S. Whiteline is in town today on business.

Chas. Otey is a visitor in town today from Meva.

Mrs. R. K. Hanson was in town today shopping.

John T. Hubbell came in yesterday from Chilcoquin.

Bill Woods of Bonanza is a business visitor here today.

Mr. and Mrs. I. P. Taber of Doris are visitors in the city.

S. E. Icenbice of Pine Grove was in town today on business.

James Henley was in town over night from the Henley ranch.

A. Kinney was in town today on business from his valley farm.

Geo. Keifer and J. Trammel were business visitors in town yesterday.

MUST HELP GOVERNMENT

"It is impossible that the mothers of America with their own hands minister to the needs of the sons they have sent to the front, but they may supply those needs by making it possible for the government to give these sons what the mother's heart desires. The woman who buys a bond stands behind a soldier. She furnishes him with food and clothing and care in illness or disaster just as truly as though she were on the battle field by his side."—Secretary McAdoo.

National Cash Register, six key, drawers, floor cabinet, electric; in perfect condition; for sale very cheap or trade for something.

KLAMATH MEETS
McCLOUD SUNDAY

LOCALS ARE PREPARING FOR A STIFF SESSION ON THE DIAMOND, BUT BELIEVE THEY WILL BE VICTORIOUS

The local baseball club is preparing for a stiff game next Sunday afternoon with the McCloud club at Modoc Park, which is said to be strong, for the third game of the season with outside clubs. The record so far is clean.

The McCloud and Sisson teams have combined this year. Sisson business men guarantee a specified sum each month by subscription, in order to secure one-half of McCloud's home games at Sisson. The McCloud River Lumber company furnishes employment for the players.

Their line-up includes players of known ability here, such as Morgan, catcher, who caught for Sisson when in the Northern California League in 1913. Fans of that section claim he is the best in the bushes.

Koch, first base and manager, formerly was a pitcher, and tried out with Salt Lake in the spring of 1916. He hurt his arm, and was switched to first. He is a big fellow, and a classy first baseman as well as a hard hitter.

Grant, second base, is a home boy, and a sensational fielder. He is not regarded as a dangerous hitter, but is small, and hard to pitch to.

Renfro, third, is a fast infielder, and a terrific left-handed hitter, who, if he gets hold of one will surely disturb the millionaires who view the game from the railroad track. He played with Jack Hern's famous Redding Tigers in the Northern California League in 1913, and looks like the class of the club.

Terrible Terry McCaffery, short stop, is a nice infielder and a heavy hitter. He is known thruout the Sacramento Valley for his ball playing ability. He played second base for Klamath Falls last season during the two games against Weed.

Harper, left field, is not known to any of the local club. Others who have seen the McCloud club in action this season say he is a whiz in the outfield. Daddy Quadisman, centerfield, was with the Sisson club when in the Northern California League, and can get 'em in the outfield. He hits the ball hard also.

Heiniger, right field, is a product of Santa Clara College, and a dangerous hitter. Perry, utility, is not known locally.

It is not known yet who will pitch for the visitors. Peterson is on the club, and reports from there are to the effect that he had the doctors at McCloud treat his shoulder with such success that he is going great guns for the club.

Last Sunday against Dunsmuir he pitched a no-hit no-run game, and struck out seventeen men, while two weeks ago against Weed he fanned sixteen and allowed only four scattered hits.

Peterson sends word to the local club that Klamath will be lucky to get even first base against the McCloud organization. It is also rumored that Pitcher Ad Machold, who had a tryout with the San Francisco Seals this spring, will join the McCloud club this week.

McCloud will make the trip here in machines, leaving there at 1 o'clock Saturday afternoon.

KLAMATH BOY TO
GO TO FRANCE

TURPIN TO GO—TED MONTGOMERY ON BOARD SHIP "SOMEWHERE NEAR AMERICA" IS THE WORD FROM TEXAS

The following letter has been received by Mr. and Mrs. Turpin of this city from their son Alfred, who has been studying aviation at Fort Sam Houston, Texas.

FORT SAM HOUSTON—Wired you last night I was leaving here, and will start Friday. There are 2,000 soldiers leaving here for and a lot for France.

There are 500 aviators going also, and so you won't hear from me as often as you have. You need not worry, for I will be all right and safe. We got orders to pack and leave in five days for There are three truck trains leaving today and 1,000 infantrymen left last night. Five thousand will leave in about ten days for and 2,000 more in the next two months. They are working hard in the office to get things ready to go, and it is so hot here today the sweat is just pouring off of me, but I am well and fat, and feel as if I could lick Germany myself.

