

"THE ROYAL IRISH"

Did you see the royal Irish As they marched away to war? Hear them crooning songs of battle, Hear them shout "Erin go Bragh"?

When the allies were retreating On that fateful day from Mons, The place of honor was assigned To Ireland's loyal sons.

On the battlefields of Europe You may pass upon your way Here and there a black-gowned woman

LA CROSS, Wis., Aug. 16.—George Wickland, 30, farmer of Malden Rock, Wis., declared God had twice warned him not to register when arraigned here before Federal Judge Baker.

Torpedo of the American Warship Poised in Midair

This unusual photograph shows a torpedo fired from an American warship just as it left the tube from which it was discharged, and before it had struck the water on its mission of destruction. The camera was able to catch the torpedo in its flight just before it reached the water and submerged.

KINK IN FUSE SAVES OGDEN WATER SUPPLY

SALT LAKE CITY, Aug. 16.—What is believed by government officials to be a deliberate attempt on the part of German agents to destroy the water supply of Ogden was disclosed here when Louis Cunningham, a watchman, discovered a bomb within a few feet of the wall of the reservoir from which comes the supply of water for the city.

A kink in the fuse is said to be all that saved the city's water supply. Government officials are following up the meager clues with which they have to work.

Astonishing Accommodations Provided in Trenches

FRENCH FRONT, Aug. 1.—(Correspondence)—Dozens of divisions of the French army now sleep underground in comparative comfort, even in the front lines, when the Germans are hurling tens of thousands of shells on the ground above them, thanks to the work of the companies of excavators formed since the beginning of the war.

The correspondent of the Associated Press has seen and been inside dozens of these subterranean cities—for such they may be termed—at many places, and even where all the natural conditions are difficult, has found the shelters commodious, well-drained and well-ventilated. In some cases a battalion finds accommodation in a single shelter, and each man lodged in it is provided with a simple bed consisting of a wire netting foundation supported by wooden uprights.

First aid posts and dressing stations with all modern surgical appliances are also to hand, so that the surgeon attached to the unit may attend immediately to any wounded man brought in from the nearby battlefield.

So well are the shelters protected from the view of the enemy that, although in many instances the underground lodging covers an area of 3,000 square yards, not once in the course of the past year has one of them been destroyed by the enemy's fire. They have many exits, the plan-

being to provide one for each section or quarter company, so that in case one exit should be hit and blocked, the men inside may escape through another opening.

At the beginning of the war the soldiers actually in the fighting line made their own shelters, which were just holes dug in the ground and covered with tree trunks and earth, affording very little protection, besides taking up much of the time of the soldiers and costing very much labor and money for transporting the necessary timber.

It was then decided to utilize the older classes of the reserve of the territorial army who had been called to the colors and who, despite their previous military training, had been found unable to bear the strain of campaigning. Several companies of them were formed, and they were first given the task of constructing shelters in the Somme district and around Verdun.

Special army sawmills have been started to provide the props and the planking for the shelters, and everything is done at minimum cost.

The veterans so employed have sustained losses when working in exposed positions, but no danger appears to daunt them, and they continue their job as they were working in the fields at home. They have adapted themselves to the use of modern tools, and altho the great majority of them had no previous experience of electric drills and borers, they now use them as well as practiced miners.

KERENSKY FEARS EARLY DEATH

LONDON, Aug. 16.—Russian circles in Switzerland, a dispatch to the Daily Express from Geneva says, learn from Petrograd that Premier Kerensky, in talking with personal friends recently concerning his health said: "I have not long to live. Heredity and disease have numbered my days. I must hasten the work of liberating Russia and do the greatest good I can before I depart. Peace now would make us future vassals of the kaiser, which would be worse than being vassals of the Russian emperor."

SAGE TEA TURNS GRAY HAIR DARK

IT'S GRANDMOTHER'S RECIPE TO BRING BACK COLOR AND LUSTRE TO HAIR

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application or two of Sage and Sulphur enhances its appearance a hundred fold.

