RED CROSS TO OPEN QUARTERS

LOCAL CHAPTER TO ESTABLISH WORK ROOMS IN THE DOMESTIC SCIENCE BUILDING AT THE CENTRAL SCHOOL

That the local Red Cross Society accept the offer made by the school board to make use of the rooms of the domestic science department in the rear of the Central school, was decided at a meeting of the body at this week's meeting. Arrangements are now being made for an active season.

It is expected that the materials for the manufacture of Red Cross supplies will soon arrive and the rooms will then be opened for three evenings each week. A call for volunteers among the women of the city is made, and it is hoped that a large number will respond without being urged.

The Ladies' Aid Society of the Presbyterian church will occupy the rooms Thursday afternoons, and will vote the time entirely to Red Cross work.

It is hoped that as soon as the rooms are made available to the public, the example set by Salem, where more than thirty women gathered every day, will be followed. The rooms are well ventilated and thoroughly equipped, and are in every way adapted to the purpose for which they will now be used.

From Navy To Army

Major General Sir Eric Geddes, who passed from the British ministry of munitions to service with the army and has done splendid work in each capacity, will fill the post of controller of the navy, with temporary rank of vice admiral, on the board of admiralty. Sir Eric Geddes has had a most picturesque career, from traffic manager of an Indian railway, a lumber and railway expert in Ohio, a maker of munitions, a director general of military railways, a major general, and now a vice admiral. Not one of the least distinctions that Sir Eric Geddes achieved was when he was especially asked for by Sir Douglas Haig. It was an unusual procedure, but the war office consented, and Sir Eric was permitted to join as a major general and as director general of transportation.

DEATH OF PET ROOSTER CAUSES "CHICKEN HEART"

C. W. Coggins does not believe in war. Since he saw his pet chicken killed when he was a boy he has not touched meat. This statement was made yesterday by his brother, Herbert L. Coggins of Oakland, when he and his wife furnished ball before United States Commissioner Krull for C. W. Coggins, who is under arrest at Sacramento on a charge of failing to register.

The brother explained the younger man had conscientious scruples in regard to war and the taking of life. "He has been consistent in regard to this since he was a little chap and his pet rooster was killed," said H. L. Coggins. "For years we have tried to persuade him to eat meat, but he has persisted in being a vegetarian. He is not disloyal to his country, and would serve it in any other way than bear arms."

Young Coggins will waive his preliminary hearing at Sacramento.

RUSSIA FACES CIVIL CRISIS

SOCIALISTS FRAME BILL TO ESTABLISH INDEPENDENCE OF FINLAND—FORCE OF ARMS MAY BE EMPLOYED BY RUSSIA

PETROGRAD, July 13.—The Finnish diet Thursday passed second reading on a bill virtually establishing the Finnish independence.

The introduction of the bill created serious crisis here. President N. C. Tehelide of the council for workmen-soldiers delegates, has gone to Helsinki in an effort to settle the differences. It is said that the socialists engineered the proposed law.

The newspapers say that it is impossible for Russia to allow Finland to secede. There is a hint of armed intervention.

CONDENSED MILK PLANT POSSIBLE

ADVANTAGES OF KLAMATH COUNTY ARE RECOMMENDED FROM NORTHERN OREGON. CONDENSORY MAY RESULT

Klamath Falls is being considered as a location for a milk condensory plant by a Southern firm, on recommendation of a bank in Northern Oregon, and an appeal has been made to L. Jacobs of this city for authentic information regarding the resources of the county. In reply to the letter, Mr. Jacobs has furnished the data requested, and he believes the launching of the enterprise here is more than a possibility. Mr. Jacobs said:

"While there are only about 2,000 cows being milked in the county at present, and the supply from these is absorbed by the creameries and the cheese factories, there is no reason why this number should not be multiplied many times, as the dairy business is especially adapted to this section." The letter follows: "We have written a bank in Northern Oregon, regarding a milk condensory project, and they have stated in their correspondence that Klamath Falls is an ideal location for such a plant.

"Will you kindly furnish us with such authentic data as you may have regarding the milk production within a radius of seven miles of your township; also the possibilities of obtaining from 50,000 to 60,000 gallons of milk per day?"

"The larger per cent of this milk would find its way thru the shipping channels of San Francisco, especially there being an abnormal demand at this time for condensed milk."

"Upon receipt of information from you, we will be pleased to give you more substantial facts regarding the same, but at this time we wish to assure you that our clients are substantial business people."

Admiral Commanded Naval Convoy

Rear Admiral Albert Gleaves, U. S. N. is the man who commanded the naval convoy which protected the first great fleet of transports from an American to a French port. He is a native of Tennessee, and will be 59 years old on January 1st next. Graduated from Annapolis in 1873, he passed thru the various junior grades and was commissioned a captain in July, 1909, and a rear admiral in 1915. As a captain he achieved honor of having commanded three of the dreadnoughts of the Atlantic fleet, the only officer in the navy who has ever had that distinction.

It was Admiral Gleaves who commanded the flotilla of destroyers which rushed to the rescue of the merchant ships which were torpedoed and sunk off Nantucket in October of last year by the German submarine U-53.

