# WHY I AM FOR HUGHES

By **RAYMOND ROBINS**, Chairman Progressive National Convention

"The republican party—though often dominated by the masters of special privilege and made by them the instrument of vast exploitation—has a rank and file of men and women who have proved their capacity to reject false or dishonest leadership. Concealed in moral revolt against human slavery, it was born, baptized and nurtured in the supreme national struggle to maintain the national heritage and fulfill the promise of equal opportunity to every citizen. Is not its rank and file best calculated to support a leadership that will create a national mind and conscience, and having preserved the integrity of the nation against the heresy of succession, will it not develop and maintain a progressive national program of social and economic organization?"

"I hope so, I think so; and this is one of the reasons why I am for Charles E. Hughes."

"We need industrial preparedness with a program of standardization in our economic life. For the workers, we need living wages, fair hours of labor, workshop sanitation and fire protection with accident, sickness, old age and unemployment insurance. Trade agreements and arbitration should take the place of individual exploitation and industrial civil war. For capital, we need the intelligent co-operation of government both at home and abroad. When this war is over we will face the most intense industrial competition that the world of commerce has ever known. A comprehensive protection of the home market and support for American foreign trade is indispensable if we are to preserve industrial prosperity. For both capital and labor we should develop a progressive policy in taxation that will lift the fiscal burdens of government from labor and enterprise and place them upon monopoly and privilege."

"These things and these conditions I believe will be sped on their way by the election of Charles E. Hughes."

"Can these imperative national needs be worked out by a states' rights democratic party that plans a

R. H. DOWNMAN

R. H. Downman of New Orleans, for several years president of the National Lumber Manufacturers' Association, and one of the largest timber owners in Louisiana, has illustrated the effectiveness of a steady campaign of education concerning the merits of a commercial product. He, and others associated with him, had advertised cypress for years as the "wood eternal," and have made it stick. Cypress has come into wide use, particularly for underwater construction. Mr. Downman is also an enthusiast on the subject of federal food control, and will besiege congress early in December in a demand for immediate action on a food control bill. He advocates a giant spillway for New Orleans to help fight the floods, but in this project has started a lively fight with the oyster industry, which claims that the spillway would greatly damage the oyster business.
