

Belgium is Being Divided by Germans

THE HAGUE, Aug. 1.—The Germans are steadily carrying out their scheme of dividing Belgium into two parts, comprising the Walloon or French speaking and the Flemish provinces respectively. The past month has seen the splitting up of the ministry of the interior and the ministry of foreign affairs, leaving only two departments not yet affected, those of finance and of justice.

often chosen from among those who have lent themselves to forwarding the separation idea or have otherwise commended themselves to the occupying power.

According to the "Taegliche Rundschau," each of the projected parts of Belgium is to have its own budget.

NO LIGHTS FOR BERLIN

COPENHAGEN, Aug. 1.—Dark days literally are coming for Berlin. An order has been issued restricting the lighting of stores, hotels, restaurants and cafes.

The order is due to the admittedly inevitable coal shortage and transportation troubles of the coming winter. The newspapers complain that nothing is being done to relieve the situation.

Hague Conference to Open New Possibilities

LONDON, Aug. 1.—Commenting on the meeting of British and German delegates at The Hague, to consider questions relating to prisoners, the "Law Journal" says:

"It has always been understood hitherto that the state of war operates a complete severance of all relations between the belligerents except that of pure force. This is the explanation of the common practice, followed universally in the present war, whereby the belligerents deal with

each other thru the intervention of neutral powers. The present meeting, it is suggested, without precedent in the history of international law.

Its importance does not end there. It almost seems as if we are at last becoming emancipated from the chains of the old fashioned diplomacy which almost deliberately made it impossible for belligerents fairly and squarely to talk out their causes of friction face to face. The new departure is one from which much may be hoped in other directions."

VICTIM OF ACCIDENT RECOVERS

P. L. Comer, who was painfully injured at the Pelican Bay mill early yesterday morning, is now considerably improved, and has been removed to his home in the Townsend Flats from the Blackburn hospital.

Comer was attempting to remove a rock which had become imbedded in one of the logs just drawn up from the water, with an axe, when a log behind him slipped from the carriage and crushed him between the two.

LEGAL NOTICES

Summons (No. 901 Equity) In the Circuit Court, in and for the County of Klamath and State of Oregon.

Nettie G. Shanks, Plaintiff, vs. Frank Titus Shanks, Defendant. To Frank Titus Shanks, Defendant above named:

In the name of the State of Oregon: You are hereby required to appear and answer to the complaint filed against you in the above entitled suit on or before the 31st day of August, 1917, that being the last day of the time prescribed in the order for publication of this summons, and if you fail so to appear, plead, answer, demur, or otherwise move, for want thereof, plaintiff will apply to the court for the relief prayed for in his complaint, to-wit:

For a decree dissolving the bonds of matrimony now existing between the plaintiff and defendant, upon the grounds of desertion for more than one year last past immediately preceding the filing of the complaint herein.

This summons is served upon you, the said defendant, by publication thereof in the Evening Herald, a public newspaper of general circulation, printed and published at Klamath Falls, Oregon, once a week for six successive weeks (seven insertions), the first publication being made July 18, 1917, and the last publication August 29, 1917, by order of Marion Hanks, County Judge of Klamath County, Oregon, acting in the place and stead of D. V. Kuykendall, Judge of the Circuit Court of Klamath County, Oregon, there being no circuit judge within the judicial district on the date of this order, which said order was made, entered, dated and filed in this suit July 17, 1917.

RENNER & KENT, Attorneys for Plaintiff. Residence and postoffice address, Klamath Falls, Oregon. 18-21-1-9-15-22-29

WEDDING LATE YESTERDAY

Phillip Bernhart Moteschenbacher and Myrtle May Ford, two well known young people of this city, were united in marriage yesterday by Justice of the Peace E. W. Gowan.

The groom is employed in the surveying crew of the reclamation service here. His bride has resided here for some time. Their marriage comes as a surprise to their many friends.

CLERK-CARRIER EXAMINATIONS NEXT MONTH

The U. S. civil service commission announces that a clerk-carrier examination will be held in this city August 25, 1917, to create an eligible register from which future vacancies in the position of clerk or carrier, Klamath Falls postoffice, will be filled.

Both male and female will be admitted to this examination. For information and application blanks apply Paul Bogardus, secretary, local board of civil service examiners, postoffice, or district secretary, Eleventh U. S. civil service district, room 303, Postoffice building, Seattle, Wash. Applications should be filed with the district secretary at the earliest possible date.

There are no holes in Kina disability policies. See Chilcote. 27

"LIMEYS" IN THE LATEST FOR "TOMMIES"

LONDON, Aug. 1.—American blue-jackets on duty in European waters have a nickname of their own for England's sailors and soldiers. They call them "limeys"; the individual being known as a "lime." The American sailor men apply the designation to all English fighters just as the British refer to their soldiers as "Tommys."

The sailor from the United States has his nickname for nearly everything he sees. Bluejackets who had served in the Near and Far East first started calling British sailors and soldiers "lime-juicers" because of their fondness for fruit juice and charged water. Now the designation has been shortened down, and everything British is "limey."

