

French Women and Children Prisoners of Germans Sent Home

These women and children were no food for them in Germany. They were taken prisoners by German soldiers at the beginning of the war. They were recently returned because there was no food for them in Germany. The picture was taken at Evian on Lake Geneva, where they had been delivered for return to their homes.

Little Girl Grateful For Cancelled Stamps

To the Editor of the Evening Herald: Dear Sir—Let me thank you and thru you the many patriotic friends of Belgium, for the great number of cancelled stamps that I have received from your office. I was greatly pleased to receive the box with so great a number, knowing the help it would mean for the suffering children. Yours truly, BERNICE H. HELMS, Sacramento, Calif.

The above letter has been received from the 10-year-old granddaughter of James Hadley of the Herald force, to whom the appeal was made for the stamps. Miss Helms declares that all the stamps collected should be sent to Miss Kathleen Booth, 3575 Washington street, San Francisco, who is devoting her time to this work.

Soldiers Must Be Like Pelicans

EUGENE, Feb. 14.—In explaining how much rations a soldier must carry, Colonel John Leader, in his course given to ordnance department men at the University of Oregon, compared the soldier with a pelican, a bird that carries enough food in his beak to last him for several days. "Besides carrying your own rations while moving from the third to the first line trenches," said the instructor, "you must furnish provisions of all kinds for the first line regiments. Their lives depend upon the men coming up from the third line trenches." He also gave warning to soldiers not to walk in the communication trenches while making their way to the first line, for "Fritz" is continually sending showers of bullets into them, he said.

American Appetites Rapidly Increasing

WASHINGTON, D. C., Feb. 14.—Food consumption in the United States increased more than 10 per cent during the last twelve months, the result of all efforts at conservation and control. This means, the house committee on agriculture has been told by Food Administrator Herbert C. Hoover, that the food administration must be granted drastic authority. Hoover does not attribute the increased consumption to any lack of patriotism on the part of the American people nor to any failure in the propaganda campaign conducted by the food administration. The country's prosperity and the accompanying high wages have allowed thousands of persons their first opportunity to "eat all they want," Hoover says. While America's appetite grows, the food situation in the allied countries daily becomes more menacing. During the last week Hoover has received from Lord Rhodda, the British food controller, bringing new warnings that the United States exports of food stuffs must greatly exceed the original estimates.

SALEM FAILS TO GET LINEN MILL

SALEM, Feb. 14.—Federal government officials do not consider it practicable at this time to advance money toward the establishment of linen mills in Salem, according to State Treasurer Kay, who has returned from a trip to Washington, in behalf of the Oregon flax industry. The Salem Commercial Club had been negotiating with the government relative to the establishment here of mills for the production of airplane linen. Federal officials explained to Mr. Kay that the linen problem is solved satisfactorily for the present, and say that transportation of machinery, most of which would have to come from Europe, is not practicable now.

Glass of Hot Water Before Breakfast a Splendid Habit

Open sluices of the system each morning and wash away the poisonous, stagnant matter.

Those of us who are accustomed to feel dull and heavy when we arise; splitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, lame back, can, instead, both look and feel as fresh as a daisy by washing the poisons and toxins from the body with phosphated hot water each morning.

We should drink, before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it to flush from the stomach, liver, kidneys and ten yards of bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary tract before putting more food into the stomach.

The action of limestone phosphate and hot water on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast and it is said to be but a little while until the roses begin to appear in the cheeks. A quarter pound of limestone phosphate will cost very little at the drug store, but is sufficient to make anyone who is bothered with biliousness, constipation, stomach trouble or rheumatism a real enthusiast on the subject of internal sanitation. Try it, and you are assured that you will look better and feel better in every way shortly.—Adv.
