NEW LIGHT AND WATER RATES TO START SEPT. FIRST

The new rates ordered by the public service commission are being published in installments. This is the second installment. The third will appear tomorrow.

Lighting; General Rule—Cooking and heating devices up to 800 watts individual capacity and single phase motors not exceeding three-quarters horsepower may be supplied thru the lighting meter under the lighting rates without increasing the active load or the minimum charge.

Combined Lighting, Cooking and Heating—This rate applies to residences using complete lighting, cooking and heating equipment, and to commercial heating and cooking loads where lighting service is carried on the regular commercial lighting rate.

First 10 kilowatt hours or less, per month, \$3.

Next ten kilowatt hours, each, 5c.

Excess, 2c.

Water heaters, when so connected with double throw switch that the demand of the heater cannot be coincident with the demand of the cooking equipment, will be supplied with energy at a flat rate as follows:

For each watt of connected load, 3 1/2 mills.

Power—First 50 hours used per month per horsepower (output) or first 60 hours used per month per kilowatt (input) of demand will be at the primary rate.

All additional use will be at the secondary rate.

Primary rate—First 200 kilowatt hours, each, 5c.

Next 400 kilowatt hours, each, 5c.

Next 900 kilowatt hours, each, 3c.

Next 1,500 kilowatt hours, each 1 1/2c.

Excess, 1/2c.

Secondary rate—First 1,000 kilowatt hours, each 1 1/2c.

Next 4,000 kilowatt hours, each 1c.

Next 5,000 kilowatt hours, each 1/2c.

Excess, 1/2c.

Minimum charge—First 2 horsepower, each \$1.50.

Next 8 horsepower, each \$1.25.

Excess, \$1.

In connection with the above power rates the utility shall file, subject to the approval of this commission, suitable rules and regulations for the equitable determination of the demands of consumers' equipment to be used thereunder.

Air and Water Heating, temporary rate—Although service of the present water and air heating customers under existing rates has been found unreasonable, equity demands that these consumers, who have purchased equipment on the attraction of the present rates, be given due consideration for the good faith in which such purchases were made. In view of these conditions, the commission believes the following adjustment will wield justice to all parties concerned:

The present air heating rate will

be continued for a period of only two years and for none other than present customers for heaters which have been in use during the past year.

All 2 kilowatt water heaters now used in connection with ranges will be supplied for a period of only two years, when installed with double-throw switch to prevent the coincidence of the demand of the heater with that of the cooking equipment, at a flat rate of \$5 per month.

Special Summer Cooking Rate—The company may, if it considers the demand of sufficient extent for justification, file special rates for small summer cooking loads. It appears that such service might become attractive to consumers not ordinarily cooking with electrical energy and the commission suggests that the following schedule be filed if it should become desirable to develop this class of business.

This rate is applicable only to customers connecting and using devices of from 500 to 1,000 watts individual capacity during the five months period of service between the April and September meter readings.

First 30 hours use of the consumer's active load will be at the regular residence lighting rate.

Excess over 30 hours use of the active load, per kwh. 4c.

Cooking devices included above are ovens, hot plates, etc., for general cooking purposes.

Irons, toasters, percolators, etc., alone do not entitle customer to this rate; but their consumption, when used in connection with cooking devices, will be billed at this rate.

Fifty per cent of first 1,000 watts connected.

FAKE GEOLOGISTS FROM WASHINGTON

WASHINGTON, D. C., Aug. 1.—Sometimes happens that men who have no connection with the geological survey of the interior department pass themselves as members of that organization, either to invest themselves with unmerited importance or to obtain information or facilities that might otherwise be denied them. It should be generally known to the public that each member of the federal geological survey carries an identification card signed by the secretary of the interior and the director of the survey, and he is always ready to produce this card on request, should there be any question of his official standing.

Recently a person giving his name as George H. Smith has been reported from Oregon as representing that he is employed by the United States geological survey "to look up minerals for it." There is no such name on the rolls of the survey, and anyone bearing it who claims to be doing work for the United States geological survey in Oregon should be treated as an impostor.

MEN IN HAWAII NOW REGISTERED

HONOLULU, Aug. 1.—The men of Hawaii between the ages of 21 and 30 registered yesterday under the registration provisions of the selective draft act.

Hawaii is several weeks behind the rest of the country because, it is stated by local army authorities, this territory already has more than its quota of men under arms, the personnel of the National Guard being in excess of the number of soldiers Hawaii would be called upon to furnish for the first draft.

