FRANCE IS READY TO FIGHT ON PARIS, Sept. 18.—Premier Paul Painleve, in reading the French ministerial declaration in the chamber of deputies today, reaffirmed France's determination to continue the war until Alsace and Lorraine were returned, along with reparation for the damage the Germans had done.

Klamath County News

HENLEY HAPPENINGS

The Henley school met September 2d for the purpose of organization, and was then dismissed for the remainder of the week, so that the teachers might attend the County Teachers' Institute.

The faculty of the Henley school for this term consists of Miss Jessie P. Rose principal, Miss Grace Evelyn Merrill of Ashland and Miss Edie Stuart of Newport.

The grammar school has not thirty-seven pupils enrolled. Many students have not been able to register on account of the very busy time among the farmers and the scarcity of help. Quite a number of the students are expected to enroll about the 1st of October.

Two new families have moved into our community, and are sending their children to the grammar school. Mr. Jackson's family have moved from Miller Hill onto the Green ranch, and the Thomas family have Summer Hill.

The primary departments lose Tom and Stella Rose, as their parents are moving to Klamath Falls for the winter.

The teachers of the Henley school attended the meeting of the Klamath county School Fair Association at the Commercial Club room Saturday afternoon. The association plans to hold this year the biggest and most successful school fair ever given in the county.

The revised edition of International Encyclopedia has just been added to the high school equipment.

The Henley high school girls' basketball team is planning to do some good work this year, and have made plans for new suits.

A party of Henley students and parents visited the Lava Beds Sunday, and report a fine trip. Another party is arranging to see this section next Sunday.

OREGON TEACHERS ARE IN DEMAND

MONMOUTH, Ore., Sept. 18.—Practically every member of the 1917 class of the Oregon State Normal School here has obtained a teaching position, according to President C. L. Ackerman.

Ordinarily many graduates are forced to wait a year after graduation before obtaining places. Enrollment of many male teachers is believed one reason for the fact that the demand for teachers for some grades is greater than the supply. The normal opens September 24th for the 1917-18 year.

Chilcote writes all kinds of automobile insurance. 19

Indian Sons of Veterans Who Fought Uncle Sam Will Now Fight For Him

These stalwart red men, whose fathers fought against Uncle Sam in the wars of the border, now make up a company in an American Infantry regiment, and each one of them is anxious to go to the front to fight for him. Nearly every nationality in the world is now represented on the French front, but when the white and red Americans get there two more races will be represented.

Lumber Loss At Susanville Heavy

Great Efforts of 2000 Men Prevent Further Loss of Mills and Yards

---Dynamite Used to Prevent Spread of Flames

94,000,000 Feet in the Yards

A complete report of the big fire which destroyed over a million and a half dollars worth of lumber of the Redwood Lumber company at Susanville, Calif., Monday, has been received. The meager dispatch first received declared that 75,000,000 feet of lumber had been destroyed, but this figure has been reduced to 47,000,000 feet, and the loss \$1,500,000 instead of \$2,000,000. The fire was discovered at 2:30 in the morning. The watchman first saw a small blaze between two piles of lumber. A general fire alarm was turned in, but before the fire hose could be connected and fire fighters put to work the flames spread to adjoining piles of lumber, destroying 47,000,000 feet, causing a loss of about \$1,500,000. In addition to making efforts to prevent the spread of the flames in the lumber piles, the 2,000 fire fighters worked until about 10 o'clock to save the great sawmill, which is one of the largest on the coast, and among the largest in the United States. The flames were spreading toward the box factory when a ton of dynamite was exploded to clear the way between the burning lumber and the box factory. Portable fire walls were used to protect the fire fighters. Had it not been for the excellent firefighting system—maintained by the company, the loss would have been much greater, and probably the mill and factories would become the prey of the flames. Two large pumps with a capacity of 1,600 gallons a minute were soon turning water on the flames, which spread quickly thru the seasoned lumber for use in the box factory. There were about 94,000,000 feet of lumber in the yards, on which about one-fourth of the loss is covered by insurance. The box factory will be the only part of the plant affected by the fire, as the lumber which had been seasoned for that purpose was burned. The men who discovered the fire saw traces of oil at the place where it started, and found some lumber with oil sprinkled on it. A flashlight showed two men leaving, and was met by a Westwood resident about five miles from this city running at the rate of sixty miles an hour. Citizens heard an automobile rushing thru the streets of this city at an early hour this morning. The car is supposed to have been the one seen at Westwood. Sheriff A. C. Hunsinger and deputies are pursuing the trail of the firebug. While the fire is under control and all danger has passed the lumber will be burning for three or four days.