British sailors' and soldiers' clubs are known as "limey clubs," and the British brewed lager beer is commonly spoken of as "limey beer."

A well rounded man carries fire, life, accident and health insurance. Ask Chilcote for rates. 27

Start Tomorrow and Keep It Up Every Morning

Get in the habit of drinking a glass of hot water before breakfast.

We're not here long, so let's make out stay agreeable. Let us live well, eat well, digest well, work well, sleep well, and look well. What a glorious condition to attain, and yet, how very easy it is if one will only adopt the morning inside bath.

Folks who are accustomed to feel dull and heavy when they arise, splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices in the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning, before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the water and phosphate is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate

Be sure you get the kind that pays. There are many kinds of insurance. See Chilcote. 27

FINE RAMS ARE RECEIVED HERE

REX BORD OF OLENE GETS TWO FINE ANIMALS FROM HAY CREEK — MUST SELL THEM BACK AT END OF TWO YEARS

Two very fine registered Ramboulet bucks were received at the local

express company this morning by Rex Bord of Olene.

These animals, whose grandfather is said to be the finest ram ever imported into the United States by Jack Edwards of the Baldwin Sheep and Lamb company, were shipped from the ranch at Hay Creek, Ore.

The only condition upon which they could be secured by Mr. Bord was that they should be sold back at the end of two years.

William Woods, a prominent resident of the Bonanza section, was on the streets of the city today.

Mr. and Mrs. John Whitlatch of Merrill are Klamath Falls visitors today.

Baby Victim of German Airplanes on the Way to Hospital After Raid of July 7th

This photograph shows a victim of the German air raid of July 7th on London. The child with head bandaged, after being injured by the bombs from the airplanes is being taken to a hospital by the mother.

Each One a Hero In Germany Now

One is able to grasp the genuine heroism of the German nation only when it is realized that nearly seventy tons of iron crosses now decorate the doughty Teuton sons of valor.

While those of us who fall to note the heroism manifested in submerging helpless vessels and butchering defenseless women and children of Belgium, and think perhaps the Kaiser will have need of this metal for other purposes ere long, these symbols of bravery are being distributed thruout the empire by the carload, as indicated in the following dispatch from Copenhagen.

That 2,200,000 iron crosses of the second class and 49,000 of the first class have been awarded during the war is shown by announcements published in Berlin, which have been received here. Of this number 3,660 were conferred upon individuals "behind the front," but it is certain that the number of persons wearing the decoration who have never been under fire is even larger. The classification "behind the front" probably applies only to noncombatants engaged in war service, and not to individuals, like von Jagow and other civilians, who from time to time have been stationed at the main headquarters.

cross have been simply employed at the headquarters and by the staff; never smelling powder unless perhaps it was during the repulse of a long distance airplane raid. As an example of the lavishness with which the crosses are handed out, a correspondent of the Associated Press was present at a luncheon party of eight at the main headquarters in 1915, where the seven Germans present all had been decorated, and not a single one of them had ever been under fire.

During the Franco-Prussian war about one in every twenty participants was given an iron cross, and except in the case of high military commanders and sons of royalty, it was awarded only for exceptional bravery in the field.

The value of the iron cross now has become so debased, because of the vast quantities granted and the number of swivel-chair heroes who have thru their influence received them, that the establishment of a new order for valor is being talked of.

Have a new and modern seven room house on pavement. Will sell on easy terms or will take good vacant lot or small house as part payment. See Chilcote. 27

INSURE YOUR HAY

4 1/2c PER TON IN BARN OR 12c PER TON IN STACKS

Insures you for two months. Can you afford to Take Chances?

REMINGTON UMC

Wetproof Steel Lined Shot Shells

A NOTED Pacific Coast sportsman who has hunted everything from snipe to black bear, said recently: "The waterproofing feature now offered sportsmen in Remington UMC 'Arrow' and 'Nitro Club' Wetproof Shotshells, is the most important improvement made in the shotshell field in over a decade. The men who perfected the Wetproof system certainly know shotgun shooting and its requirements from field, duck blind and traps, as well as from the scientific angle."

Here is something that every man who lives in a wet climate or does his shooting in the stormy seasons ought to know about.

These are the first completely wetproof shotshells—a new and exclusive feature of the Remington UMC "Arrow" and "Nitro Club" Shotshells.

This is a process that took three years to perfect.

It involved a deeper study of wet-proofing materials than has ever been conducted outside of the Remington UMC laboratories.

It means special paper for the shells; a special formula for the wet-proofing; new equipment invented to apply the wet-proofing compound. Virtually a new type of shell—adding to the shooting qualities of "Arrow" and "Nitro Club" the hitherto unknown quality of perfect resistance to wet.

It produces a shell that can be soaked in water for hours without swelling, and without softening the crimp—a shell that is as bone dry inside after soaking as before—a shell that works perfectly through the gun in all climates, and can be depended upon for sure fire, speed, pattern and penetration, wet days as well as dry.

A shell that you ought to know.