NEW STOCKMAN IS OPTIMISTIC

RESERVATION RANCHER SEES GREAT FUTURE POSSIBILITIES FOR KLAMATH COUNTY IN STOCK RAISING WAY

C. S. Burton, who has recently purchased a tract of the Indian reservation land near Modoc Point, is one of the new walking advertisements for Klamath County. He is in town on business today, and reports that he is unusually pleased with the season's prospects there, and believes the opportunities for successful stock-raising nowhere equal those here.

Burton came in at the time of the Tule Lake land drawing in April, and being successful in drawing a claim, he investigated the offerings on the reservation, and located there. He is a stockman of a great many years experience. He says that the Indians have a wonderful chance with the irrigation system provided for them, but they must first learn that the water is something more than a plaything. Their main object, he declares, seems to be to turn on the water with all possible force, and watch it run, several of them turning off water in order to get increased speed of flow for one of their neighbors.

Looked Like the Big 'Un

ROME, July 13.—Among the prisoners captured in the big Italian push on the Carso front is an officer who bears such a strong resemblance to Field Marshal von Hindenburg that he was at first taken for the latter. The prisoner, a major of infantry, was observed in the collecting station by an Italian intelligence officer, who exclaimed:

"What! Have we got the great von Hindenburg?"

"No," replied the major, "I am not von Hindenburg, nor any relative of his. I am merely a poor wretch who will do no more fighting."

GAP IN MILITIA MET BY DRAWING

MORE THAN HALF A MILLION VACANCIES IN REGULAR ARMY MILITIA WILL BE FILLED FROM THE REGISTERED LIST

WASHINGTON, D. C., July 13.—The war department has announced that 687,000 men will be selected from the registered list for the first national war army, to fill vacancies in the regular army militia.

Washington is to furnish 7,296, Oregon, 717; California, 23,606, Idaho, 2,287, Nevada, 1,051, and Montana, 7,872.

It is understood that the reason for Oregon's quota being so small is on account of the large number of credits the state has received from its enlistments in the regular army and the state militia. Oregon has 6,657 men in the guard and 1,974 in the regular army.

U. S. BOYS WILL POW-WOW ABROAD

WIRES TO FRONT WILL BE REDUCED

The Western Union Telegraph company announces that special arrangements have been made under which cablegrams of a social character may be sent to soldiers, sailors and nurses of the American expeditionary forces in England and France, such cablegrams to be charged on a word basis without a minimum charge.

They will be transmitted as traffic conditions permit, and will be delivered immediately upon receipt. Similar arrangements have been made for the acceptance of messages from members of the expeditionary forces in England and France to their friends and relatives in the United States. These cablegrams to and from France will be handled by post between London and France. The rates will be nine cents per word from points on the Pacific coast.

SISTERS' SCHOOL WILL COMMENCE IN SEPTEMBER

TEMPORARY BUILDING WILL BE PUT UP AT ONCE

All Public School Grades and Two Years of High School Offered at Day School and Boarding Academy to Be Opened This Fall—Brick Buildings Later—Work to Begin Next Monday.

Along with the railroad and the new industries started here this year comes more evidence of the progress Klamath Falls is making in the announcement today by Father Hugh Marshall of the Sacred Heart church of a new day school and boarding academy, which will be opened early in September.

The ground for this new institution was purchased last fall from C. K. Brandenburg, near the corner of Eighth and High streets, and the Sacred Heart church was moved to this property. The new school will adjoin it. Contracts will be let Monday for a temporary wooden building, which will be used until the war conditions have subsided sufficiently to permit the erection of the brick structure, for which plans have been made.

The new school will contain all the grammar grades and two years of the high school. Father Marshall announces that the syllabus of the Oregon school department will be followed, as in the public schools.

Boys and girls will both be admitted to the day school, but girls only and boys under 11 will be admitted to the boarding academy.

The seven sisters in charge are the Sisters of Charity of the teaching Order of Mino, chartered by the State of Kentucky and the Catholic University of America.

The school will be supported by a tuition fee charged each pupil.

Although a Catholic institution, children of all religions or no religion are admitted, provided they are well behaved. No coercion or undue influence is brought to bear on children of non-Catholics.

Applications for admission to the schools should be sent in immediately to Rev. Hugh Marshall, pastor of the Catholic church at Klamath Falls.

COAST PATROL IS STRINGENT

ROBERT TURNER WRITES OF CAREFUL WATCH KEPT AT FORT STEVENS FOR SIGNS OF ENEMY'S U BOATS

Activity of the coast defenses is shown in a letter just received by Mrs. S. B. Turner from her son Robert, who is now with the regular army at Fort Stevens, at the mouth of the Columbia.

The troops have been encamped for some time about a mile and a half from the guns of the fort, but they have now been ordered to the guns, and a constant watch is kept. It is believed by the boys that the lookout is principally for submarines.

A call was made to man the guns while Robert was writing the letter, but it was evidently a false alarm. They expect a chance to shoot at something at any time.
