SHEEP MEN PLAN TO WARM SHEEP WITH GAS

SPOKANE, Wash., July 2.—Thru the use of natural gas, Benton County, Wash., sheep men are planning to provide warming stations for their flocks during the cold winter months, thereby reducing the usual big losses and moving the lambing season ahead about three months. Already there is a natural gas well in Benton County, and some sheep men have utilized the gas by building a great hood over a burner and bringing the sheep under the hood during cold weather.

The experiment has proved successful, and one company is now planning the drilling of additional wells for gas, the intention being to utilize the surplus gas for keeping the sheep warm over a large acreage.

District Reserve Report Indicates Much Prosperity

SAN FRANCISCO, July 2.—According to the monthly bulletin to be issued tomorrow by John Ferrin, chairman of the federal reserve bank of San Francisco, trade conditions in the Twelfth Federal Reserve District are active and increases are shown generally in bank deposits, clearings and building permits. The report reads as follows: Maximum production and minimum consumption of food stuffs is a sound war principle. At least in production this district is putting forth a splendid effort. The fall land winter were unfavorable for grain, and the spring was cold and backward, but, in spite of this, and because of the spurts both of patriotism and the acreage of spring planting, amounting to 33 per cent more than last year in Washington, Oregon and Idaho. The government report, June 1, indicates a yield in this district of wheat, barley and oats in excess of that of last year.

In California the deficiency in precipitation has been offset by cool weather during the early summer, which has been ideal for many crops. Hay, which was generally short last year, will show a greater tonnage this year. Alfalfa will exceed 4,000,000 tons, against 3,000,000 last year. Growers of deciduous fruits have been greatly relieved by the announcement that such fruits will be classed as necessary food, and not as a luxury, assuring greater demand, better prices and more cars for moving the crops. A generally larger yield is indicated.

The crop of naval oranges, during the season just closed, has been one of the best in years, aggregating 27,153 cars, as compared with 22,225 cars last year. Shipments of Valencia oranges are just beginning, and likewise promise to be larger. Shipbuilding is probably the most active industry on this coast. Seattle shipyards have \$20,000,000 of contracts, while those of Portland and Tacoma have as much more. The contracts of the Puget Sound district are believed to exceed those of the San Francisco district.

In California during May, petroleum production averaged 261,000 barrels per day, and shipments 305,300 barrels, resulting in a reduction of stored stocks of 125,318 barrels. The increasing shortage of crude oil is rapidly creating a critical fuel situation on this coast. It is reported that the Southern Pacific, using crude oil as fuel for its locomotives, is unable to supply its requirements, and that by September 20 per cent of its motive power will be put out of commission unless new supplies of crude oil become available.

Not in ten years has the Pacific Northwest lumber market been so active and remunerative as at the present time. Demand has been such that many large producers are now absolutely out of the market. Lumber production is near the maximum possible. Food production in this district promises to be unexpectedly large, and materially greater than seemed probable a month ago, altho not of record volume. Trade is active. Bank deposits, clearings and building permits all show increases.

A Patriotic Bathing Suit

It may not be in good taste to wear the colors of the United States too conspicuously this year—these colors are for the men at the front who are giving their lives for the women who wear this clothing—but many women insist they will make some show of patriotism, and this costume will answer the demands of those who don't want to be too conspicuous. The coat of this suit may be developed in blue taffeta. The one piece over tunic may be made of stripes in red and white.