General Pershing has left here already, and he says he doesn't expect to ever have to go into the trenches, as Germany only wants peace, and considers this the best way for her to get it. Everybody in San Antonio is joining the army, and volunteering to go to France. They say the old flag's up, and as long as Uncle Sam's got a soldier alive they can't take her down. Well, tell everybody good-bye for me, and I will come home as soon as I get back from the old country.

The following letter has been received by Mrs. L. P. Montgomery from Ted Montgomery, who is on board the U. S. S. Huntington. The envelope was marked "passed by censor," and was mailed at Warrington, Florida. His address is U. S. S. Huntington, care of postmaster, New York city.

WARRINGTON, Fla.—I am a long way from home now. I am down where the climate is like old Arizona, but am not allowed to tell where, but I am all right.

I have seen the Panama canal and Colon, and the canal sure is some sight.

Yesterday was Decoration Day, and the ship was fumigated, and now we're not under quarantine.

Bill McMillan didn't get transferred after all. Together with Bill and I there are five Klamath fellows on this ship: Harley Johnson, Otis Jacoby and the fellow that worked for Joe O'Brien.

I got your candy the other day. My, but it tasted good! The kids of the factory made candy and sold it on the ship.

We have swimming twice a day, and it sure is great. There is a piano and a phonograph on the ship, and after supper the boys crowd around the piano and sing and play the phonograph.

The wind from the south is hotter than All we wear is white trousers and an undershirt.

Some of the boys are a little dissatisfied, but I like it fine. We've been on the water over two weeks and I haven't been seasick yet.

Auto-Condensation

The Ideal Treatment for Hardening of the Arteries, Apoplexy, Bright Disease, High Blood Pressure, Etc.

Prevention of disease is the highest aim of modern medicine. By recognizing the causes and conditions that predispose or lead up to Arteriosclerosis, Apoplexy, Brights Disease, etc., a very large proportion of these cases can be prevented.

And when the use of Auto-Condensation treatment for reducing high arterial tension and eliminating toxic substances is more widely used, this form of treatment will be doing as much for suffering humanity as anti-

toxin is doing for Diphtheria.

To recognize these various diseases the taking of the blood pressure is the most highly important test, although not yet in general use, it has been made a routine feature of all life insurance companies in the examination of all applicants.

It is one of the means by which the presence of grave diseases, especially of the kidneys and blood vessels, is determined, while still in an incipient and curable stage.

Patients taking Auto-Condensation treatment for high blood-pressure, also showing the blood-pressure instrument in operation for recording blood-pressure findings.

The above picture shows the complete equipment that has been installed in the office of Dr. C. E. Wheeler of this city, where this treatment is given in every detail. Dr. Wheeler, who is doing considerable work along this line, states: "That a permanent increase of blood pressure as found in some cases is an indication of obstruction in the circulation due to spasm of the blood vessels, or to narrowing or obliteration of the vessels through hardening of the arteries. This elevation of blood-pressure is one of the early symptoms of grave disease of the kidneys, liver, heart and blood vessels. When recognized soon enough, this diseased process may be arrested, and in many cases greatly improved."

"Any man or woman past forty, who is under considerable strain, or carrying a heavy load in his or her business or professional work, and who finds difficulty at times in concentrating his attention, awakens in the morning more tired than on going to bed, has occasional spells of dizziness or light-headedness, or notices occasional twitching and numbness in the extremities, owes it to themselves to ascertain whether or not these symptoms are pointing toward the development of hardening of the arteries."

"In brief, the effect of old age may be discounted."

FEDERAL TIRES

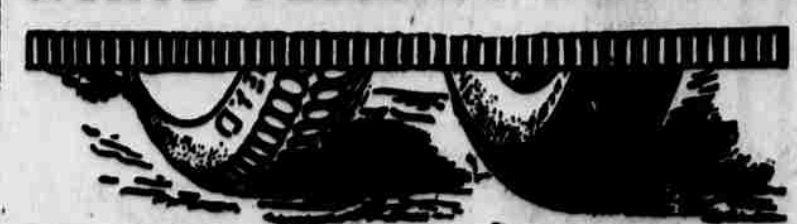

Buying Federal Tires is an investment—"Extra Service" is the dividend.

"Extra Service" means greater mileage—More than that that it means greater freedom from rim cuts, blowouts and other common tire troubles.

Much of this "Extra Service" is directly due to Federal Double-Cable-Base Construction—the big strength and safety feature that alone makes Federal a dividend paying investment.

WHITE PELICAN GARAGE

Cheap Tools Are
False Economy

WHETHER you are a carpenter buying tools for every-day use, or whether merely a house-builder getting them for occasional repair work, you cannot afford to buy other than the best.

Cheap tools will break, bend, or nick and will cost you many times the difference paid for good tools.

We make a point of carrying nothing but the best goods in our line. An inspection of our stock will prove that this is no mere assertion. Get the habit of coming here for your hardware.
