**DO YOU KNOW WHERE THE
BUTTONS ON YOUR CLOTHES
COME FROM?**

It is an interesting little story; if you are a wearer of Hart Schaffner & Marx clothes you will be doubly interested.

The material for the best buttons—and that is the kind Hart Schaffner & Marx use—grows on trees in tropical climates. The growth is in the form of a solid nut, which becomes harder and harder as it ripens; they finally drop to the ground and are still further hardened by exposure to the sun and weather. They become so hard that they are known as vegetable ivory, and for all practical purposes are as hard as elephants' tusks.

These nuts are then turned into buttons. Hart Schaffner & Marx use more of these vegetable ivory buttons than any other concern in the country.

Some electioneering of our own

WE ARE out for office: we want to be chosen to represent YOU in the matter of good clothes. We have a wonderful following now—we want to increase it, and here are good reasons why YOU should support us:

Your interests always come first at this store.

Our salesmen are hired to work for you—not us.

You get Hart Schaffner & Marx clothes here—they're the best in the world.

Because we sell these goods, we are style leaders; our values can't be surpassed.

We can fit any man and guarantee satisfaction or your money back.

**Fight Against Mosquito
Keeps Down Yellow Jack**

By H. B. ROBERTSON.
(United Press Staff Correspondent)

RIO DE JANEIRO, Oct. 1.—(By Mail)—When a mosquito bites an American, does the American telephone to the board of health with the expectation that a gang of men will be sent immediately to swat the mosquito? He does not. He does the swatting, uses what he considers appropriate language, and lets it go at that.

Not so the citizen of Rio. If a mosquito annoys a native of this beautiful Brazilian city he swats, leaps to the telephone and uses what he considers appropriate language into the anxious ear of a board of health employes, and "promptly" there appears on the scene a wagonload of uniformed men, fumigating material and disinfecting implements. The house, garden and neighborhood of the annoyed native is attacked, ransacked, cleaned and disinfected. The mosquito is hunted to his lair and the lair destroyed.

Up to twenty years ago this city was scourged annually by yellow fever. People died hopelessly and helplessly. In one year the epidemic took more than 35,000 lives. Then it was discovered that the mosquito was to blame—that his sting was the sting of death. Relentless war was waged on the mosquito and today "yellow jack" is unknown. There has not been a death from this disease for ten years.

The Brazilian still takes the mosquito seriously. There are 1,500 men employed in this city with the sole duty of killing mosquitoes. Because of the activity of this department it has been dubbed with more or less

annoyed affection the "Corpo de Mata-Mosquitos" (Corps of Mosquito Killers).

Rio de Janeiro's board of health, however, did not win the first prize at the last International Congress on Municipal Hygiene, in Berlin, on its "mosquito record" alone. Rio is also a "flyless" city, owing to the activities of the health board. The international first prize was awarded for advanced results in general city sanitation. Health statistics here compare favorably with any city in Europe or North America. The same "swat the fly" campaign cry that invades the North American summer is heard here, and to this is added "death to the flea and bedbug," for it has been learned that these insects propagate leprosy. Against this imported plague and against tuberculosis great progress has been made by the incessant war on insects.

The scope of the board of health's work is broad. All food is inspected and must come up to standard, or it is destroyed. All meat is killed in a government owned slaughter-house, under the control of the health department, and the meat must be sold to the ultimate consumer within 24 hours of the time it is killed.

Last year a typhoid fever epidemic broke out in the city and it was discovered that the disease originated in truck gardens within the city limits. The board took its complaint to the city council and a law was at once enacted banishing all gardens from the city. There is not a vegetable garden within the prescribed zone today.

Buildings must be built in accordance with plans approved by the board. There is not a house in the

city without at least one bath room. Streets are widened and rebuilt at the command of the board. Buildings are torn down, remodeled or repaired for the same reason.

Great importance is attached to the cleaning of the streets. They are kept and washed every day and at night special gangs complete the work with sprinklers of disinfectants.

