Statement of Board of Equalization

In reference to the equalization of the 1916 tax rolls, we as members of the board of equalization, wish to state the following:

As a matter of fact, the total valuation of all timber lands in Klamath county after adjustments were made by the board of equalization are a great deal higher than last year or any previous year.

The adjustment of assessments in townships 38, range 8; 38, range 7; 37, range 7, and 36, range 7, which have been under some discussion, resulted as follows:

Timber lying on the slopes away from the Upper Klamath lake, where same was not assessed at \$2.50 per M were raised to \$2.50 per M.

Timber lying on the slopes away from the Upper Klamath lake, where same was not assessed at \$1.50 per M were reduced to \$1.50 per M, for the reason that same were assessed higher in proportion than other timber lands in the county.

The total assessed valuation of lands adjusted in the above mentioned townships is at the present time after adjustments were made \$5,113,000 higher than same was assessed last year.

The swamp lands in township 36, range 7, were reduced to \$2.50 per acre for the reason that all unclaimed swamp lands are assessed at \$2.50 per acre.

Timber lands which are situated directly across the lake from above-mentioned townships were assessed by J. P. Lee, county assessor, at \$1.25 per m; and the board of equalization raised the same in sections 4, 5, 6, 8, 9 and 17, township 37, range 9, to \$1.50, to correspond with other timber valuations.

Respectfully submitted,
MARION HANKS,
County Judge and Chairman of Board;
C. R. DeLAP,
County Clerk and Clerk of Board.

PARALYSIS GERM MAY BE LOCATED

COCCUS GERM HAS PRODUCED DISEASE OF BABIES WHEN INJECTED IN MONKEYS AND RABBITS, SAYS DOCTOR.

(By United Press)
CHICAGO, Nov. 2—Discovery of what may prove to be the germ of infantile paralysis was announced here by Dr. Maximilian Herzog. If the experiments are supported by later evidence, the conclusions of Dr. Flexner of the Rockefeller Institute will be upset. The work was done by Dr. Herzog as head of the research committee appointed by Dr. John Dill Robertson here and his investigation was carried on at the Cook county hospital largely.

With the newly discovered germ, or coccus, Dr. Herzog has produced the disease in monkeys and rabbits. It is possible, however, that this germ is simply the carrier of a smaller one, which actually causes the disease.

STOCK AND IMPLEMENTS TO BE SOLD AT AUCTION

Horses, cows, wagons, buggies, plows and harness will be sold at public auction at the C. G. Merrill ranch, near Merrill, next Saturday, beginning at 10:30 o'clock. C. G. Merrill is the manager of the sale and Merrill & Moore are auctioneers. George Orfield is clerk.

This sale will be public and free lunch will be served to both man and beast.