Don't bother to prepare the mixture; you can get this famous old recipe improved by the addition of other ingredients for 50 cents a large bottle, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural color and lustre of your hair.

LEGAL NOTICES

Notice to Creditors In the County Court, State of Oregon, in and for the County of Klamath. In the Matter of the Estate of Abner Weed, Deceased.

Notice of Filing of Commissioners Report for Klamath Drainage District Notice is hereby given to all persons interested in the land included within the Klamath Drainage District, Klamath County, Oregon.

Fe Owners of Transient Livestock and to Whom it May Concern: Notice is hereby given that hereafter any owners of livestock from other counties in the state of Oregon or from any other state must immediately make a report to the Klamath County Stock Inspector, according to section 3583 of Lord's Oregon Laws.

FEEL FRESH AND FIT

You can feel fine all summer and avoid the depression which is so often caused by an inactive liver and the resultant stomach and bowel troubles, by using Nyal's Little Liver Pills. They act as a mild laxative and at the same time tone up the bowels and increase the activity of the liver. Price 25c.

Englishman Predicts a Meat Famine

LONDON, Aug. 16.—Predictions of a world famine of meat after the war were made recently by Viscount Lewis Harcourt. He said the decrease of pasture land resulting from more extensive cultivation would reduce the supply of cattle, and the supply of home produced meat would be further affected by the decision of the war office to feed the army for three months on home grown meat.

store Germany's stock of cattle to the normal figure of 23,000,000 head. He estimated that, after the war, Europe would want to obtain or import 16,000,000 to 20,000,000 head of cattle. For several years Germany would have to feed her people on imported frozen or chilled meat, and would come into a market where she had never bought before.

Smoke Producers Are Now In Common Use

FRENCH FRONT, Aug. 16.—Smoke producers to hide the position of batteries are in general use since the spring of this year in the German artillery operating on the Franco-British front. An order issued in connection with their employment was found recently in an artillery emplacement captured by the French. It gave details of the method in which the smoke producers were to be used as follows:

from the battery in the direction from which the wind is blowing, and there should be intervals of eight yards between them. "Emplacements for the smoke-producers should be prepared all around the battery, in order that their positions may be changed rapidly in case the direction of the wind should turn. "Use should be made of the smoke-producers as soon as the enemy begins to fire on the battery with aeroplanes to aid him in regulating the range and direction."

BRITAIN TO SPEND LESS MONEY

LONDON, Aug. 16.—Warning that Great Britain could not go on spending money at the present rate without serious disadvantage, was given recently in the house of commons by Andrew Bonar Law, chancellor of the exchequer. The disadvantage, he said would be realized more completely when the war was over than now. So long as the government was raising funds for prosecution of the war by loans, Mr. Law told the house of commons, the country was living in a false atmosphere. The po-

sition after the end of the war, he predicted, would require all the skill and ability which the government could exercise. He added that he would like to have raised a larger proportion of the war expenditures by revenues, but he pointed out the dangers of excessive taxation.

The government at present is financing the war, aside from aid received from the United States, by use of short term exchequer bonds and treasury bills. The latter are mounting rapidly, and about 710,000,000 pound sterling of them are outstanding at present.

Mr. Oren E. Roe is now connected with the Chilcote Agency, and will be glad to give you information relative to insurance at any time. Call at 628 Main street, or phone 66. 16

Continued Drought Is Damaging to Crops

PORTLAND, Aug. 16.—Continued drought conditions are causing serious damage to Oregon crops, according to the summary of crop conditions thruout the state for the week ending August 11, issued here by the weather bureau. The summary follows: "While rain is much needed for corn, beans, fruit, hops, sugar beets and pasture, it would be detrimental to harvesting, in which work has progressed rapidly. Continued drought

conditions are causing serious damage "Winter wheat threshing has begun, with fair to good yields, but light weight. Early sown barley, oats, rye and spring wheat yielding better than expected. "Early potatoes poor, late planted generally good. There are some indications of second growth in scattered districts. "With pasturage poor and feed limited, the prospects for stock are discouraging. Some loss from eating poisonous plants was reported."