LUXBURG "GETS HIS" AT HOME

GERMAN PRESS SEVERELY CRITICIZES BEHAVIOR OF REPRESENTATIVE IN SOUTH AMERICA FOR METHODS USED

AMSTERDAM, Sept. 19.—The pan-German newspapers, which have taken longer than the remainder of the German press to digest Count Luxburg's famous dispatches to the German foreign office thru the Swedish legation in Argentina, complain of the count's lack of discretion and caution, and indeed appear to be very cross with everyone concerned. The newspaper Taegliche Rundschau of Berlin says it was not absolutely necessary for the count to announce by cable that he regarded the Argentine foreign minister a notorious ass. It thinks that it might have been said later. The comment of Count von Reventlow in the Tageszeitung is distinguished from the rest by the absence of any attempt to explain away Count Luxburg's reference to "sinking without trace." The count merely fumes because such dispatches indicate that the submarine warfare has not been guided strictly and unchangeably by the proclamation of the barred zone. The Kreuz Zeitung, like several other newspapers, explains Count Luxburg's famous expression as meaning that persons in life boats were to be taken on board submarines instead of being left off enemy coasts. Germany's diplomacy before and during the war is violently arraigned in an article in Voerwaarts, the chief German socialist organ. Commenting upon the activities of Count Luxburg at Buenos Aires, the paper says: "There are no words strong enough to blame and condemn a man who, holding such a responsible position, sends to his government telegrams testifying to such unscrupulousness." The entire German press continues to denounce the German charge d'affaires, who has been dismissed by the Argentine government.

TO RAISE MONEY FOR DEPENDENTS

SALEM, Sept. 18.—The governor has announced that he intends to investigate to determine how much money the state can raise to aid soldier dependent families. He said today that the war problems may require a special session of the legislature within the next few months.

Women! Here Is A Dandy Thing

Few drops on corn or callus stop pain, then they lift off.

Your high heels have put corns on your toes and calluses on the bottom of your feet, but why care now? This tiny bottle holds an almost magic fluid. A genius in Cincinnati discovered this ether compound and named it frezone. Small bottles of frezone can be had at any drug store for a few cents. Don't limp or twist your face in agony spool your beauty, but get a little bottle of frezone and apply a few drops on your tender, aching corn or callus. Instantly the soreness disappears and shortly you will find the corn or callus so shriveled and loose that you can lift it off with the fingers. Just think! You get rid of a hard corn, a soft corn or a corn between the toes, as well as hardened calluses, without suffering one particle. Millions of women keep a tiny bottle on the dresser, and never let corns ache twice.—Adv.

Savage Whales Infest Waters of South Coast

LOS ANGELES, Sept. 19.—Orca, or black killer, the savage, toothed member of the whale family, migrating southward in schools of unprecedented size, have been responsible recently for panic among the game fish of the Catalina channel and of reports of poor catches by fishermen in those waters, the home of the tuna, the sword fish and many other favorites of the devotees of the rod and reel. More than half a dozen orca in one school is an unusual sight, but Joe Welch, a well known sportsman of this city, reported recently having seen the high dorsal fins of hundreds of these vicious monsters cutting the waters of the channel while fishing off Catalina Island. Devastation invariably accompanies a visitation of the black killer, fishermen said. It attains a length of twenty feet and a weight of 2,000

TROOPS GUARD COAST MILLS

TRAINLOAD OF TROOPS FROM PORTLAND GUARD ASTORIA MILLS FROM THREATENED ATTACKS FROM I. W. W.

PORTLAND, Sept. 19.—A special train was employed to carry troops to Astoria last night to guard the Hammond lumber mill against Industrial Workers, who are threatening the employes with violence if they continue work, according to President A. S. Hammond. It is said that street disturbances are frequent. About seventy-five men in the Hammond mill struck today, apparently in sympathy with the Seattle strikers, against a ten-hour day. The lumber strike along the Columbia and Willamette remains unchanged. The steel ship yards are still operating in Portland and Seattle.

Several desirable 40 and 60 tract with some alfalfa. Prices very low and income good. See Chilcote.

Auto channels reset by the Klamath Auto Spring Works makes old wheels as good as new. All work strictly first class and guaranteed.

Is Your Money Supporting the Government?
At this critical period in our history our manufacturers are offering their mills, and our young men are offering their services to the United States Government.
Would you like to do your share and help by putting your money where it will support the new Federal Reserve Banking System, which the Government has established to stand back of our commerce, industry and agriculture?
You can do this by opening an account with us, as part of every dollar so deposited goes directly into the new system where it will always be ready for you when wanted.