Registration in Hawaii is a much more complicated and difficult problem than it was on the main land, on account of the polyglot nature of the population. The registration board was many weeks in making preparations for the registration, for the reason that there are dozens of different nationalities represented in the population, and it was necessary to take steps to bring to their notice, in their own several languages, the necessity and requirements for registration.

A large staff of interpreters had to be assembled, to translate into Hawaiian, Chinese, Japanese, Spanish and many other languages the registration proclamation and the instructions for registration. This staff has been at work for weeks, and the several islands of the territory have been plastered with notices in the various languages, impressing the male population the necessity for all those not specifically exempt to register, whether liable for draft or not.

Many of the Orientals have shown great interest in the work, and not a few Japanese and Chinese have volunteered their services free as translators.

In proportion to the number of those liable for draft, Hawaii may be called upon to furnish a heavier quota of soldiers than any other part of the United States. This is because while all males between 21 and 30 years of age and not exempted as members of the National Guard or other military bodies, are required to register, only citizens are liable to draft, yet the number to be drafted is based upon total registration, and not upon citizen registration.

And in Hawaii considerably more than half to the population is non-citizen, and an inordinate proportion of it is male and unmarried. This is particularly true of the Japanese, who are nearly half the total population of the islands. Most of them are comparatively young men who came to Hawaii as laborers before the so-called "gentlemen's agreement" between Japan and the United States went into force, and who came as single men. Many of them have since sent to Japan for "picture brides," but the proportion of unmarried men among them is very large.

It is roughly estimated that out of a total population of 226,000 in the territory there will be found to be as the result of the registration approx-

imately 15,000 men who are liable for military service under the terms of the selective draft act. And virtually all of the 15,000 will come from the white and Hawaiian races, the Orientals, except such as were born here, being ineligible.

The work of registration is being handled by the regular election machinery, presided over by the county clerks and sheriffs. The offer of the republican and democrat territorial committees to give the use of their machinery was declined by the registration board on the ground that it might give a political tinge to the occasion.

Registration day was declared a legal holiday by Governor Finkham, and the result was that practically all of the business houses were closed in order that nothing might interfere with the employes of those houses registering.

SON BORN AT HUNSAKER HOME

Born to Mr. and Mrs. Ray Hunsaker, last night, a nine-pound boy. Name Ray Lee. Dr. R. R. Hamilton was in attendance.

TURKISH TROOPS IN BAD PLIGHT

ATHENS, Aug. 1.—Latest Hava dispatches from Anatolia say that after the abdication of King Constantine, virtually all of the Greeks who lived near the coast were sent to the interior.

The Turkish soldiers in Anatolia are said to be in a bad plight. They are miscellaneous armed — with Mausers, Martins and almost any available kind of rifles — and are commanded by German non-commissioned officers, whose rule is such as to provoke an irritation that cannot be disguised nor concealed.

The situation is the worse from the fact that the fare of the troops is getting steadily worse. Meat which once was plentiful and cheap, is now almost unobtainable because the Germans are said to have sent away everything they could lay hands on, even to dead horses.

Helping You Hold Your Crop

The Federal Reserve Banking System, established by the government, stands back of the cotton planter.

Our membership in it gives us special facilities to help him hold his crop until he can obtain fair prices for it, instead of rushing it to the market.

We can borrow at special rates from our Federal Reserve Bank on loans secured by warehoused agricultural products.

Before you market your crop come in and talk the matter over with us. We may be in a position to save you some money.

SAGE TEA DANDY TO DARKEN HAIR

IT'S GRANDMOTHER'S RECIPE TO BRING BACK COLOR AND LUSTRE TO HAIR

You can turn gray, faded hair beautifully dark and lustrous almost overnight if you'll get a 50-cent bottle of "Wyeth's Sage and Sulphur Compound" at any drug store. Millions of bottles of this old famous Sage Tea Recipe, improved by the addition of other ingredients, are sold annually, says a well known druggist here, because it darkens the hair so naturally and evenly that no one can tell it has been applied.

Those whose hair is turning gray or becoming faded have a surprise awaiting them, because after one or two applications the gray hair vanishes and your locks become luxuriantly dark and beautiful.

This is the age of youth. Gray-haired, unattractive folks aren't wanted around, so get busy with Wyeth's Sage and Sulphur Compound tonight and you'll be delighted with your dark, handsome hair and your youthful appearance within a few days.

This preparation is a toilet requisite and is not intended for the cure, mitigation or prevention of disease.—Adv
