### SUCCESSFUL CROPS

#### IN THE HOME GARDEN

Keep Some of the Varieties Bearing—  
Something Fresh for Every Day.

Patriotic home gardeners should give careful consideration to the succession of crops so that the small amount of land available will be producing something for daily use throughout the season. No piece of ground should be used twice for the same crop, but use such combinations as early peas followed by late fall spinach or turnips; early cabbage followed by late peas; and early corn followed by late head lettuce. Many combinations may be

made to suit the family or individual tastes.

Many of the vegetables planted first will mature early and a little forethought will enable the gardener to have a continuous use of the land and a continuous supply of vegetables. Many vegetables can be grown successfully if not planted until the first of August. Avoid planting one long row of sweet corn if it is possible to have two or more shorter rows side by side. Instead of planting one 40-ft. row, it will be better to plant four 10-ft. rows, as pollination will be more thorough.

With the soil well prepared and fertilized, good seed, and thorough cultivation, much can be done toward reducing the high cost of living.

The First Aid Society met at the White Pelican Hotel, Wednesday afternoon at 3 o'clock. Dr. Cather gave his fourth talk and instructions on first aid, which was most interesting. The next meeting will be held at the White Pelican next Wednesday afternoon at 3 o'clock.

Miss Madge Shive, daughter of Mr. and Mrs. W. T. They will spend their honeymoon making a tour through Southern California, and Yosemite Valley by auto, and on their return will make their home in Stockton, California, where Mr. Goldberg will engage in business. Mr. Goldberg has resided in California for a number of years and was connected with the San Francisco News Company until a short time ago when he returned to engage in business for himself.

The All Needle Work Club held the last meeting before their summer vacation with Mrs. E. S. Phillips, who lives two miles out on the Merrill road. The afternoon was delightfully spent in conversation and fancy work.

Make a list of requirements such as beauty, comfort, convenience, horsepower and the like. Overland has won the verdict of over 400,000 owners after a comparison of such items. If this is not enough to convince you, then judge your Overland by what you cannot see. You cannot see the accuracy, the minute care, nor the patient perfecting that are practiced in Willys-Overland manufacturing methods. But you may know that these things are definite Willys-Overland accomplishments—else it would never have been possible for us to market those 400,000 cars. You cannot see the quality in the materials—the scientific reasons for designs, nor the proven superiority of every part and principle.

These things, and the millions in economies effected by Willys-Overland's vast production, are vital factors in your car although not visible to the layman's eye. But they are visible to the layman's reason—they are seen in continued consistent performance—and they are shown convincingly in the prices that give you a better car for less money. The Big Four—the car that made Overland—exemplifies this excess value. The experience accumulated in the building of over 300,000 similar four-cylinder Overlands has contributed directly to the development and perfecting of this model. Test its superior mechanical excellence and remarkable easy riding qualities—come in and judge for yourself its incomparable beauty of design.
