purchased outright the D. A. Lamb block on Main street. This property is situated between Sixth and Seventh, and comprises the room occupied by the J. E. Swanson barber shop and the Gun Store, conducted by J. B. Chambers. The deal includes both the building, which is two stories, and the ground on which it sets. This property is considered probably as valuable as any business property in Klamath Falls. The purchase by Mr. Shepherd of this property is considered significant because Mr. Shepherd is not a stranger in Klamath Falls, but has lived here several years, is well acquainted with local conditions, and is generally known as very conservative. He expects to put in an up-to-date heating plant and improve the second story for rental purposes. The sale was made through A. A. Bellman & Son.

ELLIOTT RAISES BIG EGG PLANT G. H. BENNETT IS NEW PASTOR HERE

COMES FROM THE DALLES TO KLAMATH FALLS, AND IS A SCHOLAR AND PUBLIC-SPIRITED MAN, SAYS REV. RICHARDS. As stated briefly in the Herald of yesterday, G. H. Bennett of Dallas, Ore., has been appointed as pastor of the Klamath Falls church by the State Methodist conference, in session at Albany. "Rev. Bennett is a scholar, a public spirited man, and strong in social work. I predict success for him at Klamath Falls," writes Rev. E. C. Richards, former pastor of the local church. Rev. Richards has been appointed to the Gold Hill church, with his residence near Ashland, on his ranch. SPECIMEN OF THIS WARM CLIMATE PLANT MEASURES 13 INCHES IN CIRCUMFERENCE. GROWN IN HOT SPRINGS. An egg plant, presumably a plant to be raised in warm sections, free from frost, has just been picked by J. S. Elliott from his garden in Hot Springs Addition. The egg plant measures thirteen inches in circumference, and is not touched with frost marks. Mr. Elliott says his garden was not hit by frost until last night, when everything had matured. Earlier in the season Mr. Elliott also picked a raspberry that measured a fraction over three inches in circumference.

Warranty deeds to Klamath county real estate filed during the last few days show that things are not so "dead" as many would have one believe. At least there are a good number of people who have such confidence in the future of Klamath that they are willing to invest their good money in local soil. The following are the deeds filed since Saturday: Ora W. Engle to First State and Savings bank, lots 3 and 4, block 49, First Addition. The north half of the northwest quarter of section 14, and the north half of the northeast quarter of section 15, township 30 south, range 8 east. Ivy Lamb to B. F. Shepherd, that portion of lot 2, block 15, fronting 45 feet on Main street. H. H. Engineer Here Thursday to Talk Link River Dam

To look over the Klamath project and to investigate the building of a dam across Link River, F. E. Weymouth, chief of construction for the United States reclamation service, will arrive Thursday afternoon from Denver. He will spend several days here, and will be joined about Saturday or Monday by several consulting engineers of the reclamation service. It is the plan of the government to get from the waters of Link River in some manner electricity for pumping purposes on the Klamath project. There is much land south of Klamath Falls that can be irrigated only by pumping from the main irrigation canal. This is unprofitable unless power to operate the pumps can be obtained cheaply and on long time contracts. When the consulting engineers are here it is expected that the California-Oregon Power company will make a bid for the privilege of constructing a dam across Link River, at its head. The power company wants to do this so it can regulate the flow of Klamath River at Copco, where an immense dam and electrical power plant is about completed. In return the company will contract with the government to furnish power cheaply for a long term of years to operate the pump lands on the local project.