Vaccination is compulsory in schools and in the army and navy. Schools, hospitals, asylums and other public and private institutions come under rigid inspection. All garbage and refuse is collected by the "limpa publica" every day and burned. Every household is compelled to pack the refuse in a suitable receptacle and leave it at his street door at night for the garbage collector. This practice has resulted in an unique advertisement for a great American corporation. The Standard Oil company chips kerosene and gasoline to Brazil in five-gallon tin boxes or cans. The Brazilian has found the empty oil can just the thing for garbage cans. Consequently night wagoners and "comp dogs are familiar with these direct outposts of American enterprise.

A free automobile ambulance and hospital service is furnished by the board of health that is a marvel of efficiency. At all hours of the day and night the huge white ambulances can be seen racing through the streets or heard clanging their way to scenes of distress. All traffic makes instant way for these rescue cars. Hundreds of lives are saved every month by their speedy service.

Even after death the Rio de Janeiroan does not escape regulation by the board of health. His body must be buried within twenty-four hours after he is declared dead. He is then buried in quick-lime. He is buried in regulated cemeteries and at a regulated price.

The strict enforcement of the board of health's measures has changed Rio de Janeiro from a "pest hole" to a health resort.

**Journalism School to
Give \$9,000 in Prizes**

(By United Press)

NEW YORK, Nov. 2.—Prizes totaling \$9,000 and five traveling scholarships, each valued at \$1,500, will be awarded at the Columbia University commencement exercises, 1917, for meritorious journalistic work as provided for under the will of the late Joseph Pulitzer, founder of the Columbia School of Journalism. Announcement has just been made.

Candidates may obtain full information by applying to the secretary of the university. Nominations must be made on forms provided and must be in before February 1, 1917.

Five of the prizes are to be as follows: (1) One thousand dollars for the best and most suggestive paper on the future development of the School of Journalism; (2) A gold medal, valued at \$500, for the most disinterested and meritorious public service rendered by any American newspaper during the year; (3) One thousand dollars for the best history of the services rendered to the public by the American press during the preceding year; (4) Five hundred dollars for the best editorial written during the year; (5) One thousand dollars for the best example of reporters' work during the year.

Four other prizes are: One thousand dollars for the best American novel published during the year; one thousand dollars for an original American play, performed in New York; two thousand dollars for the best book on the history of the United States, and one thousand dollars for the best biography of an

American teaching patriotic and selfless service—Washington and Lincoln excluded.

Three of the traveling scholarships will go to the graduates of the School of Journalism to enable them to study European conditions and influences, a fourth to America's most talented student of music, and the fifth to America's most promising art student to be selected by the National Academy of Design.

Curfew Bell Stopped

United Press Service

PENRITH, Wales, Oct. 31.—(By Mail)—The old curfew bell here, which has pealed every night since the days of William the Conqueror, has now ceased to ring. The practice was discontinued as a precaution against hostile air raiders.

while the bowels pour do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste material is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream through the lymph ducts which should suck only nourishment to sustain the body.

A splendid health measure is to drink, before breakfast each day, a glass of real hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, gases and toxins from the stomach, liver, kidneys and bowels; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

A quarter pound of limestone phosphate costs but very little at the drug store, but is sufficient to make anyone an enthusiast on inside bathing. Men wake up with a dull, aching head or have furred tongue, bad taste, nasty breath, sallow complexion; others who have bilious attacks, acid stomach or constipation are assured of pronounced improvement in both health and appearance shortly.—Adv.

**WHEN YOU WAKE
UP DRINK GLASS
OF HOT WATER**

Wash the poisons and toxins from system before putting more food into stomach.

Says inside-bathing makes you one look and feel clean, sweet and refreshed.

Wash yourself on the inside before ties into the blood, causing illness. This is vastly more important because the skin pores do not absorb impurities into the blood, causing illness.

**STOPS HEADACHE,
PAIN, NEURALGIA**

Don't suffer! Get a dime package of Dr. James' Headache Powder.

You can clear your head and relieve a dull, splitting or violent throbbing headache in a moment with a Dr. James' Headache Powder. This delicate headache relief acts almost magically. Send some out to the drug store now for a dime package and a few minutes after you take a powder you will wonder what became of the headache, neuralgia and pain. Stop suffering—It's common. Do you get what you ask for.
