Klamath County News

PLEVNA PICKINGS

PLEVNA, July 20.—Everybody in this vicinity is busy in the hay fields.

Joe Foster and George Shell have finished putting up the first crop of alfalfa on the R. V. Ess ranch.

George Heavilla is helping L. D. Kenaston in the hay fields.

James A. Bushong was in Klamath Falls shopping Tuesday.

C. G. Kerns and wife were shopping in town Tuesday morning.

G. F. Sevis came out from town in his new Ford and took the H. A. Talbot family to Worden to visit Mrs. Talbot's parents, the Gordon family.

Will Lambert of Round Lake called on Jim Foster Monday evening, en route home from Klamath Falls.

George Heavilla and family spent Sunday at the home of L. D. Kenaston.

George Ager and family were in Klamath Falls Monday.

Suburban acre tracts, 615 Main street. Sale begins July 20. 10-1f

CROP SITUATION THROUGH OREGON

PORTLAND, July 20.—"Late sown barley, oats, rye and spring wheat through Oregon are in poor condition, and if rain is much longer delayed, will not even make hay," reads the Portland weather bureau's summary of crop conditions for the week ending July 14th, issued here yesterday. The remainder of the summary follows:

"While the hot, dry weather was favorable for haying and harvesting, drought conditions were serious in dry farming districts, and crops on light soils were being badly damaged by desiccating winds.

"Under irrigation, with water in abundance, corn, potatoes, sugar beets and beans were doing well, but without water were burning up.

"Early sown barley, oats, rye and spring wheat were fair to good.

"Winter wheat on heavy land appeared in good condition, but on the lighter soils, where water is not available, this crop is scorching badly.

"Cutting of the second crop of alfalfa is now under way with the fields generally short. Pastures and ranges are becoming brown, but stock continues in good condition.

"Fruits and berries are as good as could be expected under the adverse conditions, and would be greatly benefited by rain."

Etms accident and health policies are the standard. Ask Chilcote. 9

Clear, Peachy Skin Awaits Anyone Who Drinks Hot Water

Take an inside bath, before breakfast helps us look and feel clean, sweet, fresh.

Sparkling and vivacious—merry, bright, alert—a good, clear skin and a natural, rosy, healthy complexion are assured only by pure blood. If only every man and woman could be induced to adopt the morning inside bath what a gratifying change would take place. Instead of the thousands of sickly, anemic looking men, women and girls, with pasty or muddy complexions; instead of the multitudes of "nerve wrecks," "rundowns," "brain fags" and pessimists, we should see a virile, optimistic throng of rosy-cheeked people everywhere.

An inside bath is had by drinking each morning before breakfast a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour fermentations and poisons, thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

Those subject to sick headaches, biliousness, pasty breath, rheumatism, colds; and particularly those who have a pallid, sallow complexion and who are constipated very often, are urged to obtain a quarter pound of limestone phosphate at the drugstore, which will cost but a trifle, but is sufficient to demonstrate the quick and remarkable change in both health and appearance awaiting those who practice internal sanitation. We must remember that inside cleanliness is more important than outside, because the skin does not absorb impurities to contaminate the blood, while the pores in the thirty feet of bowels do.—Adv.

Pacific Fish Will Feed the World

SAN FRANCISCO, July 20.—Members of the state fish and game commission and others familiar with a status of the food supply are looking to the Pacific Ocean to save the situation in the event the world is threatened with food shortage.

The old ocean has a full larder, the commission declares, and the United States can easily draw on that larder to feed itself and its allies as well. Of course, the experts maintain, the eating of fish would have to be supplemented with something else in order to maintain the proper food balance and prevent pellagra, a disease caused by eating too much of the same sort of food.

The commission has been advised that Canada has vast fish reserves which have not been touched. These reserves are being maintained against the day that Canada will no longer be able to produce land crops sufficient for her needs.

In order to relieve the food situation as much as possible, the fish and game commission is campaigning for a more widespread river, bay and ocean fishing. In circulars it calls attention to the fact that 60,000,000 pounds of sardines were packed from January 1st to June 15th of this year in California—three times the amount packed in all of 1916.

The commission is urging the catching of the blue-gill sunfish and the calico bass in the San Joaquin and Sacramento rivers because of the vast amount of these types of fish. They are especially numerous in the delta region of the Sacramento Valley. These fish, experts state, are far better flavored and more palatable than trout. Striped bass are now being

caught in vast quantities, and the commission is trying to increase the field for this fish. Toward this end of the state the commission is encouraging the placing of striped bass in the waters near San Diego. This fish, with the famed California tuna, 30,000,000 pounds of which was canned last year, is expected to make Southern California loom up big if ever the ocean is called upon to bolster up the uncertain land produce supply.

The commission is receiving active co-operation of the United States bureau of fisheries in marshaling the food potentialities of the ocean. The bureau is collecting all the information at its disposal on the canning of fish, and has issued a recent bulletin telling housewives how they may preserve mussels in this fashion.

Every harbor and river in the state is a vast fish cache, the commission reports, and every state on the Pacific rim can tell the same tale. Added to this there is the ocean fishing and the vast Canadian reserves.

Regarding the crustaceans there are the vast oyster beds off Central California, the Humboldt crab areas and the sand and horse clam beds which extend from one end of the state to the other. The crustaceans alone, in the opinion of the commission, could play a big part in the replenishing of the national larder in a time of food stress.

The government has advised the commission to keep on with its campaign for the development of ocean and bay fishing for the twofold purpose of augmenting the wartime food supply and forcing equitable food prices at all time thru a plentiful output.

Colonel Edward H. R. Green, son of the enormously wealthy Hetty Green, who gave half her fortune to him, has sailed away for Southern waters on his large yacht, the United States, with his bride, whom he married in Chicago recently.

Hetty Green's Son Has Sailed Off On Honeymoon

Colonel Edward H. R. Green, son of the enormously wealthy Hetty Green, who gave half her fortune to him, has sailed away for Southern waters on his large yacht, the United States, with his bride, whom he married in Chicago recently. He would not admit till the last minute that he was to be married, but he did say that as a wealthy and well advertised bachelor he had received 9,000 letters from women who wanted to marry him.

Medal From Kaiser Went Stop This Indian

WASHINGTON, July 20.—Quana Washooha, Comanche Indian, has a medal the kaiser once gave him for expert marksmanship. This won't keep him from trying some of that shooting ability on the kaisers "gray-backs," however.

FEDERAL HELP TO ABERDEEN WILL APPEAL TO SUPREME COURT

TROOPS FOR GUARDING MILLS AND ROADS ARE ON THE WAY, ACCORDING TO WORD RECEIVED BY GOVERNOR

OLYMPIA, Wash., July 20.—Governor Lister has been notified that the federal government is sending a small detachment of troops to Aberdeen, where the sawmill strike is in progress.

Arrangements for the guarding of the bridges over the Skagit River, near Sedrowooley and Mt. Vernon are also being made.

Permission to appeal their cases to the supreme court has been granted Emma Goldman and Alexander Berkman by Associate Justice Brandies. The two are serving sentence for conspiring to impede the draft law.

Mrs. Horace Manning and daughter Miss Marie Rambo, left this morning for Portland, to be with Mrs. Manning's mother, who is reported very ill there.

PEACE NOW LOOKS GOOD TO GERMANS

INCREASING SENTIMENT FOR ENDING WAR IS SPREADING THRU EMPIRE—RESOLUTION TO BE UNANIMOUS

AMSTERDAM, July 20.—Increasing sentiment for peace in Germany is seen in an article in the Berlin Tageblatt, which says that a committee of a majority of the parties of the reichstag have unanimously decided to vote for the peace resolution.

Previously, the Tageblatt says, the committee was divided, but that now twenty-one deputies will vote for the resolution.

KAISER'S MONEY IS SCATTERED IN U. S.

WASHINGTON, D. C., July 20.—Evidence that millions of dollars of German gold is still being poured into effective propaganda work among Americans, was laid before the state department recently.

Statements of international reputation claim that Germany bought papers are being published unhindered under the very nose of the American government.

"A hundred ministers are using their holy offices to turn Americans into German sympathizers," a prominent statesman declared.

"The condition is not local, but is country-wide. One of the biggest papers in the kaiser's pay is being published in the East." He declared the allies should organize their own propaganda work more strongly in neutral countries.

GARBAGE FIRMS QUIT AS RESULT OF "CONSERVATION"

SAN DIEGO, July 20.—First city in the United States to announce the results of the national "doctrine of clean plate," Coronado, the millionaire suburb of San Diego, has made the official announcement that its garbage business has fallen off 75 per cent since the new ideas of food conservation became recognized as a patriotic principle.

Wives of the wealthy, as well as those of the middle classes, are said to be practicing conservation so effectively as to have caused the firm having the garbage collecting contract to intimate that it will make no effort to secure a renewal of the privilege upon the expiration of the contract next month.

NO HEADACHE OR NEURALGIA PAIN

Get a 10 cent package of Dr. James' Headache Powders and don't suffer.

When your head aches you simply must have relief or you will go wild. It's needless to suffer when you can take a remedy like Dr. James' Headache Powders and relieve the pain and neuralgia at once. Send someone to the drug store now for a dime package of "Dr. James' Headache Powders. Don't suffer! In a few moments you will feel fine—headache gone—no more neuralgia pain.

IF KIDNEYS ACT BAD TAKE SALTS

LOOK YOUNG! BRING BACK ITS NATURAL COLOR, GLOSS AND ATTRACTIVENESS

Common garden sage brewed into a heavy tea with sulphur added, will turn gray, streaked and faded hair beautifully dark and luxuriant. Just a few applications will prove a revelation if your hair is fading, streaked or gray. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get a 5-cent bottle of Wyeth's Sage and Sulphur Compound at any drug store all ready for use. This is the old time recipe improved by the addition of other ingredients.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur Compound, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and after another application or two, your hair becomes beautifully dark, glossy, soft and luxuriant.

This preparation is a delightful toilet requisite, and is not intended for the cure, mitigation or prevention of disease.—Adv.
